

A PRETTY MILKMAID
Thinks Peruna is a Wonderful Medicine.

MISS ANNIE HENDREN.

Miss Annie Hendren, Rocklyn, Wash., writes:
"I feel better than I have for over four years. I have taken several bottles of Peruna and one bottle of Mannin."
"I can now do all of my work in the home, milk the cows, take care of the milk, and so forth. I think Peruna is a most wonderful medicine."
"I believe I would be in bed today if I had not written to you for advice. I had taken all kinds of medicine, but none did me any good."
"Peruna has made me a well and happy girl. I can never say too much for Peruna."
Not only women of rank and leisure praise Peruna, but the wholesome, useful women engaged in honest toil would not be without Dr. Hartman's world renowned remedy.
The doctor has prescribed it for many thousand women every year and he never fails to receive a multitude of letters like the above, thanking him for his advice, and especially for the wonderful benefits received from Peruna.

Only the Promise.
A big sea turtle was sprawling around in the tank in front of the restaurant.
"Look, papa!" exclaimed the little boy.
"Let's go in and have some real green turtle soup!"
"Not yet, George," said the father.
"Wait till some day when you see this tank empty."

Bred Contempt.
Girl with the Gibson Girl Neck—Can't you see something familiar in the face of that man sitting on the opposite side of the car?
Girl with the Julia Marlowe Dimple—Yes, it's his eyes. I wish he'd be a little less familiar with them.

TERRIBLE TO RECALL.
Five Weeks in Bed With Intensely Painful Kidney Trouble.

Mrs. Mary Wagner, of 1367 Kosuth Ave., Bridgeport, Conn., says: "I was so weakened and generally run down with kidney disease that for a long time I could not do my work and was five weeks in bed. There was continual bearing down pain, terrible backaches, headaches, and at times dizzy spells when everything was a blur before me. The passages of the kidney secretions were irregular and painful, and there was considerable sediment and odor. I don't know what I would have done but for Doan's Kidney Pills. I could see an improvement from the first box, and five boxes brought a final cure."
Sold by all dealers. 50 cents a box. Foster-Milburn Co., Buffalo, N. Y.

APPEAL TO PEOPLE

Russian Parliament Tells Them Not to Pay Taxes.

CZAR MAY IMPRISON LEADERS

Guards Prevent Newspapers From Publishing Revolutionary Manifesto—Much Disorder.

St. Petersburg, July 24.—The great news of today is the adoption of an address to the people by the deputies to parliament, who assembled at Viborg, the language of which, with its revolutionary demands that the people cease to furnish money and troops to the government and repudiate further loans, affords pretext enough for the government to lodge its authors in the fortress if it feels strong enough. A rumor was spread tonight that this course had been decided upon.
Copies of the appeal to the people are in the hands of all St. Petersburg newspapers, but it will scarcely be printed tomorrow, for the reason that a detachment of police is posted at the door of every newspaper printing office in the city, with orders not to permit any papers to leave the building until authorized by the censor. The authorities hope by equally vigorous measures to prevent the publication of the appeal in other cities, and in the meantime to nullify the fears of the people as to the possible effect of the appeal.
Meanwhile the masses of the Russian people, slow of thought and action, have not yet roused themselves to the gigantic upheaval which is sure to follow the dissolution of their parliament.
Minor disorders are reported from half a dozen cities. An incipient anti-Jewish outbreak at Odessa has been checked by the police. A sympathetic strike has been begun at the Kharkov railroad shops, which may inaugurate a general strike of communication, but St. Petersburg, Moscow and most of the other great centers are still calm.

SECRETS OF DREADNAUGHT.

British Admiralty Makes Public Her Plan of Armament.
London, July 24.—The first official announcement regarding the battleship Dreadnaught is contained in a white book on naval construction the past year, which was issued tonight. Besides ten 12-inch guns announced, the Dreadnaught will have 27 12-pound quick firing anti-torpedo boat guns and five submerged torpedo tubes. In the arrangement of the armament six of the big guns are mounted in pairs on the center line of the ship, and the remaining four are mounted in pairs as broadsides.
In view of the modern potentialities of torpedo boats, and considering especially the chances of a torpedo attack toward the end of the battle, the anti-torpedo boat guns are widely separated so that the whole of them cannot be disabled by one shell.
The speed is designed to be 27 knots. The bunker capacity is 2,700 tons, with which the Dreadnaught can steam 5,800 sea miles at economical speed and 3,500 miles at 18 1/2 knots.
The estimated cost of the Dreadnaught, including guns, is \$9,987,485.

MANY BURIED ALIVE.

