## Hood's Sarsaparilla

It strengthens and tones the stomach and permanently cures dyspepsia and all stomach troubles. Accept no substitutes.

The Russian joker who caused a panic in the zoological gardens at St. Petersburg by shouting that the tigcrs had escaped should exchange cards with the American humorist who yells "Fire!" in places of amuse ment. They should then report to the park light the property of the fool killer together.

THE SMITH-PREMIER WAY.

### Durphy & Dickerman Are as Interesting as a Popular Novel.

A good illustration of the way the northwest is being waked up is afforded by the doings of Durphy & Dickerman, the energetic firm who control Smith-Premier typewriter on the Pacific Coast. Tuesday, June 9, W. H. Durphy, senior member, and F. Porter, Portland manager, arrived В. Portland; Wednesday they leased the store, 247 Stark street, and 'let contracts for fitting up the most complete and attractive typewriter establishment in the city; Thursday they sold 25 Smith-Premier typewriters to the Behnke-Walker Business collegethe largest typewriter order ever placed in Portland. Mr. Durphy, hale and hearty, crackling with energy, and Manager Porter, courteous and competent, master of his business, are calling upon some dozens of the people a day, getting acquainted and advertising their splendid machine and the fact that they are sole selling agents for this coast. This concern is famous and successful on account of its great activity and punctilious integrity in pushing the best typewriter made The incoming of fresh blood of this kind into local commercial circles is one of the hopeful signs of the hour. As a sample of up-to-date methods in 'getting busy'' Durphy & Dickerman's 25-ms hine order within 24 hours after arriving in town (better than one ma chine an hour) takes the paim. DISAGREEABLE

REFLECTIONS

The mirror never flatters; it tells the

the reflections. A red, rough skin is fatal to

beauty, and blackheads, blotches and pimples

are ruinous to the complexion, and no wonder such desperate efforts are made to hide these blemishes, and

cover over the defects, and some never stop to consider

the danger in skin foods, face lotions, soaps, salves

and powders, but apply them vigorously and often with

truth, no matter how much it may hurt the

pride or how humiliating and disagreeable

blood, and to attempt a cure by exter-

nal treatment is an endless, hopeless

task. Some simple wash or ointment

is often beneficial when the skin is

much inflamed or itches, but you can't

depend upon local remedies for perma-

nent relief, for the blood is continually

throwing off impurities which irritate

and clog the glands and pores of

the skin, and as long as the blood re-mains unhealthy, just so long will the eruptions last. To effectually and per-manently cure skin troubles the blood

must be purified and the system

thoroughly cleansed and built up, and S. S. S., the well known blood purifier

and tonic, is acknowledged superior to

all other remedies for this purpose. It

is the only guaranteed strictly vegeta-ble blood remedy. It never deranges

system or impairs the digestic

and assimilation of food and improves the appetite. Being a blood purifier

Recent observers have found that plumb lines for accurate work should be of copper or bronze. A steel wire in a deep shaft was slightly deflected

by the earth's magnetism. In his latest researches Professor Curie has found that radium keeps its own temperature at 1.5 degrees C. above that of the atmosphere. This paradoxical substance emits more

Peat fuel in freight locomotives in the cost being about the same as with of an extra fireman, however, the peat is now mixed with an equal weight Things don't look very metropoli- of coal, and the mixture has proven so satisfactory that it is to be tried on passenger trains.

A new form of safety lamp, giving no heat and possessing no flame, has been invented by Professor Hans Molisch, and described before the Vienna Academy of Sciences, but it may not prove commercially successful. It con sists of a glass jar lined with a comsipared young Flutterly to reform pound of saltpeter and gelatine, in which a colony of luminous bacteria is caused to develop. Such a lamp gives a bluish green light, sufficient to render coarse print legible, and to make faces recognizable at two yards' distance, and the luminosity lasts for several days.

> An English invention for the use of a current of electricity instead of steam to heat a radiating surface consists of a layer of powdered carbon, placed between enameled iron plates, and kept in position with asbestos cardboard. This constitutes the radiator, into which are led three copper strips, one at the center and one at each end, and a continuous current of electricity is passed from the center strip to the end strips. With a current of eight amperes, at 200 volts, a beating surface of 25 square feet can be kept at an average temperature of 190 degrees Fahrenheit.

A new kind of glass that resists great heat as well as sudden changes of temperature is made from Brazilian quartz pebbles. The pebbles are heated red hot and then thrown into distilled water. The purest pieces are next selected, and welded with the oxyhydrogen blow pipe into long stems like knitting-needles, from which glass vessels of any shape can be made. At present the quartz glass is chiefly employed for making laboratory appara-

tus. Into a test-tube made in this way a white-hot coal can be dropped without breaking it. Vessels of other forms can be heated white-hot and then plunged into cold water without

Records are now being searched for notices of the rare white water, or phosphorescent fog, of the Indian Ocean and other seas. This appears not, so long as he is on the throne as a weird haze, but proves to be a luminosity without mist, and it has been encountered as an ocean river a mile wide and as a broad area through which a vessel sailed fifty miles without touching the limits. One observer found the sea to the depth of a foot to be densely packed with luminous It is computed that when at rest fishes an inch long, while at another animals in shoals to the surface.

