His Last Hope Realized.

In the first opening of Oklahoma to settlers in 1889, the editor of this paper The Columbia river flood will material was among the many seekers after fortune who made the big race one fine day in April. During his traveling about and afterwards his camping upon his claim, he secondered much bad water, which together with the severe heat, gave him a very severe disrebear which. which together with the severe heat, gave him a very severe diarrhoea which it seemed almost impossible to check, and along in June the case became so had he expected to die. One day one of his neighbors brought him one small bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy as a last hope. A big dose was given him while he was rolling about on the ground in great agony, and in a few minuses the dose was given him while he was rolling about on the ground in great agony, and in a few minuses the dose was given him a few minuses the dose was gony, and in a few minuses the dose was gony and in a few minuses the dose was gony and in a few minuses the dose was gony and in a few minuses the dose was gony and in a few minuses the dose was gony and in a few minuses the dose was gony and in a few minuses the dose was gony and in a few minuses the dose was gony and in a few minuses the dose was gony and in a few minuses the dose was gony noticed and within an analysis.

It is interesting to note that fortunes are frequently made by the invention of articles of minor importance. Many of the most popular devices are those designed to benefit the people and meet popular conditions, and one of the most interesting of these that has ever been invented is the Dr. White Electric Comb patented Jan. 1, '99.
