

Help! Help! I'm Falling

Thus cried the hair. And a kind neighbor came to the rescue with a bottle of Ayer's Hair Vigor. The hair was saved! In gratitude, it grew long and heavy, and with all the deep, rich color of early life. Sold in all parts of the world for sixty years.

"About one year ago I lost nearly all of my hair following an attack of measles. I was advised by a friend to use Ayer's Hair Vigor. I did so, and a month later I had a beautiful head of hair."—*Mrs. W. J. Snow, Newcomb, Me., Dec. 20, 1898.*

Wise Child.
"But, Tommy," said his mother, "didn't your conscience tell you you were doing wrong?"
"Yes'm," replied Tommy, "but I don't believe everything I hear."—*Philadelphia Press.*

Brutal Criticism.
"So you have been to the musicale. Don't you admire Miss Faddy's execution?"
"No, madam; I am opposed in all its shapes to capital punishment."—*Baltimore American.*

The Only Drawback.
First Girl—You know the older one grows the greater, I think, is a woman's capacity to fall in love.
Second Girl—But the fewer the men.

Incapacitated.
The fire insurance agent was running for the office of tax assessor.
"Such a thing as that would never do! It is contrary to public policy!" exclaimed the taxpayers.
And his defeat was overwhelming.

Couldn't Touch Him.
"I tell you, sir, you're a liar!"
"Sir, if I were a fighting man I'd knock you down for that."
"I'll bet you \$10 I can prove it."
"Sir, I—er—never bet."—*Philadelphia Press.*

A Good Excuse.
Mother—I'm ashamed to think you can't do better in school. Why can't you lead your class?
Willie—Say, ma, you told me you didn't want me ever to be conceded, and I notice when a boy leads the class he always gets conceded.—*Philadelphia Press.*

A loud laugh, an over-vivacious manner betrays a lack of breeding. Copy the williness of form, the quiet poise, which is the great charm of English women, while a viracily somewhat under restraint adds that which is winning and piquante in the manner of our own countrywomen.

"I won't, dear. I'll be standing just inside the door for you."

Backwash is a corruption of "beech-what." The corn is so called from the similarity of the shape of its grains to the mast, or nuts, of the beech.

OLD SORES FED AND KEPT OPEN BY IMPURITIES IN THE BLOOD

Whenever a sore refuses to heal it is because the blood is not pure and healthy, as it should be, but is infected with poisonous germs or some old blood taint which has corrupted and polluted the circulation. These most usually afflicted with old sores are persons who have reached or passed middle life. The vitality of the blood and strength of the system have naturally begun to decline, and the poisonous germs which have accumulated because of a sluggish and inactive condition of the system, or some hereditary taint which has hitherto been held in check, now force an outlet on the face, arms, legs or other part of the body. The place grows red and angry, festers and eats into the surrounding tissue until it becomes a chronic and stubborn ulcer, fed and kept open by the impurities with which the blood is saturated. Nothing is more trying and disagreeable than a stubborn, non-healing sore. The very fact that it resists ordinary remedies and treatments is good reason for suspicion; the same germ-producing cancerous ulcers is a true fact of every old sore, and especially is this true if the trouble is an inherited one. Washes, salves, nor indeed anything else, applied directly to the sore, can do any permanent good; neither will removing the sore with caustic plasters or the surgeon's knife make a lasting cure. If every particle of the diseased flesh were taken away another sore would come, because the trouble is in the blood, and the BLOOD CANNOT BE CUT AWAY. The cure must come by a thorough cleansing of the blood. In S. S. S. will be found a remedy for sores and ulcers of every kind. It is an unequalled blood purifier—one that goes directly into the circulation and promptly cleanses it of all poisons and taints. It gets down to the very bottom of the trouble and forces out every trace of impurity and makes a complete and lasting cure. S. S. S. changes the quality of the blood so that instead of feeding the diseased parts with impurities, it nourishes the irritated, inflamed flesh with healthy blood. Then the sore begins to heal, new flesh is formed, all pain and inflammation leaves, the place scabs over, and when S. S. S. has purified the blood the sore is permanently cured. S. S. S. is for sale at all first class drug stores. Write for our special book on sores and ulcers and any other medical advice you desire. We make no charge for the book or advice.