BUTTONS ON BUSHES.

Strange Nut from Which Buttons Are Made in Great Numbers.

No, the ivory buttons you wear do not represent the death of an elephant in the wilds of Africa; your pearl buttons were probably never nearer than you took them to the shell of a bivalve mollusk, and the probabilities are that no rubber tree was ever tapped to produce the hard rubber buttons that adorn your overcost. Down in Central America there is a fruit producing palm that has quite metamorphosed the button business and formed the nucleus for one of the most important industries in the United States. The seed of this fruit contains a milk that is sweet to the taste and relished out regard to consequences, and many complexions are ruined by the chemicals and poisons contained in these cosmetics. Skin diseases are due to internal causes, to humors and poisons in the by the natives. The milk when allowed to remain in the nut long enough becomes indurated and turn into sub-Cartersville, Ga., R. R. No. 2.

I suffered for a number of years with a severe Nettle-rash.

About welve years ago I started using S. S. S., and after taking three bottles I felt myself cured and have since taken a bottle occasionally, and had little or no trouble along that line. My general health has been better since. I recommend B. S. B. as a good blood medicine and all round tonic, Yours truly,

Mrs. M. I. PITTARD. stance as brittle and hard as the lvory from the elephant's tusk. The plant that produces these nuts is called the lvory plant. Most of the buttons now used in America, whether termed ivory, pearl, rubber, born or bone, come from this lvory plant. Thus the probabilities are that your buttons are made from a vegetable milk, and they grow on bushes, The lvory plant is one of the mar-

Some two years ago I suffered a great deal, caused on account of bad blood. Small rash or pimples broke out over my body and kept getting worse day by day for over a year. Seeing f. S. S. advertised in the papers and having heard also it had cured several people in this city, concluded to give it a fair trial. After using the medicine for some time, taking in all six bottles, I was entirely cured. vels of the age, and is rewarding its growers with vast fortunes. The nuts take any bad money," said an official are brought to the United States by of the Chicago subtreasury the other the shipload and hauled across the day. "Well, we go on the proposition, continent to the big button factories, "Take anything that looks like money," from which they issue forth in every conceivable design, color, grade and dassification of button.

The Ivory plant has recently been like Potash and Arsenic and drugs of this character, but aids in the digestion discovered in California, but the nut it produces in its wild state is of inferior quality and will not make good sons are counteracted and the blood made buttons. It is believed though, that rich and pure, and at the same time the with the proper cultivation the fruit would be as valuable as the Central up and good health is established, and American. If so the growing of but-this, after all, is the secret of a smooth, tons in America would become an industry of importance second only to for everybody wears buttons.

The best ivory nut for commercial which spell, 'Counterfelt.' purposes is found on the banks of the River Magdaleria, in the United States of Colombia, where by some it is called the Tagus palm. The fruit forms a globular head about twice the size of a man's head and weighs from twenty to twenty-eight pounds. The head is a kind of cluster of bulbs, and in all contains from fifty to sixty seeds. The seeds are allowed to dry and are harvested several times a year by the

The Apparel Gazette, the great deal-

ers' authority on everything that pecwear, says: "The Ivory not is used almost salely in the manufacture of buttons, though some factories also make poker chips from them. The nut, however, has superseded the archaic mud, rubber and bone buttons in vogue formerly. It admits of wider and more varied treatment for this purpose than any other known substance, and is easily worked. United States consumes more than one half of the world's product of Ivory nuts and nine-tenths of the vegetable ivory is manufactured into buttons.

"When the nut reaches the buttor factory it is cut into three slabs. In the process of cutting out, the button is partially shaped. Afterwards the thread holes are drilled and counter The button is then sent to sunk. the polisher, who uses the shavings and powder made in drilling to polish them in their white state. Afterward Sweden has hauled the maximum load, they are sent to the designer, who traces on the buttons in indelible dyes English coal. To avoid the expense the designs needed to make then match the various weaves, coloring and textures of fabrics. After receiving these outlines, if the buttons are to remain smooth and receive another coat of coloring, they are put into dye. If they are to be stamped with a serrated pattern, they are put into a pressing machine fitted with dies of the pattern desired."-Popular Mechanles.

CROWNING IS UNNECESSARY.

Plenty of Monarchs Reign Comforts bly Without the Ceremony. The suggestion is made in certain high quarters that the coronation-un

less privately performed should in future be discontinued altogether. There are various potent reasons for this. In the first place, the sovereign In these days does not require corona tion. The fact of his being on the throne is sufficient justification for his sovereignty. In the old days, before the ceremony became a mere religious

function, as at present, it was regarded as essential to crown the king before his right and title could be looked upon as unquestioned. He was then actu ally accepted by the nobility and the people as the rightful sovereign, against whom all pretenders had ever after no legal claim.

