

# Dyspepsia

Don't think you can cure your dyspepsia in any other way than by strengthening and toning your stomach.

## Hood's Sarsaparilla

It strengthens and tones the stomach, and permanently cures dyspepsia and all stomach troubles. Accept no substitutes.

### Quite Natural.

"Roscoe, dear, I see they've again raised the price of diamonds."  
"That's true Evelyn; but then you know, sparks will fly upward."—Yonkers Statesman.

### Cacao in Nicaragua.

Nicaragua uses up about 500,000 pounds of cacao a year. Chocolate hot or cold is used twice a day in every well-to-do household. Cacao grows in large pods containing from fifteen to twenty-five beans each on trees from ten to twelve feet high. A yield of \$400 an acre is not unusual.

### Charcoal and Yellow Jack.

Dealers in charcoal in Havana are said never to have yellow fever, while in lay circles it is advised always to have it about during its prevalence because of its absorbing properties, it is presumed.

### A Cupid Prescription.

"Well, then, how must I make love?"  
"First you must believe that there is no one in the world but me."  
"I've got that far already."  
"Next you must make me believe that there is no one in the world but you."—Life.

### Song Pleas'd Sir Thomas.

An amusing feature of the reception given by the Larchmont Yacht club to Sir Thomas Lipton was the singing of a song specially written for the occasion by Clay M. Greene. The song was "Tommy Lipton" and was a parody on Kipling's "Tommy Atkins." Sir Thomas enjoyed the clever verses very much.

### Deadly West Africa.

West Africa has the most unhealthy climate in the world. Other places, such as Aden, Singapore and Hongkong, are hotter. Other places show higher death rates. That is quite true, but when temperature, the annual rainfall and the relative humidity of the atmosphere are considered the causes of unhealthiness are revealed.

### Thumb Rings in Queen Anne's Time.

In the days of Queen Anne the feminine thumb ring was the badge of widowhood, and women tired of single blessedness were wont to don it and as "jolly widows" achieve conquests denied to them as spinsters.

### Information Wanted.

"Say, Mr. Carter, my big brother said that sister's steady was a shepard and an 'it' and me and Willie wants to know if you're sister's steady and what is a shepard and what lean 'it'?"  
—Pennsylvania P. H. Bowl.

### His Second Offense.

"This isn't the first time you have come in contact with the police?" said the magistrate to the witness.  
"No sir" was the reply.  
"What may I ask, was the reason of your former encounter?"  
"I woke him. He had gone to sleep on his beat."—Tit-Bits.

### A Feminine Marvel.

Chief Milligan—That female witness is the most peculiar woman I ever encountered.  
Inspector Casey—So? In what way does she differ from most women?  
Chief Milligan—Why, when she hasn't anything to say she doesn't talk.—Cincinnati Enquirer.

## BROMO-SELTZER

CURES ALL Headaches  
10 CENTS--EVERYWHERE

## Dizzy?

Appetite poor? Bowels constipated? Tongue coated? Head ache? It's your liver! Ayer's Pills are liver pills, all vegetable.

## Want your moustache or beard a beautiful brown or rich black? Use BUCKINGHAM'S DYE

## Lazy Liver

"I have been troubled a great deal with a torpid liver, which produces constipation. I found CASCARET to be all you claim for it, and secured such relief the first trial, that I purchased another supply and was completely cured. I shall only be one glad to recommend Cascarets whenever the opportunity is presented."  
J. A. SMITH,  
200 South Main St., Philadelphia, Pa.

## Cascarets

CANDY CATHARTIC  
REGULATE THE LIVER  
Pleasant, Palatable, Potent. Taste Good. No Gripe. Never Sickens. Weakens or Grips. 10c. 25c. 50c.  
CURE CONSTIPATION.  
Selling Everywhere. Solely by Druggists.  
NO-TO-BAC Sold and guaranteed by all druggists to CURE TOBACCO HABIT.

## PISO'S CURE FOR CONSUMPTION

# Science AND INVENTION

A new French life preserver is a belt filled with calcium carbide. It is quickly inflated by acetylene on being wet.

Great mountains on Venus are a supposed discovery of Herr Arendt, of Posen. These elevations appear to project through the clouds from time to time, and the observations thus far made tend to prove a rapid rotation in about twenty-four hours.