Capital Punishment.
Capital punishment is still practiced in many countries, though of late years, especially in the United States, it has been made as humane as possible. That creation of the French Revolution, the guillotine, is still used by some countries, and the old executioner's ax deals out justice in Brunswick.
The most humane method of execution, the electric chair, is used only in the United States. Spain employs the garrote, or iron collar, which is tightened until the victim strangles to death; and in Prussia the heads of prisoners are struck off with the sword. The guillotine is used in Bavaria and Belgium; and Russia destroys her criminals by shooting, hanging, and with the executioner's sword. The gallows is the official means of administering death in Great Britain; Austria has adopted the same means; but Chinese criminals are killed by the sword.

Safest.
The sentimental and lovesick youth stood gazing at the round, romantic moon.
"Yes," he confided, "the idol of my heart resides on you hill. To-night I shall serenade the cynosure of my affections as gallants were wont to do when knighthood was in flower. Now, what instrument do you think would be the most appropriate?"
"Well," replied his practical chum, "if I were you I should serenade her with a phonograph."
"What? A phonograph? Why, a phonograph is nothing like as romantic as a guitar."
"Yes, old chap, but you can start a phonograph and then run to the tall timbers before the shooting begins."

Too Much Exercise.
Hop Li had bought a cheap but warranted clock. At the end of a week he returned to the shop from which he had procured his time-piece, with no expression on his face, but with evident bewilderment of mind.
"See go, click, clack! click, clack! all light, true day," he announced to the young woman who waited on him. "I wind all light, samee you say. Nex' day she go click, click—clack! click! click!—clack!"
"I shake her up—so!—down—so!—loud—so! no good. She stop click—stop clack—only go when I shake."
"I say give me one less shake, more click, clack!"

Side Lights on Mythology.
"Sister," asked Melpomene, "why art thou so gloomy?"
"Because," said Calliope, who in her capacity as the muse that presided over eloquence and epic poetry, had done a hard day's work at her desk, reading manuscripts and firing them into the waste basket. "I am oppressed by a foreboding that all my labors have gone for naught. I shall die utterly unknown and my name will perish from the earth!"
Little did she think that the most diabolical and soul destroying instrument ever devised for the purpose of torturing the ears of mankind would send her name screaming and tooting down the ages!—*Chicago Tribune.*

Got Service.
The boarder who was a month behind with the landlady was surprised at the size of the heap of mashed potatoes on the plate the girl had brought him.
He was even more surprised when he found a folded paper in the center of the heap.
But he didn't open it. He knew what it was.
Carefully wiping it with his napkin, he put it in his vest pocket and went ahead calmly with his dinner.
You can't disconcert an experienced boarder.

World's Coal Consumption.
The total consumption of coal in the world is considerably over fifty thousand tons an hour. Of this great quantity about twelve thousand five hundred tons is required to heat the boilers of stationary, marine and railroad engines. The production of pig iron consumes over five thousand tons an hour. The average hourly consumption of coal in households is considered to be about ten thousand tons.

Where "Push" is No Virtue.
A well-known motor-engineering firm in the Midlands at one time held the agency of a certain American car, but owing to stress of business did not sell many. A telegram came one day, "Hope you are pushing our cars." Promptly came the answer back: "Yes, we are, up every hill." The agency has been removed.—*Judy.*

"Give some men rope enough," moralized Uncle Allen Sparks, "and they'll hang a jury."

OREGON STATE ITEMS OF INTEREST

DEER SEASON OPENS JULY 15
Change in Game Laws Not Generally Known by Hunters.

