JUST MEN; THAT'S ALL.

The county republican ticket for this county contains the names of men of standing in the community, qualified to perform the duties of the office to which each aspires, worthy of the support of every voter. This is all that is claimed for them. The candidates are men of for them. The candidates are men of affairs. They claim no attributes of deity. They are earth-born, not child-ren of the skies. No halo encircles their brows, their garments are not made of snow. A good hat and a suit of clothes, part wool and something less than a yard wide, seems to satisfy them, to-gether with the knowledge that the goods are paid for. The ticket is not composed of scripts or cherubims. They were draws from the ranks of the voters of the county, and are regarded as representative men, who will hon-estly and espably perform the duties required of them if elected. That's all. The men composing the opposition i

A. B. HAMMOND, who is in the East, is having built at the Newport News Company's chipyards a steel steamer, which is a forerunner of a large fleet of the kind, which is to be put on the Coast from Tillamook. The present steamer is to cost \$250,000, and is to have steamer is to cost \$250,000, and is to have a lumber carryisg capacity of 1,600,000 feet. She will be so constructed that with nine feet draft she will be enabled to enter Nehalem, Tillamook and other shallow harbors and carry 1,000,000 feet of lumber. She is also to be well equipped to carry passengers, and will be so constructed that she can be loaded and unloaded within twenty-four hours. It is claimed that this fleet will revolu-tionize shipping at Tillamook, Mr.

tionize shipping at Tillamook. Mr. Hammond is expected to return in about a week, and other matters of im-portance are expected to be developed for the interest of the Northwest.

WHEN a new arrival comes to town-

WHEN A new arrival comes to lown-any town in the county-take it upon yourself to show him the value of the location, tell him about the resources of our county, and make it as pleasant for him as possible. If your time is too valcable to spend much time in his com-pany, send him to some one who will get him interceted in the locality and seen a tra-

small land owner; fifth, the construc-tion of railroads into localities that need the settlers' occupation of the land; sixth, the passing of the title to the gov-ernment lands into the hands of the in-dividual and keeping it under the con-trol of the cattle and sheep baroas and ider and other corporations.

It takes the assistance of the public It takes the assistance of the public to get a good local paper. If one is in possession of a bit of news and does not disclose it, it may be lost. Newspaper reporters, from force of habit, go where they are treated best in this respect, and if they skip a news item which you have in mind, nine times out of ten you are to hame. It is not our intention to lose a single item. We will call on wor are to biame. It is not our intention to lose a single item. We will call on you persistently. We do not only propose to follow the beaten channel of news, but intend opening new ones. If the reporter calls on you encourage him, and in this way you aid in getting out a good paper, and the more good ones you have in the community, the better.

In an opinion given by the assistant attorney general recently it is held that where a county makes a compromise of taxes with a railroad or other corpora-tion or individual, such compromise val-in reality an admission of excessive val-uation, and therefore each fund must suffer its proportion of the reduction. The apparent loss to the state in its rer-enues is not to be said to the county out required of them if elected. That's all, The men composing the opposition ticket are no different. We personally know each one of them, and we know them to be gentlemen, capable and wil-ling to do their duty. A man to receive must certainly be regarded with decent respect by his fellows. The apparent loss to the state in its rev-enues is not to be paid to the county out raise the amount mecessary to reimburse the state by future levies. The question is one that has risen in nearly every county in the state. county in the state.

> Whan it comes to measuring rainfall, it is surprising how much water there is in rain, and how deceiving is the gentle, In rain, and how deceiving is the gentle, misty fall of the Northwest. In actual measurement one inch of rainfall is equivalent to 27,147 gallons of water on an acre of 43,500 square feet, or 802 har-rels of water of 315 gallons each, weigh-ing 113% tons, or 75,516 tons to a square mile of 640 acres.

A Nearly Fatal Runaway

Started a horrible ulcer on the leg of J. B. Orner, Franklin Grove, IH., which defied doctors and all remedies for four years. Then Bucklen's Arnica Salve cared him. Just as good for boils, burns, bruises, cuts, corns, scalds, skin eruptions and piles. 25c at the St. Hel-ons pharmacy. one pharmacy.

Good for Rheumstism.

Last fall I was taken with a very so-vere attack of muscular rheumatiam which caused me great pain and annoybim as possible. If your time is too yalaable to spend much time in his com-pany, send him to some one who will get him interested in the locality and surrounding country. If there is a re-liable real estate firm in your town send him there. The more people there is in a community the more valuable your property will become.
