It is said that it is the intention of an Idaho municipality to put an apple pie in the corner stone of a large public building. It is to be hoped that this custom will not spread and become epidemic. It will be very well to put portraits of distinguished men with yellow journals and other data in corner stones, but apple pie! Bacteria forbid.

Why Colds Are Dangerous

Because you have contracted ordinary colds and recovered from them without treatment of any kind, do not for a moment imagine that colds are not dangerous. Everyone knows that pneumonia and chronic catarrh have their origin in a common cold. Consumption is not caused by a cold but the cold prepares the system for the reception and development of the germs that would not otherwise have found lodgement. It is the same with all infectious diseases. Diphtheria, scarlet fever, measles, and whooping cough are much more likely to be contracted when the child has a cold. You will see from this that more real danger lurks in a cold than in any other of the common ailments. The easiest and quickest way to cure a cold is to take Chamberlain's Cough Remedy. The many remarkable cures effected by this preparation have made it a staple remedy in every household.
