

HAD CATARRH THIRTY YEARS.

Congressman Meekison Gives Praise To Pe-ru-na For His Relief From Catarrh.

CONGRESSMAN MEEKISON RECOMMENDS PE-RU-NA

"I have used several bottles of Peruna and I feel greatly benefited thereby from my catarrh of the head. I feel encouraged to believe that if I use it a short time longer I will be fully able to eradicate the disease of thirty years' standing."—David Meekison.

OTHER REMARKABLE CURES

Mr. Jacob L. Davis, Galena, Stone county, Mo., writes: "I have been in bad health for thirty seven years, and after taking twelve bottles of your Peruna I am cured." Mr. C. N. Peterson, 132 South Main St., Council Bluffs, Iowa, writes: "I cannot tell you how much good Peruna has done me. Constant confinement in my store began to tell on my health, and I felt that I was gradually breaking down. I tried several remedies, but obtained no permanent relief until I took Peruna. I felt better immediately, and five bottles restored me to complete health."

A SINCERE RECOMMENDATION.

Mr. D. C. Prosser, Bravo, Allegan Co., Mich., writes: "Two years ago I was badly afflicted with catarrh of the stomach. I had had a run of typhoid fever, was very depleted. I could find nothing I could eat without causing distress and sour stomach. Finally I came to the conclusion that I had catarrh of the stomach, and seeing Peruna advertised, began to take it. It helped me soon, and after taking three or four bottles I was entirely cured of stomach trouble, and can now eat anything."

Manufactured by the Peruna Drug Manufacturing Company, Columbus, Ohio.

Juvenile Ignorance.

"Paw, why do we have to pay for the water we use? We don't have to buy our air."

"That only shows, my son, that you have never had to pay a gas bill."

Uncle Allen.

"It's a mystery to me," said Uncle Allen Sparks, "that Senator La Follette, when he was counting up the men that control the money of the country, forgot to include Mrs. Hetty Green."

Misstatement.

"You told Titely that the man who lent me \$10 would always have \$10 coming. I demand an apology."

"You're right; I was wrong. I should have said the \$10 would never be coming."—Kansas City Times.

Queen Alexandra possesses a tea service of sixty pieces, each piece being decorated with a different photograph which she took herself in Scotland.

S.S.S. FOR S.S.S. BAD BLOOD

The most important part of the human system is the blood. Every muscle, nerve, tissue, bone and sinew is dependent on this vital fluid for nourishment and strength necessary to maintain them in health and enable each to perform the different duties nature requires. Even the heart, the very "engine" of life, receives its vigor and motive power from the blood. Since so much is dependent on this vital fluid it can very readily be seen how necessary it is to have it pure and uncontaminated if we would enjoy the blessing of good health. Bad blood is responsible for most of the ailments of mankind; when from any cause it becomes infected with impurities, humors or poisons, disease in some form is sure to follow. Muddy, sallow complexions, eruptions, pimples, etc., show that the blood is infected with unhealthy humors which have changed it from a pure, fresh stream to a sour, acrid fluid, which forces out its impurities through the pores and glands of the skin. A very common evidence of bad blood is sores or ulcers, which break out on the flesh, often from a very insignificant bruise or even scratch or abrasion. If the blood was pure and healthy the place would heal at once, but being loaded with impurities, which are discharged into the wound, irritation and inflammation are set up and the sore continues. Bad blood is also responsible for Anaemia, Boils, Malaria, etc.; the weak, polluted circulation cannot furnish the nourishment and strength required to sustain the body, and a general run-down condition of health results. S. S. S. is nature's blood purifier and tonic; made entirely of healing, cleansing roots and herbs. It goes down into the circulation and removes every particle of impurity, humor or poison that may be there, restores lost vitality, and steadily tones up the entire system. It adds to the blood the healthful properties it is in need of, and in every way assists in the cure of disease. S. S. S. neutralizes any excess of acid in the blood, making it fresh and pure, and permanently cures Eczema, Acne, Tetter, and all other skin diseases and eruptions. S. S. S. cures Rheumatism, Catarrh, Sores and Ulcers, Malaria, and all other diseases or disorders arising from bad blood. Book on the blood and any medical advice desired free to all who write

THE SWIFT SPECIFIC CO., ATLANTA, GA.

Your S. S. S., in my opinion, is as good a medicine as can be had; it simply cannot be improved upon as a remedy to purify and enrich the blood and to invigorate and tone up the system. This spring my blood was bad and I was run down in health, and having seen your medicine highly advertised I commenced its use. Today my blood is in fine condition and my general health is of the best. Am filling position as fireman for a large concern here, and if I was not in good physical condition it would be impossible for me to fill the place. Your S. S. S. has been of great service to me and I do not hesitate to give it the credit it deserves.

WM. F. YARDYKE.

Telephone Girl's Romance.
Conscientious Carrie always tried to do her best; Never lost her temper—she was different from the rest; Carrie was a "central," with a voice of sweetest tone, And that is why Miss Carrie has a cottage of her own.—Portland Oregonian.

