

# When You Take Cold

One way is to pay no attention to it; at least not until it develops into pneumonia, or bronchitis, or pleurisy. Another way is to ask your doctor about Ayer's Cherry Pectoral. If he says, "The best thing for colds," then take it. Do as he says, anyway.

We publish our formulae. We banish alcohol from our medicines. We urge you to consult your doctor.

## Ayer's

When the bowels are constipated, poisonous substances are absorbed into the blood instead of being daily removed from the body as nature intended. Knowing this danger, doctors always inquire about the condition of the bowels. Ayer's Pills.

**Hard on His Nerves.**  
"Did you find yourself embarrassed while in Europe by your lack of acquaintance with the French language?" "No," answered Mr. Camrox. "I think I suffered less embarrassment than the other folks. I couldn't tell half the time what they were blushing about."—Washington Star.

### COUGHING BURST

BLOOD VESSEL  
Says Danger Avoided and Cures Coughs in 5 Hours.

A writer for the medical press states that coughing is resolvable by the breathing of blood vessels quite frequently. A cough or cold means inflammation (fever) and congestion, and these in turn indicate that the body is full of poisons and waste matter. Simple relief is found in nature's cough medicine, and which, when used in more than good, as they cause more congestion. A tonic-inactive cough syrup will work marvellously and here follows a prescription which is becoming famous for its prompt relief and thorough cures. It relieves the system at the cause, except the consumption. Don't wait for consumption to creep its victim, but begin the treatment which cures some in five hours. Mix in a bottle, one-half ounce fluid wild cherry bark, one ounce compound essence cardui and three ounces syrup white pine compound. Take twenty drops every half hour for four hours. Then one-half to one teaspoonful three or four times a day. Give children less according to age.

**Nothing There Stationary.**  
Drummer—Is there a stationary store at Crow Bend?  
Stage Driver—I couldn't say, pard, that you'd find anything stationary at Crow Bend, because they have a twister in them parts 'most every day what starts things moving, but she's lively, and I'm shore you'd like the place.—Judge.

**HOWARD E. BURTUS**—Assessor and Chemist, Leadville, Colorado. Sweeney, former assessor, Silver Lake, Colo. Sweeney, former assessor, Copper Hill, Mo. Sweeney, former assessor, Leadville, Colorado. Sweeney, former assessor, Leadville, Colorado. Sweeney, former assessor, Leadville, Colorado.

## TWO TRAINS COLLIDE

### Ten Men Killed and 16 Probably Fatally Hurt.

### INJURED DRAGGED FROM FIRE

#### Locomotive Bears Down on Caboose Without Warning—Flames Consume Demolished Cars.

Chicago, Sept. 28.—Ten men were killed and 16 probably fatally injured yesterday morning when a train southbound for Cincinnati on the Pennsylvania road crashed into the caboose of a Chicago, Milwaukee & St. Paul cattle train bound for the stockyards.

Sixteen men were in the caboose of the stock train when the passenger train crashed into it in the railroad yards a few blocks from the downtown station. The engine plowed through the caboose, tearing it to bits and setting fire to the debris.

Six bodies were recovered within a few minutes after the crash, while the flames were eating up the splintered pieces of the demolished car. Sixteen injured were dragged from the burning ruins.

The passenger train known as the Cincinnati special of the Pan-Handle route of the Pennsylvania left the union station soon after midnight. No signals had been given, so far as could be learned, that any other train was on the tracks.

The passenger train increased its speed when at One Hundred and Twentieth street the engineer saw the rear lights of the freight ahead. It was too late to avert a collision. He used the airbrakes and reversed his engine, but the train crashed into the caboose filled with sleeping stockmen, with tremendous momentum.

### PRESIDENT IN MINE.

#### Taft Visits Famous Copper Diggings at Butte.

Helena, Mont., Sept. 28.—Attired in a linen duster, an old black slouch hat and swinging an electric lantern at his side, President Taft was locked in a narrow iron cage and dropped 1,200 feet through midnight darkness into the depths of the famous old Leonard copper mine at Butte yesterday, and had the rare experience of seeing miners at work with a giant drill in a vein of high grade ore that sparkled green with its wealth of mineral. When he had ascended with a whiz after half an hour under ground, the president, blinking in the glare of the noonday sun, was cheered to the echo by the crowd of curious people gathered at the hoist and declared enthusiastically: "I wouldn't have missed it for the world."

