"It was one of the most intensely exciting nights I ever experienced behind the scenes. In making up, Robson dropped a huge daub of grease paint on the front of his tunic. Out of pure consideration for art, I painted a similarly dirty device on my garment. But Robson nearly destroyed the fine fabric of consistency, to the construction of which I had sacrificed the cleanliness of my attitre, by walking on absent-mindedly in the second act with a smoking cigar protruding from his mouth. animal of the plains was, generally speaking, a peaceable beast, the habits of the bison were such that to become entangled in a herd was a pertious position for both horse and rider. They were easily frightened, and, like sheep, followed their leaders blindly. This fact also made it difficult for the old bulls who always grazed at the head of the herd to stop a stampede, when once it occurred. The force behind them would push them forward, and many instances are known where the leaders, stumbling or pushed over a cliff, would have the whole herd piled up over them in a mangled mass, It is easy to see the perlis of a hunter against a force like this, which, once started, did not stop until exhaustion overtook those behind, Buffalo hunting was a science, and was only to be engaged in safely by those who thoroughly understood the methods of their prey.

## SOME QUEER SUPERSTITIONS

### Bad Luck Sure to Follow if You Are Broke on Thursday.

"However smart a man may be. however deep a brain, there is yet a tract of superstition in his makeup. said a thoughtful man to a writer on the New Orleans Times Democrat, and often it exists and controls him to various ways without his knowing When Willie Blank was at the sea- hoes and other tribes in Oklahoma to cut into strands and braided into snything about it. If you should tell shore last summer his father wrote to be present. Hundreds of Indians ac. ropes. Green hide was converted into him that he was superstitious he would resent it and in no uncertain way. But all men are superstitious in some way just the same. There are little things about which men are a bit cranky and they develop into well-rounded superstitions. There is Ople Read, who has a queer little notion that if he gets up Thursday morning without money in his pocket it is had luck and he be lieves in it so firmly that he will not centure out of the house and will not turn his hand to a piece of work if it happens to him

"He is generally very careful to see hat he has something left over Wednesday night, a nest egg, as the saying goes, for Thursday morning. But sometimes he forgets and suddenly discovers that he is dead broke. That settles it. Not a step will be take from the house on that morning. Now, how s that for superstition? Yet, call him superstitious-well, you had better do at long range. I know another man in Chicago who has a queer little no-tion that it is bad luck to forget anything when you are leaving home in the morning. One morning we had walked to the car together. He suddenly turned on me with the state sent: Til not go to the city to-day." When I asked him why he said he land forgotten something. 'It's bad luck,' he said, and he was uncere moniously making tracks for the house when he said it. I suppose we all have those little notions and beliefs, but we are not conscious of them and so we are apt to believe, quite honestly, too, that we are not the least bit superstitions. But we are, just the same,"

Boils show the blood is in a riotous, feverish Boils show the blood is in a local and sluggish to throw off the bodily impurities, which then concentrate at some spot, and a carbuncle or boil is the result. To one already enfeebled by disease, boils seem to come with more frequency, causing the intensest pain and greatest danger to the already weak and

debilitated sufferer. All skin eruptions, from the sometimes fatal carbuncle to the spiteful little cat-boil, are caused by bad blood, and the only way to avoid or get permanently rid of them is to purify and build up the deteriorated, polluted blood, and counteract the humors and poisons; and nothing will do this so exists. and poisons; and nothing will de this so quickly and thoroughly as S. > There are a little more than a handful of the Poncas left; if the white man ever found a good Indian, which some claim to be an impossibility, the Ponca was a near approach to that ideal. The tribe was part of the Sloux nation, and the original home was near branch of the Red River and Lake Winnipeg. The Poncas have always enjoyed a reputation for being very peaceable. They were driven from their Red River home by their old enemy, the Chippewas, who forced them beyond the Missouri River, Following them up closely, the Chippewas drove them away once more, when they joined the Omahas, which ailiance has had the effect of preventing their annihilation.

At times the plains were a solid, moving mass of monsters; as far as the eye could see they were visible in enormous numbers. Trains were often delayed while a herd crossed the tracks of the Union Pacific Raliroad. At one time they roamed all over the

country. Naturally migratory, the indians knew their wandering habits, and followed them. They were in those days of the greatest value to the indians. They supplied nearly all of their food, and millions were slaughtered each year for the sustenance of the red man. Not only did the buffalo supply food, but furnished them with robes and hides for clothing and dwellings. The Indians made tools from the

hide, borns and bones of the buffalo. The bide of the bulls was tanned and used for lodge covers. Dried in the sun after the hair was removed, the hide became almost as hard as flint, and was used for moccasin soles and belts.