Albany—That not more than 5 per cent of the sportsmen of Oregon know that the open season for deer begins this year July 15, is the opinion of a local hunter. The fact that the legislature changed the deer season has not been known at all in this part of the state and men who always begin deer hunting as soon as the season opens are making no plans to go into the mountains until next month.

According to the new law, the open season for buck deer is from July 15 to November 1. It was formerly from August 15 to November 1. The season for fawn deer remains the same under the new law as it was under the old from September 1 to November 1. These changes in the deer season are embodied in house bill 151, which is recorded on page 341 of the 1907 session laws.

Another change in the deer law is that it is now a misdemeanor to kill dogs chasing deer. It was formerly illegal to hunt deer with dogs and that provision is also contained in the new law. Under the old law many dogs caught chasing deer were shot and killed and the new provision was inserted in order to protect owners of valuable dogs, which would break loose and chase deer without the knowledge of their owners.

Water for Irrigation Next Year.
Ontario—Messrs. Albright and Eggleston, of Portland, Christian Co-operative representatives, have returned from Upper Willow creek. They state work is progressing rapidly on the irrigation project, and that work of survey for the laterals is still going on. The huge reservoir in Cow valley on the line between Oregon and Washington is a vast undertaking and will take a long time to construct, yet it will surely be completed to irrigate thousands of acres of high land in Malheur county.

Funds for Condensing Plant.
Albany—Linn county subscribers to the fund to erect a big milk condensing plant in Albany met last week and perfected temporary organization with Frank J. Miller as chairman and L. L. Swan secretary. A committee, consisting of L. M. Curi, N. H. Ellis, C. H. Stewart, J. B. Wyatt and H. Bryant, was named to prepare and file articles of incorporation. One hundred and twenty-six shares of \$500 each have been subscribed, 4,621 cows listed to supply milk, for the first year and twice that number for the second year.

Salmon Reach the Calapoosia.
Albany—Salmon are reported to have been seen in the mouth of the Calapoosia river, where it enters the Willamette at this city. If salmon are successfully passing the falls at Oregon City and ascending the Willamette a long deferred hope of residents of the upper valley is being realized. In spite of all the contrivances which have been placed in the river at Oregon City to enable salmon to ascend, very few of the fish have ever been seen as far south as this city.

Will Find Klamath Reds Active.
Klamath Falls—The Klamath Indian reservation is a busy place this summer, and Secretary Garfield will find much to interest him when he visits the home of Uncle Sam's wards in the middle of July. At the Klamath agency, where the schools are located, about 40,000 is being expended in improvements. The chief improvements being made are the constructing of a sewerage system and an electric light and water system.

New Clerk in Land Office.
Burns—There is rejoicing among the patrons of the United States land office here over the assurance just received from the department at Washington that a clerk is to be added to the working force with the opening of the office. The work of the office has been badly congested and this will relieve the strain and permit the completion of important transactions which have been awaiting action for some time.

Buy Land for Weston Brick.
Weston—The proprietors of the Weston brickyard have purchased of James D. Gish his addition to Weston, consisting of nearly 10 acres in the lower part of the city. Before making the purchase the brickyard people quietly demonstrated that the soil was well adapted to the making of a superior quality of brick. The price paid was \$2,000.

Ontario Wants New Land District.
Ontario—A petition is being circulated in Ontario and numerous signed asking the government to create a new land district for this section and the appointment of a register and receiver, the office to be located at Ontario or Vale. At present parties having land office business to transact have to go to Burns, a distance of 150 miles.

Clackamas Land Booming.
Oregon City—The large increasing fees of the recorder's office in Clackamas county is a good indication of the healthy growth in the real estate business. The fees of County Recorder Ramsey for June were \$421.01, against \$289.35 for the same month during the previous year.

Murphy Estate Valued at \$70,000
Salem—The will of the late Judge J. J. Murphy, has been probated here. It leaves an estate estimated at \$70,000 to be equally divided between the widow, Elizabeth C. Murphy, and the son, Chester G. Murphy, the latter being named as executor without bonds.