Building in Massachusetts Town Collapses on Workmen.
South Framingham, Mass., July 24.—At least eight and perhaps twice that number of masons, plumbers and Italian laborers were crushed to death today in the sudden collapse of a building in process of erection on Concord street, while ten others were dragged or dug out of the wreck, some seriously injured. At a late hour tonight ten were missing and a large force of laborers was at work on the ruins, searching for the dead.
Firemen and members of the Ninth regiment of infantry of the state militia, in camp here, succeeded in digging out a dozen injured, and later onnd others.

Bay Schools Are Opened.

San Francisco, July 24.—The public schools of San Francisco opened Monday for the first time since the fire and were well attended. As nearly 30 school buildings were destroyed, the schools in some of the districts were badly overcrowded, and will be conducted on the half-day session plan. The conditions, however, were more favorable than had been expected by the authorities. School Director Oliver estimated that the registration is about 90 per cent of the children registered before April 18.

Panic Among Odessa Jews.

Odessa, July 24.—The Jews here are in a state of panic, fearing an anti-Jewish outbreak as the result of the killing of a drunken Cossack who recently wandered through the Jewish quarter brandishing his saber and shouting: "Death to the Jews." Governor General Kaulbars, addressing a delegation of Jews today, said: "I vouch for my soldiers, but I am unable to say what the Cossacks or Christian civilians might do." The slightest incident might start trouble. Cossacks this morning looted three Jewish shops.

Bloodshed by Railroads.

Washington, July 24.—The accident bulletin, which has just been issued by the Interstate Commerce commission for the three months ending March 31, 1906, shows the total number of casualties to passengers and employes to be 18,296. The number of passengers and employes killed in train accidents was 274. The total number of collisions and derailments was 3,490, of which 289 collisions and 167 derailments affected passenger trains.

British Express Sympathy.

London, July 24.—A British address of sympathy with the Russian people and parliament is being circulated. Already the signatures of many persons have been obtained.

FARMS AND FARMERS

Home-Made Grain Box.
There is enough grain stored on every farm to warrant the building of a grain box, particularly when one can be built for a very small sum and with but little labor. Such a box is easily constructed from dry goods boxes, using a number of the same size to obtain the desired capacity and setting them end to end, fastening them together or not as desired. The fronts are cut so as to obtain the proper slant and then a cover is made so that the box or boxes may be locked if necessary. Divisions are made in the inside in accordance with the quantity of each kind of grain to be stored. The boxes are set on legs about fifteen inches high and each of these legs has an inverted cap of tin placed on it near where the leg joins

the box. These tins will prevent vermin in the shape of rats and mice from easily climbing up the box and getting at the grain. If desired the several divisions may be lined inside so as to make them more vermin proof. The illustration shows how simple this grain box is.—Indianapolis News.

Shearing Sheep by Machine.
I have used a sheep-shearing machine for the last five or six years, says a correspondent of Rural New Yorker. The machines have been very much improved in that time. The first knife or clippers, that I had very soon got clogged, and did poor work on sheep that had fine or oily wool, or had any wrinkles. The one I now have used on the same machine, will clip any kind of a sheep or wool. Now as to the direct question, Has the machine any advantage over hand work? So long as we had the old-fashioned shearers, who could turn off thirty to forty sheep a day, well sheared, I had no need of a machine. As the old men died off, or were unable to shear any longer, and because of the scarcity of sheep—few young men took up shearing—it became a problem to know how to get the sheep well and economically sheared. The men who were unused to it not only cut the sheep and tangled up the wool, but they would shear only a few sheep per day, which made it expensive. For this reason I put in a machine.

Seed Corn Breeding Pays.
Corn-breeding work, still in its infancy, already has spelled profit for many growers. Material increases in yield, due in large measure to planting improved tested seed, have been general that farmers everywhere are adopting better methods of seed selection. And other countries, noting what has been accomplished by American corn breeders, have taken steps to follow their example. Recently an American seed-corn breeding company shipped 1,300 bushels of corn to the agricultural department of the Egyptian government. The same company has also exported an order of 10,000 bushels of seed corn to Australia, where it will be used in breeding work conducted by the agricultural authorities of that country. It is to the corn belt of America that the peoples of the earth come for corn. Our corn crop is the envy of all civilized countries which cannot or do not grow corn.

White Pekin Ducks.
The White Pekin is a popular duck which has a distinctive type especially its own, and differing from all others in the shape and carriage of its body. The legs are set far back, which causes the bird to walk in an upright position. In size these ducks are very large, some reaching as high as twenty pounds to the pair. Their flesh is very delicate and free from grossness, and they are considered among the best of table fowls. They are excellent layers, averaging from 100 to 130 eggs each in a season. They are not-setters, hardy, easily raised and the earliest in maturing of any ducks.

