THRONGS COME TO SEE MUNYON

Surprising Number of Visitors Shows Interest in Expert.

Local Folk Testify—Stomach Trouble Conquered and Rheumatism Pangs Overcome.

One of the most remarkable features about Prof. J. M. Munyon is the extraordinary amount of attention he has attracted. Here and all over the country, the immense crowds that have been flocking to see him, and the large quantity of mail he receives daily at his headquarters, Munyon's Laboratories, 53d and Jefferson Sts., Philadelphia. He receives mail and visitors from ever city in the United States and Canada. Most notable is the fact that rich and poor come to him alike, and a few hours spent at the side of the physician is a most interesting study in human nature.

Many remarkable cases of relief secured were related at the store this week.

One was that of a man who had suffered from indigestion and stomach trouble for more than ten years. He said:

"I think I had one of the worst cases of stomach trouble on record. I could not digest anything I ate. Food fermented in my stomach and formed gas, which passed out in the abdomen and up under my heart, and at times made me suffer so badly I expected to die. I had intense headaches and frequent attacks of dizziness, and I grew short of breath when I attempted to walk up stairs. I was also much constipated. I came here a short while ago and took Munyon's full course of stomach treatment. Now I must admit I feel like a new man. I can eat anything I want with no distress afterward, and all of the other symptoms of my trouble have disappeared. I notice particularly that my head is much clearer and my brain works better. I am full of ambition and energy and enjoy life hugely. I can never tell how glad I am that I had the good sense to try this Munyon treatment."

Another enthusiastic visitor was a woman who declared that her mother had been relieved of rheumatism in a most remarkable manner. She said:

"My mother was flat on her back in bed with rheumatism, sciatic, muscular and inflammatory. Doctors had pronounced her case almost incurable and we had about given up hope of her ever being able to walk again. I procured a treatment for her from one of these Munyon doctors, and today she is able to get about the house with perfect ease and can go out doors, and in fact, do anything that a woman of her age might be expected to do. The rheumatic pains and inflammation have entirely disappeared. I think this Munyon treatment is a positive wonder-worker."

Letters addressed to Prof. J. M. Munyon Personally, Munyon's Laboratories, 53d and Jefferson Sts., Philadelphia, Pa., or callers who apply at that address, will receive free medical advice. There is not a penny to pay for the fullest and most painstaking medical examination. You are made to feel, whether by personal interview, or letter, that the advice is absolutely free and you are not under any obligation to follow it.

Artificial Jewels.

Rubies, sapphires and amethysts are being made artificially in London, and are of such excellent quality that only experts can tell nature's products from those put together in a crucible in Old Bond street, London, England. The gems are not entirely artificial, for they are made from the minute chips that accumulate from real stones while they are being cut. These chips in case of rubies, are ground to a fine powder, and this powder is poured into a crucible, where it is subjected to an intense white heat. In the course of half an hour the powder has has become a solid stone again. It is then cut and mounted, and except by the expert cannot be distinguished from the natural jewel. In much the same way sapphires are made. Pearls, too, are built up by a series of processes which result in a gem which does not require polishing.

FOLLOWING THE STYLE.

A story is told of an Ohio farmer who was greatly worried over a bunch of likely shoats which he was fattening for market. Despite the excellent feed and care given them, the pigs did not take on flesh, although those of his neighbors fattened rapidly on similar rations. The pigs grew upward but not sidewise. Suddenly he discovered a strange thing. After giving them their breakfast one morning, he followed the pigs to a distant part of the field, where he saw the shoats performing a gymnastic exercise with a white pig, the scrawniest of the lot, playing instructor. The farmer promptly separated the white pig from his brothers, and he declares they took on flesh rapidly after that.

Peasant Proprietors of Jamaica.

