This paper is kept on file at the Oregon Press Association Room 9, Hamilton building, Portland, Oregon.

At the meeting of County Pomona Grange at Clatskanie, Mr. Holaday, of Scappoose, had on exhibition Northern Spy apples that measured 12 inches in circumference. Eight hundred boxes of these apples were shipped to Denver, Colorado, and the price received was $1.25 per box delivered on board the cars. Columbia county surpasses Hood River in the quality of its apples, and strawberries come up to the standard. There is something in the sea breeze climate of Columbia county that is particularly favorable to the production of apples and other fruits. A wealthy investor, who desired to engage extensively in raising apples, sent his agent through this county to investigate conditions, but the latter didn't know apples. The principal purchased a large tract of land in Washington county, and when he came to Holaday's nursery at Scappoose, and saw the excellent quality of the fruit, he stated that he would have given $1000 if he had located in Columbia county.

Professor Pratt and a lot teachers in the public schools of Portland are contesting the legality of the school law, which makes it a premium for the district schools for the teacher to attend county institutes. It is about time that Portland was weeding out a lot of these fossilized antiquarians. Many of them were discarded in the country schools months and years ago, but they are hanging on like barnacles in Portland.

St. Helens has an opportunity to get an electric light system, and it is probable that the city will grant the Western Cooperage company a franchise and enter into a contract to furnish lights for the city. This company will put in a plant at Houlton for its own use, and if granted a franchise from the city and the assurance of private patronage, will secure a larger dynamo.

It is just as necessary for there to be a head to road work as in any other line of business. Railroad companies do business on a systematic, economical plan, and each has a roadmaster, who has charge of the sections. Which is the best? to let a few supervisors waste the money on road work, or to pay a county roadmaster to see that the people's money is not wasted?

The new republic of Panama will make liberal concessions to the United States in the matter of the canal. The United States will have complete jurisdiction over the canal strip.

Ex-Congressman M. A. Moody was acquitted by the jury in the United States court, of unlawfully opening a letter not his own. It was proven to be a case of malicious prosecution.

If St. Helens don't have moral waves like Clatskanie and Rainier, it may secure an electric lighting system, by the asking.

The Ben-Hur combination wants a lot of advertising done in this paper for about 20 times less than other advertisers pay. It may catch a few suckers.

Everything is now closed in Rainier on Sundays, including business houses of every description.

That roadmaster resolution passed the Pomona Grange by default. No one urged it except a road supervisor.

Local Industrial Activity.

The condensed milk factory, proposed to be located at St. Helens, has not yet materialized but it is one of the possibilities. There is no better location in Oregon or Washington for a plant of this kind, for in the radius of a few miles, thousands of gallons of milk could be secured by boat transportation. The Deer Island section is not yet stocked with milch cows, but it has the facilities to become the greatest dairying region of any place. Mr. Houlton says that it will require about $15,000 to start the condenced milk plant. The plant will cost $9,000, and some capital will be needed to pay for milk until returns begin to come in for the manufactured product.

The Columbia City & Nehalem Logging railroad is extending its line one and a half mile back to reach more tall timber.

J. A. Hanna, who recently completed his new sawmill, near Scappoose, has a contract for cutting ties which will keep him running steadily for six months.

I. G. Wikstrom is running his Kalama sawmill on an order for a million feet of car material. Possibly that this means that eventually that there will not be a shortage of cars.

Fluhrer's new shingle mill at Mayger, is equipped with an electric light plant and is prepared to run day or night.

Industrial action is noticeable in an unusual degree in this section, of late.

The Western Cooperage Company, has its office building completed at Houlton, and several carloads of material are on hand for the constrcction of the main factory building which will be 80x60 feet. It is also the announced intention to add a shingle mill to the plant. The company has secured a considerable area of timberland, and mixed with the fir, is a fair proportion of cedar timber. The cedar is to be made into shingle bolts and will be floated down to the mills with the fir stave bolts. The company expects to put in a dynamo to light the plant at night.

The brigantine Addenda arrived Sunday night and is taking on 800,000 feet of lumber at the Lone Star Lumber Co's dock for San Francisco. The brig A. F. Coats arrived Monday afternoon, and is loading poles and piles for San Francisco points.

Nothing has ever equalled it.
Nothing can ever surpass it.

Steady rains and high water, especially in small streams has made salmon and trout fishing fine, the boys say.

R. A. McPherson is at home for the winter, having for a long time been a painter in the Navy yards at San Francisco, he has thought to take a rest and escape for a while the poison of the lead.

Fred Faltinet has returned from Alaska where he has been for several years, whether engaged in mining or otherwise we know no, but we have no doubt but Fred has made a stake.

The correspondent is again safely housed at Homewood Ranch, having been absent for over two weeks in Portland and Clatskanie. Our stay for a week at the home of Mrs. W. H. Conyers was exceedingly pleasant, for there is no lack of hospitality and good cheer at Alder Brook Ranch, but the trip over the hills to Mist will most certainly be long remembered. Having secured a very gentle riding animal, we left the home of Mrs. C at 7 a. m. we soon discovered that the horse was indeed gentle, which it could not otherwise be with front legs seemingly of wood, and smooth shod at that, slowly we plodded our way, our burden bearer slipping, sliding and stumbling but slowly and surely moving till at last the foot of the grade was reached and not carrying a life insurance policy, and knowing that should our lifeless body be found somewhere on the mountain, there would be mourning at home, and doubly so because of no recompense or reward for the loss of life, we dismounted and took the Foot and Walker line and within 1½ miles of Mist. Several times the gentle animal stumbled from the effects of snow balling on its feet, and we thot ourself fortunate that we were on foot rather than horse back. We have not yet decided whether we had a dollars worth of pleasure walking and leading the horse—yet the dear, gentle, faithful animal was some company if not much benefit, and we reached Mist at 11:30 and enjoyed the hospitality of Mrs. Lindgren, met the mail carrier from Pittsburg and was safely landed at the home of C. C. Keasey at 5 p m and no bones broken, yet somewhat lame from our endevor to reach Mist. Since our last adventure we are sure "there's no place like home", and such was the trot as we plodded up the steep grade thru the snow, water and mud. No more of such delightful (?) traveling.