Feed for Mare in Foal.
While in foal the mare does not necessarily require food different in quality from that fed at other times, but, all things being equal, the quantity should be somewhat larger. Oats are the best feed, yet shorts and bran may be fed with beneficial results. Mash can be given occasionally, and where possible cooked feed may be supplied at night three times a week.

Field of a Million Acres.
The largest fenced pasture field in the United States is on the Blackfoot Indian reservation, in Montana. This field contains 1,500,000 acres, and the 200 miles of barbed wire fence inclosing it have been completed. About 400,000 pounds of wire were required for the work. There are 60,000 head of cattle wintering in this pasture, half of which belong to the stockman, who are paying for the privilege of pasturing.

Usual Dash of Cold Water.
Horus—I've been nearly dead for sleep during the last week. I could scarcely keep awake while I was writing that story that was published yesterday.
Nagrus—I can easily believe it. It affected me the same way while I was reading it—from sympathy, I suppose.

FITS.
St. Vincent Dance and all Nervous Diseases permanently cured by Dr. Kline's Great Kidney and Bladder Remedy. Sold by all druggists. Dr. R. H. Kline, Ltd., 311 Arch St., Phila., Pa.

An Appreciation.
"Have you ever seen Hamlet played precisely as you thought it should be?"
"No," answered Mr. Stormington Barnes. "I have often wished I might be a spectator at one of my own performances."—Washington Star.

To Break in New Shoes.
Always shake in Allen's Foot-Ease, a powder that cures hot, swollen, aching, sensitive feet. Cures corns, ingrowing nails and bunions. At all druggists and shoe stores. Do not accept any substitute. Sample mailed FREE. Address: Allen S. Canted, Le Roy, N. Y.

Side Light on History.
The Hessians at Trenton had surrendered. "Ah, well," they said, "think how much more disastrous it might have been if we had had to make a hurried retreat!"
Later, as if to verify their words, came the Hessian fly.

His Reputation.
Miss Medicus (sister of the new village doctor)—Have you heard of Dr. Medicus about here?
Native—Rather, mum! Do you see that horse and carriage going by over there? That's one of his funerals.—Harrier's Weekly.

Save the Babies.

INFANT MORTALITY is something frightful. We can hardly realize that of all the children born in civilized countries, twentytwo per cent, or nearly one-quarter, die before they reach one year; thirtyseven per cent, or more than one-third, before they are five, and one-half before they are fifteen!
We do not hesitate to say that a timely use of Castoria would save a majority of these precious lives. Neither do we hesitate to say that many of these infantile deaths are occasioned by the use of narcotic preparations. Drops, tinctures and soothing syrups sold for children's complaints contain more or less opium, or morphine. They are, in considerable quantities, deadly poisons. In any quantity they stupefy, retard circulation and lead to congestions, sickness, death. Castoria operates exactly the reverse, but you must see that it bears the signature of Chas. H. Fletcher. Castoria causes the blood to circulate properly, opens the pores of the skin and allays fever.

Carl Schurz.
No other man of foreign birth ever showed such fine command of the English language or used it so felicitously. A man who objected strongly to his politics but admired his talents as a writer once said: "I wish Mr. Schurz couldn't write so well; I could have him better." In 1877 Carl Schurz visited Boston to make a speech against Benjamin F. Butler, who was running for Governor of Massachusetts. While arguing on the question of the resumption of specie payments, an issue that was paramount at that time, Mr. Schurz likened "inflation" to a balloon filled that had carried the American nation off its feet. At that time he made use of the following expression, which brought the immense audience that greeted him to its feet: "We have placed our feet on solid ground again and we propose to keep them there."

Letters from Prominent Physicians addressed to Chas. H. Fletcher.