In Jamaica 75 per cent. of the 155,051 landed properties are valued at less than $200 each. Nearly all of these small holdings are owned by negroes who live chiefly on salt fish and on fruits and vegetables, especially yams grown by themselves. Being able to live in this manner with little exertion these peasant proprietors are averse to entering into contracts to labor by the year or even by the month. Hence, in spite of the fact that ninety-five per cent. of the 862,000 inhabitants of Jamaica are negroes (including mulattoes), it is necessary to employ East Indian coolies on the larger sugar and banana plantations, on which there must be a certain proportion of laborers who may be relied upon for steady work at all times.

AN INGENIOUS DEVICE.

A Wisconsin man has invented an ingenious device to hold a cow's tail while milking. He was driven to it after years of suffering, from being swiped across the face with a cow's muddy tail while milking. The machine is simple and quickly fixed and prevents the cow from switching her tail and thus disseminating filth and germs that get into the milk.

The Swiss Guard.

The pope's bodyguard is called the "Swiss Guard," because they are natives of Switzerland. The guard came into being in the reign of Pope Julius II., who asked his friend Peter von Hertenstein, canon of Lucerne cathedral, to send him 200 Swiss men at arms to protect his person. The assembly at Zurich consented to the enlistment of the men, and in January, 1506, the guard, commanded by a young nobleman, Caspar von Silinen, entered the Eternal city. In the 400 years of its existence the guard has made an honorable record. They fought well when fighting was necessary, but of late deadly weapons have been laid aside and the function of the body now is to act as a guard of honor to the pope.

The Most Ancient Ball Game.

Polo is the most ancient of all games with stick and ball, and probably hockey, golf and cricket are but modifications of it. The earliest records of the game are Persian, and date back six hundred years before Christ. In India it seems to have been known for centuries before the British occupation, yet it rose into favor only some half a century ago, when the English residents began to practice it. The game was introduced into England by the officers of the Tenth hussars about 1862, but at that time the players used hockey sticks and billiard balls. It was an officer of the Thirteenth hussars who drew up the rules and regulations, which changed polo from a wild, skill-less game into a scientific sport.

WIT and HUMOR

WAS IN DELICATE POSITION

Man Admitted to Theater on Pass Reluctant to Express Disapproval Like Rest of Audience.

The play was an execrably bad one, and the company playing it was even worse. When the curtain fell on the first act, sounds of marked disapprobation were heard from all parts of the house. One man alone sat quiet.

At the close of the second act a perfect tornado of moans, cat-calls and hisses broke out. Still the man sat unmoved. At last a man sitting in the next seat turned to him and said:

"Pardon me, but are you not disgusted with this wretched play?"

"I am, indeed," heartily concurred the silent one.

"Then why don't you signify your displeasure like the rest of us?"

"Well, you see, it's this way with me. I am here on a free ticket, and as I am getting something for nothing, I hardly feel justified in expressing my disapproval; but I'll tell you what," he concluded with emphasis, "if this confounded play gets much worse I am going out to the box office and buy a ticket, and then I will come back and hiss like the rest of you."—Metropolitan Magazine.

After the Facts.

As a small boy was standing on one of the best library chairs and clawing with his grubby hands some of the choicest bindings in the bookcase, his progenitor entered suddenly and cried rather sharply: "What are you doing at that bookcase, Wilfred?"

"Trying to find the history of the United States, father."

"What for?"

"Why, Joe Billings, at our school, says Mike Donlin played with the Giants year before last, and I say he didn't."

EASY.

The Soubrette—Why is a campaign orator like a schoolbook publisher?

The Comedian—Easy. They are both spell-binders.

To Tell the Truth.

Boston girls are not all cold.

There are women in Chicago who have small feet.

There are a few native born Americans in St. Louis.

Also in Milwaukee.

There are a great many southern people who don't say "Suh" and "You all" for the singular "You."

We are personally acquainted with several Georgians who are not colonels.

Lost.

"I spent more than $5,000 on my daughter's voice. Now she has gone and got married, and I suppose she will never think of trying to sing again."

"It is too bad."

"Yes. The money would have kept her and her husband in fairly comfortable circumstances for nearly a year."

Feels Badly.

"A guilty conscience needs no accuser," observed the moralizer.