The magnetic pole in Northwestern America is supposed to have shifted considerably since its discovery by Ross in 1831. Taking with him seven companions in a small schooner, Amundsen, the Norwegian explorer, expects to make observations on the present site of this pole from 1893 to 1895.

Adding fine sulphur to the dissolved material, then heating preferably with pressure, is found by Ialor Kitees to more than double the resistance of cellulose as an insulator for electric wires. Flexibility varies with the percentage of sulphur, and resistance to acids and moisture is increased.

In the Smithsonian report on scientific work for 1902 Prof. Langley remarks that when the bolometer was invented, some twenty years ago, it was able to measure temperature to about one-hundred-thousandth of a degree. Since then the instrument and its adjuncts have been so far improved that temperature can now be measured to less than one-one-hundred-millionth of a degree readily and with precision.

The Italian government is awaking to the necessity of protecting what remains of its forests and to replanting devastated areas. The most valuable tree is the cork tree, which now abounds most in Sicily and Sardinia. The cork forests of Calabria having been almost wholly destroyed for charcoal. The present use of vast quantities of cork in the manufacture of linoleum and for shipbuilding emphasizes the importance of preserving and extending the cork forests. Spain also possesses great cork forests, and a few years ago the exportation of wine bottle corks from that country amounted in value to \$5,000,000.

The weights of 1,173 human brains have been collected by M. Marchand, of Marbourg. At birth the average weight is found to be 9.8 ounces in boys and 9.5 ounces in girls. At the age of one year, 2 pounds 1.5 ounces and 1 pound 11.5 ounces, respectively; and at the end of three years the weight has trebled. Increase is then slow. Full growth is attained at nineteen to twenty years in men and sixteen to eighteen in women, the mean adult weight being 3 pounds 1 ounce in males and 2 pounds 10 ounces in females. Loss by senile atrophy begins in man at about forty-eight years and in women at about seventy. Turgenoff, the Russian author, had one of the heaviest brains on record, weighing 47 pounds; and Gambetta's, scarcely 26 pounds, was one of the lightest.

The first "butterfly farm" is said to have been established only a year or two ago by the English entomologist, William Watkins, at Eastbourne, but already several similar farms have come into existence in France. The object is to rear rare genera of the Bombycidae, the silkworm family. They have, by crossing, obtained some new varieties, which are sought after by museums of natural history. They are also endeavoring to acclimate in France species of silkworms indigenous to other countries. The farms contain oaks, alantus trees, pines, plum trees, castor oil plants, and other plants the leaves of which serve as food for the caterpillars. Cocoons are hatched on branches protected by gauze, and, for the sake of uniform temperature, the insects are often kept in a room until after the first molting, when they are placed on bushes in the open air, and protected from birds by coverings of muslin or tulle.

**New Rain Producer.**  
The latest Australian newspapers contain particulars of some experiments, which are said to have been more or less successful, of a novel method of producing a downfall of rain, says the Philadelphia Ledger. The inventor makes this statement: "I claim to produce rain by sending up continuously from three centers a column of gas made by certain chemicals. The gas, if sent up for a maximum of thirty-two hours, will produce rain over a range of ninety miles at any altitude, with any sky, and with the wind from any quarter. I do not need to wait until the wind is from the usually rainy quarter. In one experiment I made the barometric conditions were quite unfavorable, yet I produced rain. The gas, you see, causes in the different strata of the atmosphere a vacuum. This vacuum is the center of a heat storm and is filled by dense clouds that contain rain. These clouds come down with the gravity of the earth, when the rain descends."  
"The rain is different from ordinary rain found in districts in which experiments have been made. It is tropical rain, coming from the very lofty regions, being slight at first, and then later descending in heavy showers and bucketfuls. My operations have been conducted in an inclosure twelve feet by eight. Though I cannot, of course, give away my secret, I may tell you that the chemicals have to be changed in accordance with the conditions."

**A Marvellous Menagerie.**  
The strangest menagerie in the world is on an Ohio farm. Through all the gardens, orchards and fields of this curious place one meets wild beasts of many kinds ingeniously fashioned out of rods, trunks, and the branches of trees. It is a veritable toy Noah's Ark grown up.

Rather than climb the golden stairs to heaven, some people find it easier to slide down the banister to the other place.

# GRATEFUL, HAPPY WOMEN

MISS MURIEL ARMITAGE

Thank Pe-ru-na for Their Recovery After Years of Suffering.

