The fishermen have been enjoying the best summer run that has been known here for many years. The largest day's product was on Saturday last, when over eight tons of fine salmon were purchased by the two companies buying at St. Helens. The largest catch for one boat for a day is said to have been twelve hundred pounds. A few weeks of such work and the boys will all have money in the bank—or to burn.

FAMILY REUNION—On July 21st a family reunion was held on the old homestead of Mr. and Mrs. C. E. Makinster, near Goble. All the children, most of whom are grown men and women with families, were present, together with a few invited guests. All had a merry time. A large table was constructed under two large cherry trees and spread with a delicious dinner. At the noon hour all gathered round the table, and, after posing for a picture, fell to and did full justice to all that was set before them. Beside the old folks there were eight children, four of whom are married: Mrs. Minnie Stehman, oldest daughter and nine year old son Charles of Seattle; Bert Makinster, oldest son, his wife and child, of Reuben, Mrs. Ida Jeffrey, husband and child, of Astoria; Mrs. Bertha Butts, husband and godchild; William, Chesley, Hattie and Clyde Makinster. The invited guests were Mrs. May Miller of Portland, Miss Rose and Ida Lengacher and Thomas Hunter, photographer. Mr. and Mrs. Makinster came to Oregon City in 1875, removing five years later to what is now Goble, where they took up a homested and have since resided.

Miss Dorothy John dislocated her shoulder by falling from a hammock last Monday afternoon. The shock and pain made her hysterical and Dr. Cliff, when she is well, will tell her how he put the joint back in place.

Mrs. E. H. Flagg is spending a week with her daughter in Portland. The hens are scratching up the cucumbers, somebody broke the big sunflower, the beds are unmade, the dishes unwashed, and if it were not for a relative the cow would go dry. What is home without a mother? I told you so.

Mr. and Mrs. E. Hayes, of Heppner, have been visiting relatives in Columbia County during the past week. Mr. Hayes is a sheep man and reports that it is just as hard to get good men in his business as it is in the mills and camps of Columbia county. Sheep herders get at the lowest fifty dollars a month and board, while packers receive as high as $3.50 per day. We think wood is high here, but up in that country it is seven dollars per cord—and slabwood at that.

I have money to loan on approved real estate security.

St. Helens, Oregon.

W. B. Dillard and son Waldon returned from their trip to Tillamook the latter part of last week. The distance is about one hundred miles and they made the trip over in four days, returning in three. They went by way of Washington county, camping and fishing along the route.

Dr. Cliff made a trip to Portland Saturday with his fast launch Evenn and returning brought with him as visitors Mr. and Mrs. Carl Eppley and Mr. and Mrs. Foster. The visitors had a chance to test the qualities of the launch as a seaboat as the river was extremely rough, the waves, according to the steersman, being about ten feet high. At any rate they were high enough to give a spice of danger to the trip and to give the occupants of the boat a good soaking. Mr. Eppley has just returned from China, where he has been engaged in a number of business ventures.

Miss Leona Pinckney, of St. Helens, is a candidate for one of the Portland Journal's scholarships now on. Columbia county people who subscribe for that paper should see that their votes are cast for Miss Pinckney. There is no reason why she should not be one of the winners.

Herrel Throop drove over from Vernonia last Tuesday, having as passengers Miss Fannie Sheldon and Mrs. S. M. and O. Malmsten, who were on their way to the metropolis.

More houses are needed in St. Helens. It is the policy of the St. Helens Quarry Company to employ married men, whenever they can be secured, in preference to single men, the reasonable belief being that men of family will be more reliable than unmarried ones. The Quarry Company is just beginning to operate a plant that will be a very important factor in building up this community. They have orders ahead to run them for eighteen months and there will not be an idle day in the year, provided they can procure men to do the work. In time they will require a hundred homes for their people, and this means the construction of many houses of small cost. Who will be the first to begin the good work?

Mr. Asa Holladay, fruit commissioner for Columbia County, was at the county seat on Saturday last. He informs us that as soon as practicable he expects to begin an active campaign for the extermination of the fruit pests.

