SAN FRANCISCO SCENE OF THE PANAMA-PACIFIC EXPOSITION 1915

STARTING WORK ON PANAMA

Every Country on Earth to Be Represented at the Greatest World's Fair in History. Eighty Million Dollars to Be Expended on National Celebration.

THE NATION'S BIG EXPOSITION

Composite Fleet of Navies of the World to Pass Through Panama Canal and Enter San Francisco Harbor. What the Great Fair Will Be Like.

WITHIN a few weeks' time thousands of men and teams will be engaged in leveling all the grounds of the Panama-Pacific International exposition site in San Francisco, and it is estimated that within six months 10,000 men will be employed in the construction of the national part of the great exposition at

which the United States of America will celebrate the opening of the Panama canal. Responses to invitations to participate and offers of co-operation from every part of the world are flooding the exposition management, and President W. W. Rouse and his thirty directors, who represent every impor-

tant interest in the canal and the exposition are being undertaken upon a scale of world education and interest, and the exposition is the subject of enthusiastic co-operation in every land upon the earth. San Francisco is preparing to meet the standards of a great national celebration. Every land under the stars and stripes will be represented, and the nations of the world are intensely interested in the Panama canal, America's gift to civilization, and in the exposition at which America will formally celebrate the opening of the canal. This universal interest has assured the most remarkable world's exposition in point of size, diversity and specific interest ever held.

The opening of the Panama canal will not only be the most important commercial event in the history of the world, but it will mark a supreme epoch in the lives of the nations bordering upon the Pacific, and appropriately the visitor will see in the exposition the greatest displays of strange tribes and peoples of the Pacific ocean countries ever assembled. Down the streets of San Francisco in exposition days will pass such oriental pageants as the world has never

seen. China, Japan, the Philippines, India and other oriental lands will join in parades that will rival the Indian durbar in magnificence and surpass the durbar in variety by reason of the many nations represented. The exposition will formally open with the entrance into San Francisco harbor of a composite fleet of the battleships of the world. Upon invitation of the United States nearly 100 warships of foreign nations will first assemble at Hampton Roads and will be joined by detachments of the American navy, and the composite fleet will then be reviewed by the president and by foreign dignitaries. This fleet, the largest ever assembled, will proceed through the Panama canal, arriving in San Francisco harbor about two weeks after the exposition opens.

The exposition will be held upon the shores of San Francisco bay and of the Pacific ocean and will occupy an area of more than 1,000 acres. The grounds will describe a semicircle about San Francisco, following the contours of the shore from the harbor out to and beyond the Golden Gate. The structures will be the largest and costliest ever erected for a world's exposition.

The two principal locations of the exposition will be at Harbor View and in Golden Gate park. Harbor View lies as a crescent on San Francisco bay midway between the ferry building, the principal entrance to San Francisco, and the Golden Gate. Golden Gate park fronts the Pacific ocean one mile below the famous Cliff House. These two main sites and intermediate locations will be connected by a marine boulevard that will skirt the shores of San Francisco bay and also by an interurban railroad. A trolley trolley will run over the boulevard. Harbor View is within twenty minutes' walk of the Fairmont hotel and the most extensive apartment house section of San Francisco.

At Harbor View will be located a yacht harbor, the Midway and night life of the exposition and many concessions that lend themselves to night illuminations as well as great buildings to house such heavy exhibits as may be readily unloaded from ocean-going vessels, such as the structures to contain the manufactures and machinery exhibits, the Palace of Liberal Arts and other important buildings.