Nowadays the coronation does not even serve the purpose of symbolizing kingship. That fact is assumed by the accession ceremony following the death of a predecessor. That the coronation ceremony is not now regarded. In the same light as heretofore is attested by the fact that most of the prince. reigning kings of Europe have never been crowned.

The kalser, who has now been on the throne for over twelve years, will probably never have the crown, either of Prussia or Germany, placed up n his imperial head.

There is a story prevalent on the continent that the bishop of Posen, last week and left half a million. whose predecessors have crowned Prussian kings for many generations, Is persons non grata with the kalser. and that as long as the present bishop lives the sovereign will not allow him to perform the ceremony; but there is also a belief that the kaiser is not particular whether he is crowned or firmly and irrevocably.

Victor Emmanuel, king of Italy, has not been crowned; nor has Queen Wil- to about to start with large capital. helmina of Holland, who, though her coming of age was generally mistaken for a coronation, has not yet had her crown placed on her head. The same is true of the king of

Spain, whose coming of age and accession were not an actual coronation The sultan, who is now one of the ongest-reigning monarchs in Europe, has never had the ceremony perform ed, and it is certain that he never will be crowned. There is no crown symbolic of Ottoman sovereignty,-London Expresa.

Tolstoi's Little Joke.

cident which occurred in the novelist's recent visit to the Crimea, says an exchange. A rich American arrived in his yacht, accompanied by a party of friends, and asked permission to see the great Russian, who was ill, promising that they would be content with a glimpse and would not trouble him with talk. Leave was granted.

Tolstol sat upon his balcony, "like a Buddhist idol," as he said, and the whole party of Americans defiled slowly and silently before him, taking their gaze as they passed.

One lady, however, refused to be bound by the contract. She stood still my dear? for a minute, and shouted: "Leo Tolstol. Leo Tolstol, all your noble has inherited the aforesaid yell; that's writings have had a profound influence upon my life, but the one which has taught me the most is your ... Here she forgot the name of the work.

The sick author leaned over the raff of the balcony, and whispered with a smile, "The Dead Souls?" yes," she replied. "That book," said Tolstol, "was written by Gogol, not by me."

Worn-out Money.

"Instead of the old-fashloned 'Goodby,' the blase youth now says, 'Don't and those chaps that are so afraid of the bogus money should not be particular.

"There is money brought to this window that resembles anything except the legal tender of the United States. Torn greenbacks and brown backs, and even yellowbacks, are common, but they do not cause any discomfort

Many women and doctors do not recognize the real symptoms of derangement of the female organs until too late.

"I had terrible pains stong my spinal cord for two years and suffered dreadfully. I was given different medicines, wore plasters; none of these things helped me. Reading of the cures that Lydia E. Pinkham's Vegetable Compound has brought about, I somehow felt that it was what I needed and bought a bottle to take. How glad I am that I did so; two bottles brought me immense relief, and after using these bottles more I felt new life and blood surging through my veins. It seemed as though there had been a regular house cleaning through my system, that all the sickness and poison had been taken out and new life given me instead. I have advised dozens of my friends to use Lydia E. Pinkham's Vegetable Compound. Good health is indis-pensible to complete happiness, and Lydia E. Pinkham's Vegetable Compound has secured this to me."

HE DIDN'T KNOCK FIVE

Why the Young Doctor Had to Bom-bard His Own House. They had been married only a short while. He was a young and struggling physician, and she a very sweet, devoted little wife, but very much afraid of burglars, so that when it did happen that the doctor had a sick call during the wee hours, they resorted to all means that she might know that it was he who wished to enter the house upon his return and not the dreaded night prowlers.

The calls were not many, but some how they had never hit upon a success ful plan until the wife exclaimed one morning at breakfast; "I have it now, Jack; after this you knock five times and let there be a minute between each knock; then I'll be sure to know it is yourself." Jack, so the story goes, was not in favor of having to wait five minutes to gain entrance to his own house, but ever anxious to please, agreed to the arrangement, and one night last week had occasion to test it. Someone was dying, the messenger said, and wanted a doctor im mediately; would be come? Where upon Jack tumbled into his clothes and in the confusion didn't hear or, what was more likely, forgot all about the five knocks that he was to give the

front door upon his return. During his absence the fearigh wife 'could hear nothing but knocks," she afterward said, "and I was fust so nervous alone in a strange house and neighborhood, that I thought Jack had been gone an hour before he had time to turn the corner. Finally I heard the bell ring; then semebody tried the door. I was nearly dead from fright and don't know what would have happened had it not been that any number of stones began storming against the house. I knew this was an unusual attack for burglars, so with a prayer on my lips that Jack would return at least some time during that dreadful night, I ventured to the window and peeped out. It was Jack, and he saw

You've waked up the whole neighborhood. Why don't you let me in?" he fairly shouted.

Why didn't you knock?' came back the small voice.

"Why didn't I knock?" again shricked the trate busband. "Didn't you hear the panel fall out of the door? "I know," sobbed the timid little "but you didn't knock the right Miss Gldda -What did he say when you told him I was married? number; it was five don't you remember?"-Washington Post.