Mr. Louis Snyder, of Sauvies Island, was in town Sunday to receive a herd of twenty four dairy cows and their calves, purchased from Hon. E. T. Connell, of Deer Island. $8.50 PUNCTURE-PROOF TIRES ONLY $4.80 PER PAIR

Manufacturer's Price $8.50 per pair. To introduce we will sell You a Sample Pair for Only $4.80

(CASH WITH ORDER $4.65)

NO MORE TROUBLE FROM PUNCTURES. Result of 15 years experience in tire making. No danger from THORNS, CACTUS, PINS, NAILS, TACKS or GLASS. Serious punctures, like intentional knife cuts, can be vulcanized like any other tire.

Two Hundred Thousand pairs now in actual use. Over Seventy-five Thousand pairs sold last year.

Notice the thick rubber tread "A" and puncture stripe "B" and "D," also rim strip "E" to prevent rim cutting. This tire will outlast any other make—SOFT, ELASTIC and EASY RIDING.

DESCRIPTION: Made in all sizes. It is lively and easy riding, very durable and lined inside with a special quality of rubber, which never becomes porous and which closes up small punctures without allowing the air to escape. We have hundreds of letters from satisfied customers stating that their tires have only been pumped up once or twice in a whole season. They weigh no more than an ordinary tire, the puncture resisting qualities being given by several layers of thin, specially prepared fabric on the tread. That "Holding Back" sensation commonly felt when riding on asphalt or soft roads is overcome by the patent "Basket Weave" tread which prevents all air from being squeezed out between the tire and the road thus overcoming all suction. The regular price of these tires is $8.50 per pair, but for advertising purposes we are making a special factory price to the rider of only $4.80 per pair. All orders shipped same day letter is received. We ship C.O.D. on approval. You do not pay a cent until you have examined and found them strictly as represented.

We will allow a cash discount of 5 per cent (thereby making the price $4.65 per pair) if you send FULL CASH WITH ORDER and enclose this advertisement. We will also send one nickel plated brass hand pump and two Sampson metal puncture closers on full paid orders (these metal puncture closers to be used in case of intentional knife cuts or heavy gashes). Tires to be returned at OUR expense if for any reason they are not satisfactory on examination.

We are perfectly reliable and money sent to us is as safe as in a bank. Ask your Postmaster, Banker, Express or Freight Agent or the Editor of this paper about us. If you order a pair of these tires, you will find that they will ride easier, run faster, wear better, last longer and look finer than any tire you have ever used or seen at any price. We know that you will be so well pleased that when you want a bicycle you will give us your order. We want you to send us a small trial order at once, hence this remarkable tire offer.

COASTER-BRAKES, built-up-wheels, saddles, pedals, parts and repairs, and everything in the bicycle line are sold by us at half the usual prices charged by dealers and repair men. Write for our big SUNDRY catalogue.

DO NOT WAIT but write us a postal today. DO NOT THINK OF BUYING a bicycle or a pair of tires from anyone until you know the new and wonderful offers we are making. It only costs a postal to learn everything. Write it NOW.

BASEBALL ON ROCK CREEK—That the true spirit of the National Game is strong in the Nehalem Valley was fully in evidence by the number of people who went up to Ed Webster's place at the ford on Rock Creek last Sunday to see the Vernonia boys do up the P. R. & N. surveyors to the tune of 5 to 3. People came from miles around in wagons, buggies, and on horseback. The game was played in a freshly mown hayfield and despite the stubble—which would have made professional players show up very poorly—the boys gave a very good exhibition of baseball. The game started rather late owing to the fact that the diamond had not been marked out and the players had to prepare it. Then the catcher refused to catch without a mask and one had to be sent for. Every Sunday sees a good game played some where in the Nehalem and everybody is interested in these games. The place where last Sunday's game was played is some six or seven miles from Vernonia and very few people live near, yet the crowd assembled in that hayfield would have made a St. Helens ball game attendance look like fifteen cents. Vernonia and Mist boys are expected to cross bats in the near future.