"That's so," assented Deacon Flimmer. "When a pillar of the church secretes a quart bottle of whisky in his hip pocket he imagines he looks like a hunchback."

Wasted.

Mrs. Finefeather—Are you taking your husband abroad this year?

Mrs. Benton—No, I decided last year when he insisted upon speaking of the Venetian gondolas as canal boats that the real charm of Europe is lost upon him.

Millionaire's Philosophy.

"But, doctor, do you really believe that it's harder than going through the eye of a needle for a rich man to enter heaven?"

"That is what the good book tells us."

"Then what's the use of trying?"—Exchange.

No Help.

A St. Louis traveling man, making his first trip through North Dakota, woke up one May morning to find the ground white with snow.

"For Heaven's sake," he asked the hotel clerk disgustedly, "when do you have summer out in this God-forsaken country?"

"I don't know," replied the clerk, "I have only been here eleven months."—Success Magazine.

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

Easy Way Out.

The day was sultry, the spectators were restless, and the judge irritable.

"The next person," he said, "that disturbs the order of this court will be sent home to stay."

"Hurrah! Hurroo!" yelled the prisoner on trial, jumping up and down in the witness box.—Success Magazine.

The Beautiful Women of Today.

It is a satisfying reflection that the fame of the noted beauties of the day will go down to posterity not as the artificially bedecked and painted heroines of old, but conspicuous and celebrated by reason of their splendid manifestation of health, of youth, of comeliness.—Ladies' Field.

Work in Harmony.

In Brazil monkeys and parrots not only roost in the same trees but work for mutual benefit. The parrots gnaw the big nuts loose from the tree, let them fall in order to crack them and the monkeys tear the husks asunder, gather the nuts and divide them with the parrots.

Be Honest.

Honesty is also one of the fundamental principles it never pays to break. If to be a good fellow means you are to sneak, or steal, or lie, then you dig a pit into which one donkey certainly will fall, and his name will be spelled just like yours.

Remedies are Needed

Were we perfect, which we are not, medicines would not often be needed. But since our systems have become weakened, impaired and broken down through indiscretions which have gone on from the early ages, through countless generations, remedies *are* needed to aid Nature in correcting our inherited and otherwise acquired weaknesses. To reach the seat of stomach weakness and consequent digestive troubles, there is nothing so good as Dr. Pierce's Golden Medical Discovery, a glyceric compound, extracted from native medicinal roots—sold for over forty years with great satisfaction to all users. For Weak Stomach, Biliousness, Liver Complaint, Pain in the Stomach after eating, Heartburn, Bad Breath, Belching of food, Chronic Diarrhea and other Intestinal Derangements, the "Discovery" is a time-proven and most efficient remedy.

The genuine has on its outside wrapper the Signature R. V. Pierce M.D.

You can't afford to accept a secret nostrum as a substitute for this non-alcoholic, medicine OF KNOWN COMPOSITION, not even though the urgent dealer may thereby make a little bigger profit.

Dr. Pierce's Pleasant Pellets regulate and invigorate stomach, liver and bowels. Sugar-coated, tiny granules, easy to take as candy.

Still in Funds.

Joe Rank of Atchison tells this story: "A colored man was charged with stealing $9.70. His lawyer, after a long fight, succeeded in securing his acquittal. After the acquittal the lawyer told the darkey that he ought to have some pay for his hard work. 'Have you got any money at all?' inquired the lowyer. 'I've still got that $9.70,' said the negro.—Kansas City Journal.

Function of Religion.

"Religion within those souls which it really invades is—one may say—a value that is unique and infinite; attributed not by imagination, but by consciousness, properly so called, to certain ideas, to certain feelings, to certain actions with a view to ends which surpass humanity."—E. Bontroux.

Laid the Foundation.

March 24, 1811, which saw John Jacob Astor's brigantine Tonquin enter the Columbia river, was a great date mark in American history. Around the fur trading post which his men established near the mouth of that stream, close to the present Astoria, was built the first American settlement seen on the Pacific.—Leslie's.