Dr. A. F. Peeler, of St. Louis, Mo., says: "I have prescribed your Castoria in many cases and have always found it an efficient and speedy remedy."
Dr. E. Down, of Philadelphia, Pa., says: "I have prescribed your Castoria in my practice for many years with great satisfaction to myself and benefit to my patients."
Dr. Edward Parrish, of Brooklyn, N. Y., says: "I have used your Castoria in my own household with good results, and have advised several patients to use it for its mild laxative effect and freedom from harm."
Dr. J. B. Elliott, of New York City, says: "Having during the past six years prescribed your Castoria for infantile stomach disorders, I most heartily commend its use. The formula contains nothing deleterious to the most delicate of children."
Dr. C. G. Sprague, of Omaha, Neb., says: "Your Castoria is an ideal medicine for children, and I frequently prescribe it. While I do not advocate the indiscriminate use of proprietary medicines, yet Castoria is an exception for conditions which arise in the care of children."
Dr. J. A. Parker, of Kansas City, Mo., says: "Your Castoria holds the esteem of the medical profession in a manner held by no other proprietary preparation. It is a sure and reliable medicine for infants and children. In fact, it is the universal household remedy for infantile ailments."
Dr. H. F. Merrill, of Augusta, Me., says: "Castoria is one of the very finest and most remarkable remedies for infants and children. In my opinion your Castoria has saved thousands from an early grave. I can furnish hundreds of testimonials from this locality as to its efficiency and merits."
Dr. Norman M. Geer, of Cleveland, Ohio, says: "During the last twelve years I have frequently recommended your Castoria as one of the best preparations of the kind, being safe in the hands of parents and very effective in relieving children's disorders, while the ease with which such a pleasant preparation can be administered is a great advantage."

How Good Food may Turn to Poison

DECAY is not digestion, you know, even when it takes place in the stomach.
Food decayed in the body after being eaten is as dangerous to health as food decayed before being eaten.
Food nourishes or poisons, just according to how long it remains in the Bowels undigested.
Cascarets are the simplest and surest safeguard against Delayed Digestion yet discovered.
Sold in a thin Enamel Box, half as thick as your watch, which fits into the vest pocket or lady's purse as if it grew there.
In this round-edged Enamel Box are found six small Candy Tablets.
One of these toothsome tablets works wonders for digestion.
Soon as placed in the mouth it starts the Saliva flowing, which at once gets to work dissolving it.
The Saliva becomes blended with the Candy Cascaret tablet, and from the moment they start going down your throat together they start working together.
Now, what do they work at? Bowel-work, of course—Digestion.
Most of the Digestion occurs in the thirty feet of intestines that connect with the Stomach.
They are lined with a set of little mouths, that squeeze Digestive Juices into the Food eaten.
The Digestive Juices thus mix with the food, just as Saliva mixes with Cascaret tablets, dissolving and changing that food into nourishment, as it passes along the channel.

Quite True.
Miss Boston—They say she's extremely haughty.
Miss Tours—I should say so! The last time I saw her she was sailing down the street in—
Miss Boston—Pardon me; why do you use that senseless expression? How could she go "sailing" down the street?
Miss Tours—Easy enough. I saw her last in Venice.—The Catholic Standard and Times.

Monstrous Hyde.
"M. James Hyde," says the Paris Figaro, "the exceedingly rich American who apprentices to the most high society of New York, comes from commanding at Paris a carriage electric. It is to the French industry that M. James Hyde is addressed himself for to have the most comfortable, the most commodious and the most elegant of the vehicles of the city."—Translated by Harner's Weekly.

For that Dandruff

There is one thing that will cure it—Ayer's Hair Vigor. It is a regular scalp-medicine. It quickly destroys the germs which cause this disease. The unhealthy scalp becomes healthy. The dandruff disappears, had to disappear. A healthy scalp means a great deal to you—healthy hair, no dandruff, no pimples, no eruptions.

The best kind of a testimonial—
"Held for over sixty years."

Castoria causes the blood to circulate properly, opens the pores of the skin and allays fever.

Letters from Prominent Physicians addressed to Chas. H. Fletcher.

Dr. A. F. Peeler, of St. Louis, Mo., says: "I have prescribed your Castoria in many cases and have always found it an efficient and speedy remedy."
Dr. E. Down, of Philadelphia, Pa., says: "I have prescribed your Castoria in my practice for many years with great satisfaction to myself and benefit to my patients."
Dr. Edward Parrish, of Brooklyn, N. Y., says: "I have used your Castoria in my own household with good results, and have advised several patients to use it for its mild laxative effect and freedom from harm."
Dr. J. B. Elliott, of New York City, says: "Having during the past six years prescribed your Castoria for infantile stomach disorders, I most heartily commend its use. The formula contains nothing deleterious to the most delicate of children."
Dr. C. G. Sprague, of Omaha, Neb., says: "Your Castoria is an ideal medicine for children, and I frequently prescribe it. While I do not advocate the indiscriminate use of proprietary medicines, yet Castoria is an exception for conditions which arise in the care of children."
Dr. J. A. Parker, of Kansas City, Mo., says: "Your Castoria holds the esteem of the medical profession in a manner held by no other proprietary preparation. It is a sure and reliable medicine for infants and children. In fact, it is the universal household remedy for infantile ailments."
Dr. H. F. Merrill, of Augusta, Me., says: "Castoria is one of the very finest and most remarkable remedies for infants and children. In my opinion your Castoria has saved thousands from an early grave. I can furnish
