### Increased Train Service.

Traffic has become so heavy on the Northern Pacific road that it is necessary to increase the facilities for handling it and notice is served that next Sanday a new service will be inaugurated, consisting of three local passenger trains daily between Porthaud and the Sound. That is a good indication that there is business in the country. When there is travel there is money, and when there is money there is travel. and when there is money there is travel.

### The Eleven Sections.

The eleven sections of land cut off from the southern portion of this county two years ago by the legislature and tacked on to Washington county, were whacked off from Washington county by the recent legislature, and tacked back on to Columbia county, through the effort of Mr. Merrill. It's now in order to rear. Everbody reared when the land was taken away, so now it's restored to its, iet's kick with the vengeance of a ruffled mule.

### Did Not Appoint.

We stated in our last issue that the county court would appoint a road master for this county, in compliance with a recently-enacted law, but such action was deferred. The law states that a road master shall be appointed, and shall be allowed for his services a reasonable compensation and shall devote his entire time to the matter from the first day of April until the first day of next January. The Clatsop county court appointed a road master at a salary of \$80 per month.

### Did Not Appropriate.

### Might Get a Bank.

Something has been said recently regarding the establishment of a bank in this place. This is all well and good and we hope such a thing may soon be a reslitation rather than a dream. This accounty should have a bank and we believe such an institutution would become a paying enterprise. After what we have experienced in that respect, however, our idea of such an institution would be to have it licensed by the government, or in other words, let it be granted a charter and become a national bank. This would immediately inspire confidence and materially strengthen its chances to succeed. chances to succeed.

### Poor Farm Talk.

There is some talk of a poor farm for this county, and there is some ground for agitation along those lines. By reference to the list of bills allowed at the last term of court it will be seen that £230 was allowed for support. Of course this amount covers a period of two mouths, but there is little likelihood that monthly allowances will become any less. If some such plan as we suggested last week, in the form of a liospital and poor farm combined, a hospital and poor farm combined, could be consumated, the institution might be name self-supporting. With what cash patronage would naturally come to such as institution probably a minor sum could be saved each year by the counts. by the county.

### About that School House.

At the school meeting held two weeks ago a committee was appointed to ascertain the desires and wishes of the people in regard to aftering the plans of the present school house, and to solicitfunds for any improvement that might be decided upon. As a matter of fact the members of the committee have taken to joint action in the matter, but it is believed that sentiment is strongly in favor of making no change or improvement in the present building, and the erection of an entire new building is more in favor with the people. Doubtless this is the best policy to pursue. Two thousand dollars would erect a neat, substantial, adequate building, where, on the other hand, one-fourth that amount would be required to make the suggested alterations in the present building. Probably the best plan to be adopted would be the calling of a meeting of the taxpayers within the district that they might at once decide upon what should be done in the matter.

It is now known for a certainty that a railroad will be built from Vancouver to Kalsma, to become a part of the great Northern Pacific system, and that work will begin at both ends of the line at once within a few days. Though this statement is authoritative, the source of the information cannot now be made public. Independent of this assurance there is enough visible evidence at hand to confirm the pleasant news. The case of the Washington & Oregon

Railway vs. the Portland & Puget Sound Railway for condemnation of the right of way between Vancouver and Kalana was begun several weeks ago before Judge Miller, at Vancouver, Application was made to Judge Hanford to transfer the case to the United States.

It is probable that an attempt will be made to develop the iron prospects in the vicinity of Bunker hill at no far distant time. At the Campbell claim, this side of Bunker hill, there has been conside of Bunker bill, there has been con-siderable work done, enough to demon-strate that good iron prespects exist there, and it is not unreasonable to suppose that should such be the case an effort will be made to ascertain the ex-tent and value of it. The claims have been bonded for \$24,000, so it is said.

### Petroleum in this County.

When in Portland a few days ago we were advised by a prominent business man that an expert in that line had informed him that no section of Oregon showed more inflications of the existence of petroleum than does Columbia county. This is only confirmation of the belief had by many persons for some time that there is petroleum here. Just when or how extensive the preparation for developing this valable product will be made we have no definite knewledge, but if conditions are as represented it may be supposed that something in that direction may be looked for at no distant time.