Out of the Dim Past.
Samuel Woodworth had just written "The Old Oaken Bucket." "Nothing in it!" he muttered as he read it over and reflected upon the probable price it would bring. But posterity evidently found something in it.

For the Housewife.
Some active women who pride themselves in housekeeping seem to forget that the object of keeping house is that human beings may be accommodated in it. Their sole idea seems to be this, that the house may be kept in a certain form and order; and to the performance of the form and order they sacrifice the comfort the house was established to secure.

Aiming and Hitting.
Mr. Kidder—I think a woman's club, to be successful, should aim at something far removed from female suffrage.

Miss Strong—I don't agree with you, sir. That should be its sole object.
Mr. Kidder—Yes, but it's more likely to hit that object if it aims at something else.—Philadelphia Press.

Had Been There.
"I read in a book of statistics that the average woman carries from thirty to thirty-five miles of hair on her head."
"And then she raises the deuce if her husband happens to carry a yard or two of it on his coat sleeve."

Poor Old Sophocles.
"Yes, John is getting quite a reputation as an actor. They gave him one of the leading roles in a play at college."
"John! Why, his enunciation is atrocious."
"But this was a Greek play."—Cleveland Plain Dealer.

His Credit Impaired.
Dinguss—Shadbolt, I haven't asked you for any money for a long time, have I?
Shadbolt—No; you never asked me for any money for a long time. You always wanted it for "just a day or two." That's why you're not going to get any this time, Dinguss. Air feels a little like snow, doesn't it?—Chicago Tribune.

Ignorance of the Rudiments.
"What a singular-looking counterpane!" said the eminent physician.
"Counterpane!" exclaimed his wife. "Yet you are supposed to be one of the greatest authorities in the country on brain diseases!"
"I fail to see the connection."
"That's a crazy quilt, you ninny."

Use for Old Tin.
Old tin is put to a variety of uses. For instance cheap trunks are covered with tin from discarded tin cans and other utensils, the tin having been first cut to desired size and straightened and smoothed out. There are also concerns in different parts of the country which make a business of removing the tin coating from old tin cans and scrap tin.

Weekly Touches.
"Poor Hiram!" sobbed Mrs. Hardapple. "He writes his college life isn't as gay as it is cracked up to be. He says some parts of it are very touching."
"Blamed if I don't agree with him," chuckled Mr. Hardapple, as he greased his boots. "I notice he is always writing touching letters for ten or twenty dollars."

A Surprise.
Teacher—Freddy Fangle, you may give the German name of the river Danube.
Freddy—Danube.
Teacher—Donau! That is right. I am glad you have studied your lesson so well.
Freddy is surprised, but keeps still.

Washington Professor Makes Study of Each Region.
By J. L. Ashlock, Washington State College, Pullman.

During the past year numerous inquiries have come to the State college department of horticulture asking questions which generally can be summed up in the one question: "What kinds of fruit will do best where I live?" This class of queries has given the staff of the state experiment station considerable trouble, since, as stated by Professor Thorber, head of the department of horticulture, unless the staff members know exactly the climatic and soil conditions of the region from which the question came, erroneous information may be given, leading the seeker for information to plant trees not at all adapted to his region.

"Now we have solved the problem," said Professor Thorber, recently. "During the last year we have made a careful survey of the state with reference to the particular varieties of fruits which are adapted to each region. We have classified the lists into 'Western Washington,' 'Inland Valleys,' and 'Upland Valleys.' In this list is included apples, pears, cherries, peaches, apricots, plums, raspberries, prunes, blackberries, gooseberries, currants, strawberries and nuts. Early, medium early and late varieties are given where it is necessary. We submit these lists to all inquirers now, and from a dozen or so good varieties of apples, pears, etc., he may choose as he likes, according to the adaptability of the fruit for his region.

"Another experiment we have in hand is one in which we have selected sixty-five good varieties of apples from the eight hundred or so varieties in the state experiment station orchard, and are sending two varieties of each of the sixty-five varieties to ten farmers or fruitgrowers of Washington. We wish to determine by this experiment how each variety will do in the particular region in which it is tried, and in this way we hope to collect much valuable data concerning the possibilities for new varieties of apples in this region."

GRASSES AND CLOVER.

Possibilities of Its Successful Growth in Northern Idaho

By H. T. French, Director Idaho Experiment Station, Moscow.

Much interest is being manifested in the possibility of growing grasses and clovers in the section about Moscow and other portions of Northern Idaho. This matter is of special interest at this time, for many new settlers are coming into this state from the older states, where these crops constitute a very important part of farm production.

Our experience extends over several seasons and we thought it might be of profit to some to know what is being done in this direction on the experiment station farm.

We have undertaken to establish a seeding of clovers and grasses on a portion of the farm and herewith give a brief account of the results of our work during the past season.

Last April we plowed up ten acres of land on which wheat was grown the year before, and fitted it for the seed by harrowing twice with a fine toothed smoothing harrow. We then sowed broadcast the following mixture, covering six acres, leaving the balance until later, on account of the ground being in a lower portion of the field and too wet to work.