Miss Muriel Armitage, 36 Greenwood Ave., Detroit, Mich., District Organizer of the Royal Templars of Temperance, in a recent letter, says:

"I think that a woman naturally shrinks from making her troubles public, but restored health has meant so much to me that I feel for the sake of other suffering women it is my duty to tell what Peruna has done for me.  
"I suffered for five years with extreme irregularities, which brought on hysteria and made me a physical wreck. I tried doctors from the different schools of medicine, but without any perceptible change in my condition. In my despair, I called on an old nurse, who advised me to try Peruna, and promised good results if I would persist and take it regularly. I thought this up for six months, and steadily gained strength and health, and when I had used fifteen bottles I considered myself entirely cured. I am a grateful, happy woman today."  
"Peruna cures catarrh of the pelvic organs with the same surety as it cures catarrh of the head. Peruna has become renowned as a positive cure for female ailments simply because the ailment is so common, and because the cause is the cause of the trouble. Peruna cures the catarrh. The symptoms disappear.

## Female Weakness Is Pelvic Catarrh.

Always Half Sick are the Women Who Have Pelvic Catarrh.

Catarrh of any organ, if allowed to progress, will affect the whole body. Catarrh without nervousness is very rare, but pelvic catarrh and nervousness go hand in hand.

What is so distressing a sight as a poor half-sick, nervous woman, suffering from the many almost unbearable symptoms of pelvic catarrh? She does not consider herself ill enough to go to bed, but she is far from being able to do her work without the greatest exhaustion. This is a very common sight and is almost always due to pelvic catarrh.

It is worse than foolish for so many women to suffer year after year with a disease that can be permanently cured. Peruna cures catarrh permanently. It cures old chronic cases as well as a slight attack, the only difference being in the length of time that it should be taken to effect a cure.

If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, Ohio.

## Know Her Business.

Mrs. Newed—I would like a pound of your best cheese.  
Grocer—Yes, ma'am.  
Mrs. Newed (examining it)—Why, this cheese is full of holes!  
Grocer—Yes, ma'am. That's the way it comes.

Mrs. Newed—Well, I don't want any of it. I'm not going to pay for a pound of cheese that contains a half pound of holes.—Boston Journal.

## The Charitable Set.

Phyllis—That young millionaire took a great fancy to me at the ball last night. He danced with me five times.  
Oh, that doesn't prove anything. It was a charitable ball, you know.

## A Second Thief.

"Some mean thief ran off with my umbrella today."  
"With your umbrella?"  
"Well, with the umbrella I've been carrying all week."—Philadelphia Press.

## He Was Bitter.

"John," said the stern woman, "what great man was it that wrote 'Woman is Heaven's Best Gift to Man'?"  
"He was no great man at all," growled the little henpecked husband.  
"He was?"  
"No, he was a chump."—Chicago Daily News.

## Indiscretion.

"Aren't the perfect trust and confidence engaged people have in each other perfectly beautiful?"  
"Perfectly idiotic, I should say."  
"Why?"  
"Because when I was engaged I told my future wife all about my income and prospects, and now I can't spend a dollar on myself without her knowing about it."

## He Stopped the Clock.

May—Oh! George, papa set the alarm for 10:30 tonight.  
George—Indeed. Didn't you remark the other night that the ticking was monotonous and annoying?

## A Musical Fish.

Lake Batticaloa, Ceylon has the probably unique distinction of being the home of musical fish. The sounds emitted by these are said to be as sweet and melodious as those which would be produced by a series of acolian harps. Crossing the lake in a boat one can plainly distinguish the pleasant sounds. If an oar is dipped in the water the melody becomes louder and more distinct.

## Novel Fishing Feat.

The details of "A Novel Fishing Feat," told by Everett Foster in the September St. Nicholas, are part of an experience of the winter in Yellowstone Park a few years ago. The lad who caught the trout, and, without moving from his position, swung his catch over into Nature's pot and successfully cooked it was a young brother of Mr. Foster; and the narrator was one of those who tasted the uniquely prepared dish and found it palatable.

## American Opium Smokers.

The number of opium smokers in the United States is estimated at 1,000,000.

## Where Flashbooks Come From.

Practically all the best flashbooks in the world—and nearly so of all qualities—are made at Redditch. The annual output is probably 500,000,000 books—about 10,000,000 per week—ranging in size from enormous aqua-ferocious-looking shark-books to the tiniest-looking very small troutlets, with a "bend" diameter of about one-sixteenth of an inch, 1,000 of which will not more than fill a good-sized thimble.