It was the president's first visit to the Montana copper district and between the smelters at Anaconda and the mines at Butte, he had a series of interesting experiences. Not the least of these was a thrilling automobile ride over the mountains from Butte to the mouth of the Leonard mine.

### SPANISH ROUT MOORS.

#### Tribesmen, Driven to Dire Straits, Ask Terms of Surrender.

Madrid, Sept. 28.—The War office announces today the complete success of the maneuvers against the Moors. Both Nador and Zetuan have been occupied. At the latter town there was bloody fighting with large bodies of Moors.

The ring around Mount Guruga is now considered almost closed and the position of the Moors is desperate. Kaid Amas appeared before General Marina, the commander of the Spanish forces, yesterday and asked terms of surrender for the tribes entrenched on Mount Guruga. The results of this conference are not known, but it is believed the Moors are ready to submit without conditions.

### Central States Are Shaken.

St. Louis, Sept. 28.—A slight earthquake, which was felt through South-eastern Missouri and in Southern and Central Illinois and Indiana, occurred today. In St. Louis the tremor came at 3:47 o'clock. So far as has been ascertained little or no damage has resulted. The general direction of the shock was west to east, and it was felt most clearly in thinly settled districts. Villages west of St. Louis reported the destruction of a few chimneys and in the west end of this city, the residence district, many sleepers were awakened.

### Western Speed War On.

St. Paul, Sept. 28.—The Great Northern railway yesterday put into operation a daily mail and express train which will cut 11 hours off the present running time between St. Paul and Seattle. Mail from the East will reach Puget sound cities 24 hours earlier. This is claimed to be the fastest long distance train in the world. The new train left St. Paul at 8 o'clock yesterday morning and is due to arrive in Seattle at 6 o'clock Wednesday morning. This action is regarded as an important move.

### Alaska Census in Winter.

Dawson, Sept. 28.—W. A. Mackenzie, of the United States bureau of census, was here recently, en route to Fairbanks to make his headquarters for the thirtieth census. He has three main assistants at Juneau, Seward and Nome, and he will hire a total of 125 men to cover population, mining, agriculture, schools and other statistics during the winter months, giving Alaska credit for all actual residents absent on vacation in the states.

### Mrs. Harriman Takes Her Own.

Goshen, N. Y., Sept. 28.—The simple will of the late E. H. Harriman, bequeathing his vast estate to his widow in toto, without reservation or condition, was admitted to probate this afternoon. Mrs. Harriman qualified as executrix and became the sole director of the railway magnate's millions, assuming her position as one of the richest women in the world.

### HILL GIVES PRIZES.

#### Railroad Builder Helps Dry Farming Congress With Cups.

Billings, Mont., Sept. 27.—Five all year cups, aggregating \$220 in value, will be features of the list of prizes offered by James J. Hill, chairman of the board of directors of the Great Northern railway, for best exhibits at the International Dry Farming exposition which will be held at Billings, Montana, October 25-29, in connection with the Fourth Dry Farming congress, October 26-28. George J. Ryan, general industrial agent of the Great Northern, has sent to the headquarters of the congress at Billings a list of the prizes and the conditions under which they will be awarded. The aggregate value of all the prizes is \$1,000. This award by Mr. Hill is similar to that made by him in the case of the Omaha Corn exposition, with the exception that the cup feature is made a special one in favor of the Dry Farming congress. In regard to the cash prizes, Oregon, Washington and Montana are given the same list, thereby eliminating the competition of one state against another where conditions for certain crops might be better in one state than the other.

### BURNING LAKE STUDIED.

#### Adventurous Spirits Go into Crater of Active Volcano.

Honolulu, Sept. 27.—L. M. Hale, J. Reynolds, and Ernest Moses, a photographer, descended today into the pit of the crater of Mount Kilauea, remaining half an hour on the edge of a burning lake of lava and fire. This is the first time that this feat has been accomplished.

The members of the party ventured almost to the rim of the seething lake and attempted to take photographs. The heat was intense and at times the adventurers walked over partially molten areas. After completing their observations, they returned safely to the rim of the crater, where half a dozen friends had witnessed the descent.

Kilauea is one of the largest active volcanoes in the world, on the east slope of Maunaloa, Hawaii island. Its altitude is 4,400 feet and the circumference of its crater is about nine miles, with a depth varying from 700 to 1,100 feet, depending upon the level of the molten lava. Violent eruptions occurred in 1797, 1844 and 1866, and since the latter date there have been several outbreaks of less severity.