40 pounds common red clover.
6 pounds Alsike clover.
25 pounds orchard grass.
5 pounds meadow fescue.
5 pounds English rye grass.
10 pounds timothy.
4 pounds tall meadow oat grass.

This made 16 pounds of the mixture per acre. The balance of the field was sown to the same combination, at the same rate per acre, except eight pounds of alfalfa seed was added to the mixture in place of the alsike clover and timothy seed.

No nurse crop was sown with the grass mixture. And here is where many farmers make a mistake, by sowing wheat, oats or barley with the grass or clover. It is the experience of the best farmers now that it is not wise to sow a crop of grain with the seeding. The more rapidly growing grain crop takes the moisture away from the tender grass, and clover plants, and when the grain is cut the hot sun burns these tender plants up. The wild oat which is so abundant in the soil of this locality is quite enough of a nurse crop, and some attention should be given to cutting this out of the way when it reaches the proper stage. We cut two crops of wild oats from our field. The first crop made a fair yield of hay. In cutting the wild oats the mowing machine should be set high enough so that it will not cut the clover or young grass.

The last of November, when the yield was last examined, there was a fine stand of clover and of all the grasses sown, so far as we were able to detect them. Much of the clover headed out last season making a growth one foot high or more.

Unless last season was an exceptionally favorable one there is no reason why clovers and grasses should not be grown in the hill lands in this section.

The yield of wheat will not be less when the farmers learn to grow these crops which restore fertility, and the possibilities of diversified farming, with stock as an important factor, will be greatly strengthened.

VARIETIES OF FRUIT.

Washington Professor Makes Study of Each Region.
By J. L. Ashlock, Washington State College, Pullman.

During the past year numerous inquiries have come to the State college department of horticulture asking questions which generally can be summed up in the one question: "What kinds of fruit will do best where I live?" This class of queries has given the staff of the state experiment station considerable trouble, since, as stated by Professor Thorber, head of the department of horticulture, unless the staff members know exactly the climatic and soil conditions of the region from which the question came, erroneous information may be given, leading the seeker for information to plant trees not at all adapted to his region.

"Now we have solved the problem," said Professor Thorber, recently. "During the last year we have made a careful survey of the state with reference to the particular varieties of fruits which are adapted to each region. We have classified the lists into 'Western Washington,' 'Inland Valleys,' and 'Upland Valleys.' In this list is included apples, pears, cherries, peaches, apricots, plums, raspberries, prunes, blackberries, gooseberries, currants, strawberries and nuts. Early, medium early and late varieties are given where it is necessary. "Another experiment we have in hand is one in which we have selected sixty-five good varieties of apples from the eight hundred or so varieties in the state experiment station orchard, and are sending two varieties of each of the sixty-five varieties to ten farmers or fruitgrowers of Washington. We wish to determine by this experiment how each variety will do in the particular region in which it is tried, and in this way we hope to collect much valuable data concerning the possibilities for new varieties of apples in this region."

General Debility

Day in and day out there is that feeling of weakness that makes a burden of itself. Food does not strengthen. Sleep does not refresh. It is hard to do, hard to bear, what should be easy,—vitality is on the ebb, and the whole system suffers. For this condition take

Hood's Sarsaparilla

It vitalizes the blood and gives vigor and tone to all the organs and functions. In usual liquid form or in chocolate tablets known as Sarsatabs, 100 doses \$1.

Its Evolution.
Friend—How did you come to write that "best seller?" The Modern Literary Gent—First I was struck by a thought, I epigramized the thought, sketched the epigram, pinized the sketch, novelized the play and advertised the novel! —Puck.

Unquestionably.
First Stranger—I suppose even your profession has its drawbacks?
Second Stranger—Yes, indeed.
First Stranger—And what is your profession?
Second Stranger—Motorman on a gravity road.

FITS St. Vincent's Dance and all Nervous Diseases permanently cured by Dr. Kline's Great Nerve Restorer. Send for FREE BOTTLE and treatise. Dr. R. H. Kline, 143, 2nd Arch St., Phila., Pa.

Blighted Hopes.
Young Mr. Smith had just named his first born son John.
"That boy," he said, proudly, "will be one of a million!"
But John, when he grew to be a man, moved to Chicago, where he became merely one of 349.

Only Fair.
"Let me show you the suite," insisted the hotel proprietor.
"No," replied the stranger. "I am afraid it is a little too steep for my pocket book."
"Steep? Why, my dear sir, don't you think I mentioned a fair price?"
"Oh, yes, a Jamestown fair price."

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

No Tobacco There.
"Why don't you try one of those tobacco cures on your son?" asked Gaddie.
"That wouldn't have any effect on him," replied Popley.
"Oh! yes, they simply kill all appetite for tobacco."
"But he smokes cigarettes."

Rural Philosophy.
"A crow," said the farmer, reaching for his gun, "is a good deal like an Injun. Sometimes you can make him good by giving him a little trinket."
Thereupon he drew a bead on the bird and gave it a present of small shot besides.

\$100 Reward, \$100.
The readers of this paper will be pleased to learn that there is at least one cured disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving it a permanent strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that fails to cure. Send for list of testimonials.
