INCREDIBLE AMOUNT OF MONEY LOST BY THE WORKING CLASSES.

An Interview With George V. Hammon of Tacuma, Wash., a Man Who Talks from Experience.

The money lost annually by skilled workmen of all occupations figures up to millions of dollars and is becoming greater every year. This amount of money represents mainly time lost and the serious effect upon the social comfort of the workingmen and their families is evident. Mr. George V. Hammond, of Tucoma, Wash., said the other day:

Mr. Hammond resides at No. 610 N. Steele street, Tacoma, Wash., and at the request of the reporter made affihis above statement before davit to James H. Dege, a notary public, on July 5, 1901.

There is a popular idea that rheumatism is caused by exposure to cold and that some localities are infected with it more than others. Such conditions frequently promote the development of the disease, but, from the fact that rhenmatism runs in certain families, it is shown to be heriditary and, conequently a disease of the blood. Frequently an individual, in whose

family rhenmatism has not occurred, develops the disease, and when a diagnesis of the case is made, it is general ly found that the nilment is due to a derangement of the bloods