Fruit Box Factory for Weston.
Weston—C. W. Avery, manager of the Blue Mountain sawmill, has gone to Portland to purchase machinery for the equipment of a box factory to be run in connection with his mill. The demand at present is far in excess of the supply with present facilities.

NEW NORMAL REGENTS.
Men Placed on Board Have No Affiliation With State Schools.

Salem—Governor Chamberlain has named the members of the new board of regents who will have control of all state normal schools. The regents are C. E. Spence, of Clatsop, Clackamas county, to serve one year; E. Hofer, of Salem, two years; E. E. Bragg, of La Grange, three years; W. B. Ayer, of Portland, four years; Henry J. Maier, of The Dalles, five years; Stephen Jewell, of Grants Pass, six years.

Not one of these men live in a normal school town, or has any connection with a normal school. It is evident that in making the appointments the governor studiously avoided appointing men who might by past associations, geographical location or political interests, be prejudiced for or against any one of the four normals. Not one of the men is interested particularly in either the University of Oregon, the Agricultural college, or any other state institution. This fact will leave them more free to handle the normal school problem free from other influence.

Spence is a farmer, a Democrat and a member of the executive committee of the State Grange.
Hofer is editor of the Capital Journal and a Republican.
Bragg is county superintendent of Union county and a Democrat.
Ayer is a lumber manufacturer and a Republican.
Maier is a merchant and a Democrat.
Jewell is county judge of Josephine county and a Democrat.

The state board of education, composed of the governor, secretary of state and superintendent of public instruction, are ex-officio members of the board of regents.
Among educational workers in attendance at the session of the State Teachers' association, it was generally remarked that the governor has selected a strong board that will be free to manage the normal schools with a view to the best interests of the state.

Seek Location for Library.
Albany—Albany's public library will be started as soon as a suitable building can be found. Arrangements are complete for instituting it and as soon as temporary quarters are rented the library will be opened. Nine directors have been elected and their election has been confirmed, in accordance with the state laws governing public libraries, under which this institution was formed by the city council. These directors are Frank J. Miller, Mrs. J. K. Weatherford, H. H. Hewitt, Fred P. Nutting, Mrs. H. F. Merrill, Mrs. S. E. Young, M. H. Ellis and Miss Lucy Gant.

Diversified Farming Possibilities.
Freewater—H. Miller, of the State Line, about four miles from Freewater, gives a splendid illustration of intensified farming. Mr. Miller farms about 40 acres, of which five acres are in fruit, 15 acres are in alfalfa and ten acres in potatoes. Five acres of the potatoes are of the Early Fortune variety. The early potatoes are ready for the market, and a Seattle company has written Mr. Miller to contract for the whole output at \$4 per hundred, or \$80 per ton. A commission firm in Walla Walla is also after the consignment.

S. P. Behind Spencer Power Plant.
Klamath Falls—The positive announcement has at last been made that the work being done at Spencer's on Klamath river is the beginning of a large power plant which the Southern Pacific company will complete in the course of a few years. The operations of the workmen engaged on the plant have been rather mysterious and employees who have worked there for six months or more did not know what they were working at or for whom.

Heartbreaking Alternative.
"Arduus, it was a shame to sell that little pony of yours. It had been in the family ever since it was a colt."
"I know it, Turgins. It almost broke my heart to part with Gyp, but my affairs had become so desperate that I either had to sell him or eat him—and I can't stand for horse meat unless I think it's beef."
"But you never gave him away?"
"No, no, my boy. Why?"
"Because the first fellow what picked it wished there was more meat on it."
—*Yonkers Statesman.*

The Wishbone.
"Do you know why they called this the wishbone, pop?" asked the boy who was picking the bone in question, on which there was very little meat.
"No, my boy. Why?"
"Because the first fellow what picked it wished there was more meat on it."
