MOVING IN—James Muckle & Son are moving into their new store, and just as soon as possible they will announce through the columns of the Mist the formal opening of one of the most complete and up-to-date commercial institutions in the State outside of the larger cities. The building is in itself a credit to the community, and the interior furnishings of the store are unequaled in any city of the State outside of Portland. There are three store rooms, the largest of which will have a joint occupancy of groceries and dry goods. One room, which has been "decked" for the purpose, will be used for furniture, and another for flour, feed, etc. The main room has every convenience for keeping goods clean and pure. The side occupied by dry goods, etc., has no open shelves, every portion of it being glass-covered. The front and sides of the main store are occupied by plate glass show windows. It is the intention of James Muckle & Son to make their store the great central trading point for this section, and to carry a stock of goods so large and varied, and at such reasonable prices that there will be no inducement for any one living in Columbia County to go elsewhere for their supplies. They will pay special attention to their ready made clothing and shoe department and will handle the best goods in these and all other lines. Watch for their advertisement in the Mist, as you will save money by so doing.

Here is the way the papers will write up weddings ten years hence: "The bride looked very well in a traveling dress, but all eyes were centered up on the groom. He wore a dark suit that fitted him perfectly and in his dainty glowing hands he carried a small rose. His curly hair was beautifully done, and a delicate odor of hair oil of the best quality floated down the aisle as he passed. The young people will miss him now that he is married. He is loved by all for his many accomplishments, his tender grace and his winning ways. The bride commands a good salary as bookkeeper and the groom will miss none of the luxuries to which he has been accustomed. A crowd of pretty men saw him off at the depot.

BASEBALL

With the defeat of Clatskanie last Sunday the St. Helens Baseball team closed the most successful season ever enjoyed by a nine at this place.

The following teams were defeated during the season: W. M. Co., Sunnyside Colts, Gold Seals, Ridgefield, Dilworth's Derbies, O. K.'s, Rainier, Peoples Clothing Co., Portland Gun and Bike Co., Lents, Woodland, Moyer Clothing Co., St. Johns and Clatskanie.

The following are the only teams that got the best of the locals: Willamettes, better known as the M. A. C. Rainer, Kalamia, Portland Gun & Bike Co., and Ridgefield.

Several of these teams were played a number of times, making in all 25 games played, of which 17 were won by St. Helens as against 8 lost.

Financially the season has been fairly good. The expenses of the nine have been pretty heavy, and the enclosing of suits cost between \$400 and \$500. After paying all bills, the nine came within \$13 of making both ends meet. Saturday night they give a dance at the Acme Hall, to square things up.

One of the big draw backs to fast play this year has been the poor condition of the diamond, and in order to secure the funds necessary to have it in good shape

for next season a series of dances will be given this winter.

Those who contributed to the teams success are, first, Manager Frank Wilkins, who has lost many an hour's work for the national game, and the players for the year are: Brakke, Austin, McDuffee, Lafferty, Laws, Dupuis, Ballagh, Perry, Flagg, Quinn, Curtis and Gaffney.

C. L. Starr, Secretary of the Board of State Tax Commissioners, is in St. Helens this week on official business.

ST HELEN SCHOOL NOTES

This is the fifth week of school. Mrs. Dillard was a recent visitor. Will the other members of the board do likewise?

The children of the third and fourth grades have been equipped with a troupe of puppets and are working on South America.

We just purchased eighteen beautiful and instructive pictures to be used for decorative purposes. They are well framed and durable, and will be a permanent adornment to our walls.

We have employed Mr. J. S. Watson to put ventilators in our windows, as he has already made a series of acceptable improvements to our building.

Since we can not afford a furnace we are going to ask the directors to provide jackets for the stoves.

With the addition of eight new windows our building is now properly lighted. Our new room is fully equipped and running full capacity.

There is a congestion in the primary department to the tune of 47.

The enrollment at present is 150, or forty-four per cent of an increase as compared with this time a year ago. There are 47 enrolled in the primary department in charge of Mrs. Quick, 36 in the intermediate department under Miss Philip; 27 in the grammar grade, under Mrs. Reel; and 27 in the advanced department, in charge of the principal.

We have added 48 new seats, 2 teachers' desks, 2 teachers' chairs, 2 new stoves, dictionary, and many other articles of apparatus during the month of September.

We extend a cordial invitation to our patrons and friends to call and inspect the work being done.

The British officers who are trying to make the imprisoned suffragettes eat against their will are entitled to universal sympathy. An obstinate woman is harder to deal with than a balky horse.

The Post Office department proposes to promote the good roads movement by withholding the benefits of the rural delivery in localities where the roads are bad. This is the right kind of taxation.

Ensilage is being used more and more for general farm stock, being fed to some extent to the calves, the market steers and the horses. It probably requires a little higher grade of skill to manage a farm with the silo system. There is room for judgement in putting up the silo, in handling the crop and in the silo, in the way of its management, winter and summer and the right plan of feeding. There is considerable to learn for the farmer who has always practiced the hay, grain and root system. Yet the experience of those who have made the change seems to indicate that there is no need of making serious mistakes even the first year, while the new system nearly always gives satisfaction under the circumstances mentioned. Perhaps not every dairy farmer needs a silo, but it can not be denied that a great many more silos are needed than have yet been put up.
