The ship Two Brothers, which left here last week before completing her mill and a half feet cargo, is said to have hurried on her departure on account of the fact that the water was leaking into the vessel, but the break could not be located. When the boat reaches San Francisco, it is the intention to have it overhauled in the dry dock. The break is supposed to have been made when the vessel was dragged out of the shallow channel at Vancouver, Wash. The ship drew 18 feet of water, and two tow boats drew it through a 16 1/2 foot channel like a sled, and the hull likely received some severe wrenchings. The Two Brothers took a part of her cargo here, and receiving lumber brought down from Vancouver in lighters. The cargo was about 200,000 feet shoft.

CLATSKANIE

Postoffice Burglary—Freight Cars Run into Town.

Our city dads are reconstructing the bridge over the canyon in the rear of the Imperial Hotel on front street. If they will continue the good work, and have that nuisance removed in that vicinity unlooked for, their shortcomings might be overlooked.

The Benson Logging and Lumber Co., having received their new locomotive from the east are pushing the road to completion with all possible dispatch. By the way, one would think to read the Oregonian and Rainier Gazette that the Benson road was somewhere near Rainier, but that is a mistake. The Benson railroad is built from Clatskanie on the Clatskanie river and is not within about 20 miles of Rainier.

We will take the liberty to ask the editor of the Rainier Gazette why he does not give credit where credit is due. Please tell us how many of those poles that were loaded at Rainier on the cars, were cut at or near Rainier, and how many of them were cut at and near Clatskanie and rafted to Rainier.

Bert Tichenor is building himself a brand new house in town. The girls passing along the street in that part of the city are casting good eyes in that direction, whether at Bert, or the new house, we don't know.

Harvey Glenn has commenced the erection of a new cottage on the steep hillside, on the north side of the city, which when completed will be an ornament to the city.

Kasper Kobertine has the lumber on the ground for his new business block, on Bridge street. Kasper is a hustler, and is doing his best to build up the city with something more than wind or hot air.

Mr. Lock, the gentleman who has the contract to build and put in the new water works, is building himself a new two-story cottage in Tichenor's second addition.

E. W. Conyers, the pioneer merchant of this city, is building a new fence in front of his residence on Nehalem street. If more of our citizens would improve their residences, build substantial good fences and otherwise improve their property in the city with something more than hot air, Clatskanie could put on metropolitan airs.

S. Benson was in the city Saturday looking at his railroad project. He said it made him laugh when he read the dispatch from Rainier in the Oregonian about his railroad near Rainier. We thought after the election was over that the hot air in and about that town would cool off.

N. Merrill returned home from the hospital at Portland last week. We learn that he had a light attack of typhoid fever, and suppose that it originated from that cesspool in the street near his residence.

W. H. Conyers was in St. Helens, Monday attending to some legal business for the Benson Logging and Lumber Company.

We saw upon our streets last Sunday, Mr. Spence, the village blacksmith of Rainier.

W. Harvey Wells, special agent of the German American Insurance Company, visited our city last week, in the interest of his company. The German American Insurance Company is one of the substantial and best insurance companies in the United States.

The sawmills and shingle mills near this place, are rushing their lumber and shingles to market while the weather is fine.

The A. & C. R. Co. now run their freight cars up to the city, where they are loaded with lumber, shingles, telegraph poles, piling and farm produce, not for Rainier, but for the markets of the world.

Mrs. J. K. Hawkins, wife of Rev. Hawkins, left Monday for Terre Haute, Ind., where she will visit relatives for a few weeks.

Burglars broke into the Clatskanie post office Saturday night, but departed without securing either stamps or coin. A pane of glass was cut out of the side window, which enabled them to effect an entrance, but there were no indications that anything was disturbed.

A Double Birthday Surprise Party.

J. J. Englert had a birthday on October 21st, and George Adams one on the 22nd. They retired as usual Friday night, and were soon snoring like steam escaping from a sawmill engine. They were awakened by the merriest of a surprise party. The festivities lasted until morning, when the party saw Miss Amy Englert off on the train to Portland. Supper was served at the midnight, and various games whiled the time away.

Those present were Misses Mabel Silvers, Martha McCauley Nina and Amy Englert, Mr. and Mrs. Thompson, Bert McKibben, George Adams, Oscar Olson, J. J. Englert.

THE OCTOPUS

A Start in The Right Direction.

Few people in our country have any conception of the wide extent or magnitude of the co-operative movement in the Old World.

Like an octopus in the sea, slowly but irresistibly, and for years unostentatiously pushing its tentacles upward, while its roots spread far and wide in the very bosom of the present co-operative movement for more than a quarter of a century has been steadily and healthily growing.

The results attained in the different lines of co-operative work in the United States are so numerous and so varied that it is impossible to do justice to them in a single article.