SCHOOL STATISTICS—From Superintendent Copeland's recently completed report we find that the school population of Columbia County is 2914, as compared with 2724 last year—a gain of 190. There were 101 teachers employed of which only six were males. The average number of months taught was 6.32. The average salary paid females was $45 and males $65. There were only nine male teachers. At $45 per month for 6.35 months the 99 female teachers received an average of $285 for the school year. It would seem to be very poor wages for such important work and yet Superintendent Copeland informs us that Columbia County is ahead of most Oregon counties in this respect. A school population of 2914 in a county where there are so many single men in the camps and mills means a population of at least 10,000.

Humanity and Progress.

The British state—that is, the government of England, Wales and Scotland—now feeds children who have reached school age and are not properly cared for at home. In view of the increase of infant mortality in London and other populous centers it is proposed to care for poor mothers in hospitals supported by the state some weeks before and after the birth of a child. In London alone 120,000 babies under one year of age die annually, and the idea of the hospital is to protect the infants born to poor parents from exposure to cold, impure food and other ills which tend to increase infant mortality. All of this will help the offspring of the poor to survive, whether this class is the fittest or not.

On the other hand, a scientist has recently pointed out the declining birth rate noticeable in England is among the professional and middle classes and that these classes are being steadily re-enforced by recruits from the lower and less intelligent strata of society. The humanitarian measures of the government give direct encouragement to the poor to produce large families. Mothers are cared for, infants looked after during their critical period and children fed as well as educated. Evidently the day of the poor man is dawning in the British isles. There will be Dick Whittingtons of fact as well as of legend, and the future Disraelis and Gladstones may be born to tenement house parents, but in a government asylum and nursed and fed as well as educated by the state.

Bidding For Immigrants.

Although the plan of assisting immigration recently adopted by South Carolina has met with criticism and even official opposition, some system of that kind may be found advisable for the whole country if we want immigrants worth having. Other countries are competing, and they are not particular as to methods.

Last year the emigration from the British islands to Canada was about 40 per cent more than in the previous year. The Australian colonies got a 25 per cent increase in 1906, but the United States received only 20 per cent more than in 1905. Canada and Australia are urgent in seeking immigrants. The South American republics, notably Brazil and Chile, are spending government money liberally to stimulate immigration and are working in Hungary and in Italy through government agents. All of these countries have advantages for new settlers, and there is no disputing the fact that with government encouragement and assistance Europeans may do better north or south of us than they can here. In that case we may soon get nothing but leavings after competing countries have taken their pick.

The Building Boom.

It appears that building activities are not confined to this country. Last year the importations of building wood into the British islands increased 20 per cent over those of 1905. It is sometimes argued that when prices get too high here foreign competition will step in and pull them down. Canada, Sweden and Russia profited by the increased demand for building material in the United Kingdom in 1906.

The boom of building is not a mere spasm. Prosperity everywhere furnishes the means, and new conditions furnish the incentive. Healthier and brighter dwellings and working places are demanded. Man's knowledge is ever improving, and his environment must improve in order to keep pace with the march of ideas. It is a hopeful sign that people are not only building new structures, but insist upon having them better and stronger than heretofore.

Concerning the many and often serious railway accidents of late the Railway Age says that publicity is needed as a cure and complains mildly of the general policy of railroad managers which leads them to conceal all accidents when they can. It suggests that they give out full accounts of all, whether they result seriously or not.

England is reported to be startled at the bold demand of the colonial representatives for freedom for the colonies as independent nations. But in these advanced times parent countries cannot expect flourishing and lusty children to stay tied to the mother country's apron strings.

All that Andrew Carnegie needs to fill his cup of happiness to the brim is the assurance that some day his features will adorn a United States postage stamp of popular denomination.

Cubans are importing cement from this country extensively, an indication that they want something on the island which the West India hurricanes cannot rip to pieces.