### ENGINEERS TO YIELD.

#### Settlement of Miners' Differences in Butte in Sight.

Butte, Mont., Sept. 27.—Although no definite statements have yet been made by either side, it developed late tonight that there is plausible prospect that the differences existing between the Brotherhood of Stationary Engineers No. 1 and the Butte Miners' union may be settled, and the miners will return to their work at the various properties before tomorrow morning.

It is known that certain overtures have been made to the engineers by the officers of the miners' union, and it is quite probable the engineers will make certain concessions which will be acceptable to the miners. Whether the concessions will be permanent, and whether they will involve a return of the seceding engineers to the Western Federation of Miners, it was impossible to ascertain.

The adjustment will be reached, it is believed, without bringing the mining companies into the controversy, either as arbitrators or because of their influence, and it is highly probable that there will be nothing for Charles Moyer, president of the Western Federation of Miners, to settle when he arrives.

### Omaha Strike Nears End.

Omaha, Sept. 27.—Chances of ending the streetcar employes strike seemed favorable tonight. President Wattles, of the car company, after a meeting with the municipal officials tomorrow, will make a plain statement of what conditions would be acceptable to the company. The striking employes, he says, will be given an opportunity to accept his conditions. In a disturbance just before the cars stopped running for the day, James Murphy, a conductor, was knocked down and seriously injured.

### Court Upholds Rate Act.

Lincoln, Neb., Sept. 27.—The Nebraska Supreme court today upheld the Sibley rate act, which cuts express rates in this state 25 per cent. The decision is the first ever entered against express companies. The act was passed in 1907, and has been in court ever since. It has been in force experimentally for 16 months under a temporary injunction, and the actual operation of the law was the chief thing that led the court to the opinion that the law was valid and was not confiscatory. Five companies are affected.

### Launch Sinks, 80 Drown.

Victoria, B. C., Sept. 27.—Mail advices from the Orient tell of a ship disaster on the West coast of South China, involving a loss of 80 lives. The launch Wo On, from Weichu for Ho Yuen, on August 11 capsized three miles from her destination. The accident was caused by the strong current. Twenty of her 100 passengers were saved by swimming and by clinging to wreckage. The Chinese authorities at Weichu chartered a steam launch, which proceeded to the scene to recover the bodies of the victims.

### Madrid Denies Defeat.

Madrid, Sept. 24.—The government is either unwilling or unable to give a statement of the Spanish casualties in the latest fighting with the Moors in Morocco. The news of a Spanish defeat received at Paris is discredited here, and the government declares the Spanish victory is complete. It is announced that the tribesmen are expected soon to ask for peace. It is known that the loss has been heavy. It is said 400 were killed on each side.

### Johnson's Will is Found.

St. Paul, Sept. 27.—It was learned today that Governor Johnson had left a will bequeathing all his estate, which probably will aggregate \$25,000 to his widow.

## FARMERS CORNER

When Hayting is Done.  
There's a smile of relief and a spirit of fun  
Comes over the farmer when hayting is done;  
With his haylofts all swelling with sweet-scented hay  
His smile is as cheery as sunshine in May.  
The summer's half over, and out in the field  
He sees the approach of a bountiful yield;  
As tall as his hat is the golden-topped corn,  
Which waves its long arms in the breeze of the morn.  
As fair and as fragrant as gardens of old  
Are his fields with their stubble as yellow as gold.

With his barn full of hay and his bedding stacked high,  
A smile on his face and a gleam in his eye;  
The cattle provided with winter rest,  
While apples and pumpkins are ripening fast.  
There's a smile of relief and a spirit of fun  
Comes over the farmer when hayting is done;  
The turnips are growing, the melons are prime,  
The harvest approaching, his bounteous time.