## His First Look at the World.

Observations of a Man Who Had Lived in It 40 Years Without Seeing It.  
If it were possible for a person to be born with all his faculties ready developed, the sensations of that person probably would not be unlike those of John Carruth, the thirty-year-old Scotchman who, having been blind from birth, has just received his sight as the result of a remarkable operation at the Glasgow Ophthalmic Hospital. Since he left the hospital, Carruth, who is the son of a farmer of Weir, has been getting acquainted with the appearance of persons and things and, as he is an unusually intelligent man, many of his comments thereupon have been remarkably interesting.

It was largely through accident that Carruth came to be operated upon. As he had been born blind, none of his acquaintances ever had supposed that he could be made to see. Neither did Carruth himself, so, even as a little boy, he determined to get through life as best he could without eyesight, and the result was that he accomplished things that seem almost incredible. For instance, he tended cattle, of whose appearance he had been able to form some idea by feeling of them. He grew flowers, picked them, and was able to arrange them in bouquets that it would have been hard for an expert in the grouping of colors to have beaten. For a year and a half this blind man drove the delivery cart of the village grocer and distributed its contents to the customers. Sometimes he would have as many as thirty parcels in his cart, but his wonderfully developed sense of touch enabled him to pick out every one and deliver it at the right address.

Through the agency of a young physician of his town Carruth was taken to Glasgow to be operated upon. Eleven days after the operation, he got the first signal that sight was coming to him, when he made out a red rug which lay over the foot of his bed. Then he was able to distinguish the face of his surgeon. He says that he did not know what it was at first, but that when the physician spoke, he realized that he must be looking for the first time on a human countenance. Afterward he saw his nurse and recognized her as a woman. "I knew she was a woman," he says, "because her face was pale and smooth." Then he asked to see his mother, who came, not knowing that her son's sight had been given to him, and sat down by his bedside. "I had a peep at her side-ways," says Carruth, "and then asked her how many wrinkles she had on her forehead. 'You can see' she cried, 'or how could you tell?' 'Can you count them?' Well, I could not see eye enough for that, but I could see her dear face."

Since then Carruth has been feasting his eyes on all sorts of wonderful things. Everything strikes him as "beautiful," but he says his greatest surprise was color. He had been told that there was a difference between things in this respect, but he could form no idea of what was meant. Green, especially, is his delight. Strangely enough, he says that it is only since he could see that he has known what it was to feel tired. He says, too, that whereas he used to ride a horse fearfully, he now would be afraid of being thrown. A small and rather flimsy bridge over a river which he formerly crossed without a tremor now worries him considerably to negotiate.

Ships were a surprise to Carruth; in fact, he had been able to form nothing more than a vague idea of anything that he could not feel with his hands. Of women he says that he had no idea they were "so beautiful and bonny." He meets a friend without having the slightest idea who he is until he speaks; then he says: "Oh, it's so-and-so!" At first he went into roars of laughter over the sight of people's jaws moving as they ate. But he is ambitious, and says that he wants to study and to learn languages. Perhaps the most significant remark that Carruth has made, however, burst from him when first he stood and looked over a quiet Scotch country scene with green fields in the foreground, backed by a river and a range of hills against the sunset.

"There's bound to be a creator for all this!" he said.

## Origin of Mugwump.

A couple of politicians argued the other day over the origin and meaning of the term mugwump. The first said: "The word was first used in the campaign of 1884. It was applied to the Republicans who repudiated Blaine to vote for Cleveland. It is a word from the language of the Algonquin Indians, and it means 'a big chief,' 'a person of great importance.' The mugwumps, you know, all think themselves of the greatest importance." The other politician said: "Mugwump is a slang word of the South. It no more derives from the Algonquin Indians than you do. A mugwump in the South is a bullfrog in its intermediate stage from the tadpole inward. It is, in other words, a nondescript, a creature that is neither one thing nor the other." "The second derivation seems to be the more plausible," said a third politician. "I'm sure I'd like to know positive which of the two is correct."—Philadelphia Record.

## Measuring Hides.

The ancient tanner paid an expert high wages to guess at the contents of his hides when sold by measure. Today an unskilled workman hands the irregular-shaped pieces to a little machine that looks something like a table with a double top, which, quicker than the mind of the expert could guess it, reckons with exactness the square contents in both the metric and standard systems.

