It offers courses in Agriculture, Civil Engineering, Electrical Engineering, Mechanical Engineering, Mining Engineering, Forestry, Domestic Science and Art, Commerce, Pharmacy and Music. The College opens September 22d. Catalog Free.

Address: REGISTRAR, OREGON AGRICULTURAL COLLEGE, Corvallis, Oregon.

PACIFIC OCEAN BEACH FRONTING THE EXPOSITION SITE IN GOLDEN GATE PARK.

PANAMA-PACIFIC TO BE THE GREATEST OF ALL EXPOSITIONS

FOLLOWING the battleship parade into San Francisco harbor at the opening of the Panama-Pacific International exposition there will be a program of events of world interest and importance in a succession of two months apart interspersed with lesser events—yacht races and motorboat races of an international character for great trophies and cash prizes, aviation meets with the famous bird men of the world, Olympic games in which the athletes of the world will take part, intercollegiate contests, automobile races in which the holders of the world's

records will participate in the automobiles of every nation, military maneuvers in which the crack infantry and cavalry of this and other nations will participate upon an extended scale. The location of the exposition gives widest scope for the greatest international sports program in history. The auto races will pass into Golden Gate park before the concrete coliseum, which will have a seating capacity of 75,000 people. The military maneuvers and Olympic games will also be held in the stadium. On San Francisco bay motorboats will vie for the world's records before the Harbor View site of the exposition. The yachtsmen

of the world will sail from Europe across the Atlantic to New York and then through the Panama canal to San Francisco. The Panama-Pacific International exposition was first proposed by Mr. R. B. Hale, a merchant of San Francisco, in 1904. Mr. Hale wrote a letter to the Merchants' association, and the idea took like wildfire. At that time it was anticipated that the canal would be opened in 1913, and 1913 was the date set for the exposition. An organization of the commercial bodies began the preliminary work, but in 1914 came the fire. No one was dismayed. In a shack built over embers hardly cool a

dry goods merchant placed a great sign, "Panama-Pacific International Exposition, San Francisco, 1915," and this became the rallying point for the fight to build a new city.

Of more than \$20,000,000 now appropriated by California \$7,000,000 has been raised by popular subscriptions, \$4,000,000 is assured through a special act of the legislature permitting the counties to tax themselves for exposition purposes, \$5,000,000 was appropriated by the state of California, and San Francisco has voted a bond issue of \$2,000,000. This is the largest sum that has ever been raised for a world's exposition at an initial stage. But it is only a starter.

The contributions of China and Japan toward the exposition in magnificence and variety will surpass anything ever seen outside of the orient and even in the far east itself. A conservative estimate of their combined expenditure toward the exposition is \$10,000,000. Hawaii and the Philippines will contribute more than \$4,000,000 each.

The Pacific coast of the United States and the whole west will be featured up more extensively than they have been within their history. Side excursions from the main line or stop-overs upon any of the eight transcontinental systems terminating upon the Pacific coast will afford the visitor an opportunity to see those attractions of America that appeal to him. To most people the names of these places will carry a picture—the Yosemite, the Grand Canyon of the Colorado, the

Yellowstone National park, Great Salt lake, Puget sound, the inland trip to Alaska, the government's huge reclamation projects in sixteen western states, the Columbia river region, the redwood forests of California, the firs of Oregon, the big trees on the approach to the Yosemite, Arizona and New Mexico, youngest of the states; Nevada and some of the greatest mining camps in the world. Perhaps most interesting of all will be the opportunity for a trip through the Panama canal either coming or going.

The reconstruction of San Francisco is one of the greatest miracles within the history of American municipalities. Five hundred and eight city blocks, embracing the principal business and residential portions of the city, were wiped from the earth in 1906. The streets were covered in some places with debris forty feet deep, yet today a stranger to the city would never know from its appearance that a fire had occurred.