### Cultivation of Corn.

At the several experiment stations corn has received more than its share of attention, and many experiments have been made in order to learn how to derive the largest yields and to grow the crop most economically. Opinions differ, however, as climate, variety and soil are factors governing every crop. The Indiana station found that the best results were obtained by planting seed in May. It has been shown that the greatest average yield of both ears and stocks have been obtained when the stalks stood about twelve or fourteen inches apart in the rows. Thick planting, however, reduces the size of the ears, and the percentage of grain, but thick planting has, in dry seasons, produced the heaviest yield of stalks and the highest yield of ears. So far as depth of cultivation is concerned, the yields, when corn was cultivated one, two and three inches, have been equal. In continuous corn culture heavy applications of fresh horse manure have not been profitable, but the effect of a very heavy application of manure has been noticed for many years. There does not seem to be much difference in yields due to any particular implement used, while hill and drill plantings of corn have produced the same average yields. The "checking" of corn is still the most popular and profitable mode of growing the corn at the least cost of labor. The results at one station may not correspond with those obtained elsewhere, but where the work has extended over a number of years the results should be accepted as important, if not conclusive.

### Handy Barnyard Scraper.

shod with a piece of iron or steel, as shown; moreover, it will do good work without the iron. The scraper must be at least 4 feet from scraper, to allow for load, and to keep same from under the horses feet. A very large barnyard may be cleaned in a short time, and several loads of manure saved. Simply drive the load where wanted. Lift scraper up by the handles, leaving load, and repeat the operation.

### Secure in Calves.

A stockman claims that when calves 3 or 4 years old become sick and die with scours it is due to indigestion, apparently, and yields to treatment with pepsin if taken in time. A teaspoonful twice a day given in a little warm milk after feeding will cure it, and if given when the calf is born, and continued for a few days, will prevent it. The pepsin is the common kind sold in drug stores, and can be purchased by the pound.

### Electric Agriculture.

William Low of Scotland will experiment on a large scale with the application of electricity to agriculture. About twenty-three acres, divided in a number of fields, will be utilized for this purpose, each field including a non-electrified or controlled plot for the purpose of comparison. A network of wires will be run over the fields at a height of about 16 feet from the ground. The poles will be put 200 feet apart one way and 300 feet another way. By means of transformers the voltage for the network will be raised to 100,000.

### The Asparagus Butte.

The best remedy is to cut the shoots soon as they appear above ground, as the beetle attacks the tips. Many persons prefer the green tops of asparagus, but the best stalks are those cut when the tips are white, as they are then tender from tip to butt.

### Blankets were first made in England in 1705 by Thomas Blanket.

### Treating Horse Corns.

Dr. A. A. Holcombe, inspector of the United States bureau of animal husbandry, says of treating horse corns: "As in all other troubles, the cause must be discovered if possible and removed. In a great majority of cases the shoeing will be at fault. For a sound foot, perfectly formed, a flat shoe with heels less thick than the toe and which rests evenly on the wall and proper is the best. In flat feet it is often necessary to concave the feet as much as possible on the upper surface so that the sole may not be pressed upon. If the heels are very low the heels of the shoe may be made much thicker. If the foot is very broad and the wall light toward the heels a far shoe, resting upon the walls, may aid to prevent excessive tension upon the soft tissues when the foot receives the weight of the body. A piece of leather placed between the foot and shoe serves largely to destroy concussion, and its use is absolutely necessary on some animals to enable them to work. Among the preventive measures may be mentioned those which serve to maintain the suppleness of the hoof. The dead horn upon the surface of the sole not only retains moisture for a long time, but protects the living horn beneath from the effects of evaporation. For this reason the sole should be pared as little as possible.

### Milk Contamination.

There are a hundred and one places where milk can be contaminated from the time it is drawn from the udder till it reaches the table in the form of sweet milk, cream or butter. First, a great deal of bacteria, impurities and disease germs get into the milk at the barn or lot in which the cows are kept. Second, a great many more of these owe their existence in milk to the attendant and the place in which the milk is kept. The moment the cow shows signs of being ill, or when even a slight eruption is noticeable, a person may contract disease by partaking of her milk. Impure water is another way in which milk is contaminated. If the cow is compelled to drink out of a mud hole, filled with disease germs, she cannot help but drink a large number of those germs into her system, some of them being sure to reach her milk. Milking the cow into an open pail when the barn is filled with dust, and from which there hangs an untold number of dirty cobwebs, or milking her in an offensive smelling lot, where the filth is ankle deep, or milking a cow whose udder, tanks and legs are covered with dirt and filth—in such cases it is impossible to avoid contamination of the milk. It is believed that more disease germs are given the human family through milk than are given in any other agency; and we also believe that less attention is paid to the care of milk than to any other food consumed upon the table.

### Wilkens is the most absent minded cuss I ever met.

"How so?"  
"Why, the last time he got into the barber's chair he pinned the newspaper around his neck and began to read the towel."—Philadelphia Record.