## It's Coming to This.

"Speaking of winter," said the foolish man from Towson, "I witnessed a wonderful sight to-day."  
"What it was?" asked the easy mark from Walbrook.  
"Anthracite!" shrieked the Towson man, as he ducked and called for help.—Baltimore News.

## When a Great Caligality Befalls One.

When a great caligality befalls one, how it lightens it to talk about it if, after it is over!

## Our Eccentric Phrases.

Why do we always talk of putting on a coat and vest? Who puts on a coat and vest? We also say putting on shoes and stockings. Who puts on shoes before the stockings? We also put up signs telling people to wipe their feet when we mean their boots and shoes. And a father tells a boy he will warm his jacket when he means to warm his pantaloons. We are a little eccentric in our phrases at times.

## The Retort Discourteous.

Miss Van der Whoop—Yes, Miss Binns, I am the youngest member of one of the oldest families in New York.  
Miss Binns (envious)—I don't doubt that it is the oldest family—if you're the youngest member.

## Time to Leave.

Husband (in an aside to his wife)—If you can't think of some more anecdotes of our children's smartness let's go home right away, for they're getting ready to tell us things about their own.—Baltimore American.

## You Can Get Allen's Foot-Ease FREE.

Write Allen S. Olmsted, Le Roy, N. Y., for a free sample of Allen's Foot-Ease. It cures itching, hot, swollen, aching feet. It makes new or tight shoes easy. A certain cure for corns, ingrowing nails and bunions. All druggists sell it. Don't accept any substitute.

## The Quail in France.

In France the quail is called the bird of prophecy, this from an idea that the number of his calls twice without resting the farmer expects but 2 francs per bushel for his grain; if the bird calls four times he expects to realize twice the price which two calls insure.

## Sorry He Spoke.

Husband—Do you know that every time a woman gets angry she adds a new wrinkle to her face?  
Wife—No, I did not; but if it is so I presume it is a wise provision of nature to let the world know what sort of a husband a woman has.

## Protection of Australian Birds.

Australia has an ornithologist's union which is working hard to secure the passage of laws to protect certain birds which are in danger of extermination. It is suggested that certain islands should be reserved specially for the outing pigeon.

## Deafness Cannot Be Cured.

By local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube gets inflamed, you have a rumbling sound or impediment in hearing and when it is entirely closed deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever, unless some form of local treatment is resorted to, which is nothing but an unskilful tamponing of the eustachian surface.

We will give you Haid's Catarrh Cure, which is the only medicine that can be cured by Haid's Catarrh Cure. Send for literature, free.  
E. J. CHENEY & CO., Toledo, O.  
Sold by Druggists. Haid's Family Pills are the best.

## At the Lairs' Club.

"Have you got the plans for your new house completed yet?" some one asked him.  
"Not quite," he replied. "There is a difference of opinion between my wife and me as to the interior arrangements. She says the pantry is too large and that there are too many closets."

## Without another word the medal for the biggest lie of the evening was awarded to him.—Chicago Tribune.

## ABSOLUTE SECURITY.

# Mother

"My mother was troubled with consumption for many years. At last she was given up to die. Then she tried Ayer's Cherry Pectoral, and was speedily cured."  
D. P. Jolly, Avoca, N. Y.

No matter how hard your cough or how long you have had it, Ayer's Cherry Pectoral is the best thing you can take. It's too risky to wait until you have consumption. If you are coughing today, get a bottle of Cherry Pectoral at once.

Three sizes: 25c, 50c, \$1. All druggists.

Consult your doctor. If he says take it, then do as he says. If he tells you not to take it, then don't take it. Ayer's Cherry Pectoral is a safe medicine. Learn its worth. We are willing to prove it. C. C. AYER & CO., Lowell, Mass.

## Complying With the Rules.

"Here," said the doorkeeper in the lobby of the playhouse, "what are you going to do with that baby carriage?"  
"Take it in th' theater," responded Mrs. Murphy; "at sea on th' program that 'babies are not admitted in ar'rums.'"—Chicago Daily News.

## His Particular Line.

"That new man of yours," said the proprietor of the store to the department manager, "seems to be a mighty hard worker."  
"Yes," replied the latter; "that is his specialty."  
"What's working?"  
"No—meaning to."

## Relson Machine Co.
