TUBBY

Chronic Diarrhoea Relieved

Mr. Edward Henry, with the United States Express Co., Chicago, writes, "Our General Superintendent, Mr. Quick, handed me a bottle of Chamberlain's Colic, Cholera, and Diarrhoea Remedy some time ago to check an old chronic diarrhoea. I have used it since that time and cured many on our trains who have been sick. I am an old soldier who served with Rutherford B. Hayes and William Mc Kinley four years in the 23rd Ohio Regiment, and have no ailments except chronic diarrhoea, which this remedy stops at once." For sale by A. J. Deming, druggist.

BARN FOR RENT—Inquire at this office.

PAPERS GRANTED—At the teacher's examination held at the court house last week the following certificates were granted: First Grade—Kate E. Ronde and Katherine Freeman. Second Grade—Thomas H. Hunter, Goble, Katie C. Baker, Warren; Oscar G. Weed, Vernonia; Lena L. Baker, Warren; Ethel Weed, Vernonia; Gertrude A. Weed, Vernonia; Goldie M. Duncan, Scappoose; Fannie Sharp, Kelso. Third Grade—Christine E. Wilson, Rainier; Harriett V. Bush, Inglis; Lucy M. Howell, Rainier; Carrie P. Ellertson, Ethel M. Barnes, Clatskanie.

Absolutely fairness in weight, as you can see for yourself, is assured all who deal at Wellington's.

LOOK OUT FOR SCAPPOOSE—The Chapman Timber Company has a force of men track-laying near the high flats about eight miles due west of Warren, in section 13 township 4 north range 3 west. Pittsburg is in 5 north, 4 west. The road is being constructed in a first class manner, and from Scappoose to the present point of construction is a better road than the Northern Pacific. The people of the Nehalem Valley, who have been fed on hot air for many years, may find that the Portland and Southwestern Railway will be the first to connect them with the outside world. The distance from Pittsburg to Portland will be about thirty six miles, so that the Nehalem Valley will be within 45 minutes travel of Portland. The road is now doing a small passenger and freight business, making special trips for freight on Tuesdays and Saturdays and carrying passengers every day.

SERIOUS LOSS BY FIRE—The big dairy and hay barn on the Hegele farm at Scappoose, was destroyed by fire last Friday afternoon, together with one hundred and fifty tons of hay, three silos, and considerable farm machinery. The barn was located within about sixty feet of the creamery building, and had it not been for the good work done by the fire fighters it, also, would have been destroyed. The loss is estimated at \$10,000. The cause of the fire is said to have been spontaneous combustion from hay not thoroughly dried when stored. The Hegele's are enterprising dairymen and have been of considerable benefit to the community, therefore their misfortune will be sincerely regretted.

The Methodist Church people at Warren seem to be out of luck. The church and parsonage were so located as to cause a curve in the county road, and a petition was circulated asking that they be moved so that the road could be straightened. At the same time the pastor, Rev. Lew Davies, was given to understand that some provision would be made by the county for a site for the buildings just across the road, and acting on this belief, he signed the petition and moved the church and parsonage to the old road. This had been part of the Noon estate, and when it was abandoned by the county as a road it reverted to that estate. Rev. Davies has just received notice from the Noon people that he must vacate their premises, and now he would like to know where he is at and just what the county is going to do about it, if any thing. It seems evident, no matter who is to blame, that the church people have been badly stung.

Shingles, \$1.95 and \$2.00 per thousand. Wellington, St. Helens.

The ferryboat Tacoma will be withdrawn from the Columbia River as soon as trains begin running into Portland over the new bridge, but its usefulness will by no means be ended. It will be taken to Seattle, and run between that city and the big mills at Port Blakely. Heretofore all lumber from these mills has been barged to Seattle and there loaded on the cars. The big ferry boat will take in the neighborhood of 35 cars, or a full trainload. The empty cars will be taken to the mills, loaded and shipped back to Seattle, whence they will be sent to their destination, thus effecting an immense saving in the handling of lumber.