### You Can Get Allen's Foot-Powder FREE.

Write Allen S. Olmsted, 10 Bay St., N. Y., for a free sample of Allen's Foot-Powder. It cures sweating, hot, swollen, itching feet. It makes new or tight shoes comfortable. It cures corns, ingrowing nails and bunions. All drug stores sell it. Don't accept any substitute.

### He Must Slip Some Time.

Mrs. Crawford—You must love your husband dearly if you save all the letters he sends you while you're in the country.  
Mrs. Crabshaw—I'm keeping them for comparison, my dear. I'm sure to catch him in a lie.—Judge.

### Wilkens is the most absent minded cuss I ever met.

"How so?"  
"Why, the last time he got into the barber's chair he pinned the newspaper around his neck and began to read the towel."—Philadelphia Record.

### Every Man Read This

The treatment is said to have acquired a wonderful reputation throughout the East, owing to its peculiar propensity to fortify the nerve force and generate heat, and a constant personal magnetism, so essential to the happiness of every normal human being. It is claimed to be a blessing to those who are physically impaired, gloomy, despondent, nervous, and who have trembling of the limbs, dizziness, heart palpitations, cold hands and feet, insomnia, fever without cause, timidity in venturing and general inability to act rationally as others do. Also of vast benefit to writers, professional men, late hours and over-indulgence in wine, liquors, etc.

In preparing the treatment of home remedy, we use great care of another's trouble, while the ingredients are much used in filling various prescriptions, so that even the purchase of them separately need occasion no difficulty.

If the reader desires to try it, get three ounces of ordinary syrup saccharilla compound, and one ounce compound fluid balsam; mix and let stand two hours; then get one ounce compound essence cardui and one ounce compound essence of blue and orange; mix all together, shake well and take a teaspoonful after each meal and at night.

This contains no opiates whatever, and may also be used by women who suffer by their nervous and delicate constitution of prompt and lasting benefit.

### Pasturing Sheep.

Some writers claim that sheep ought not to be pastured on land more than one year before it is plowed and reseeded, owing to parasites, but it has been shown that sheep have been kept free from parasites by the use of tar, turpentine and salt. Bore 2-inch holes in a pine log, fill with salt and smear tar around the top, and sheep will tar their noses while eating salt. Sheep soon learn to eat tar. One sheep raiser keeps it mixed with turpentine and salt, where it is accessible at all times. About one-half pint of turpentine to one peck of salt is the proper proportion.

### Electric Agriculture.

William Low of Scotland will experiment on a large scale with the application of electricity to agriculture. About twenty-three acres, divided in a number of fields, will be utilized for this purpose, each field including a non-electrified or controlled plot for the purpose of comparison. A network of wires will be run over the fields at a height of about 16 feet from the ground. The poles will be put 200 feet apart one way and 300 feet another way. By means of transformers the voltage for the network will be raised to 100,000.

### The Asparagus Butte.

The best remedy is to cut the shoots soon as they appear above ground, as the beetle attacks the tips. Many persons prefer the green tops of asparagus, but the best stalks are those cut when the tips are white, as they are then tender from tip to butt.

### Blankets were first made in England in 1705 by Thomas Blanket.

# CASTORIA

The Kind You Have Always Bought has borne the signature of Chas. H. Fletcher, and has been made under his personal supervision for over 30 years. Allow no one to deceive you in this. Counterfeits, imitations and "Just-as-good" are but experiments, and endanger the health of Children—Experience against Experiment.

## What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is Pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. It cures Diarrhoea and Wind Colic. It relieves Teething Troubles, cures Constipation and Flatulency. It assimilates the Food, regulates the Stomach and Bowels, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

### The Kind You Have Always Bought Bears the Signature of

In Use For Over 30 Years.

THE CENTRAL LABORATORY, 27 MURRAY STREET, NEW YORK CITY.

### The Safe Side.

"May I ask you a question?"  
"Sure, stranger."  
"Why is everybody in this section mixed up in a feud?"  
"Well, nobody keeps to take chances on being an innocent bystander."—Louisville Courier-Journal.

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

Belittled by Comparison.  
The Shah of Persia was asked if a pension of \$25,000 would be satisfactory.  
"And with Mrs. Howard Gould getting \$26,000?" he queried, peevishly. "Not on your tinny tin."—Philadelphia Ledger.
