RESOLVED, That our thanks are due to the people of the city of Clatskanie for their most cordial hospitality by throwing open their homes to furnish accommodations, and for many acts of kindness and favors shown us during these three days; and we wish to express our appreciation, also, to the ladies who provided for the cordial and pleasant reception to the teachers, which was so thoroughly enjoyed by all;

RESOLVED, That we are highly pleased with the instructions and inspiration given us by the able speakers and instructors who participated in this meeting, and that we pray the good work they are doing may long continue;

## ELECTRIC

Why not have your house wired for electric lights? It is to your interest, not only for your own convenience but for protection from fire. Over ten per cent of the fires in dwellings last year in the U. S. were caused by kerosene lamps and two per cent from electric wires.

## TERRIFIED THE SHAH.

The Persian Monarch Suddenly Lost All Interest in Radium.

Radium, most mysterious of the new mysteries, in modern science, is so little familiar to unscientific men that the panic of the oriental potentate described in a recent book by M. Xavier Paoli, a French detective, is easily understood.

Once while in Paris the shah of Persia, Muzaffar-ed-din, expressed a wish to know something of Professor Curie's famous discovery. M. Paoli made the necessary arrangements. Complete darkness is of course needed if radium is to reveal itself in all its brilliancy. With endless trouble Paoli persuaded the monarch to descend into one of the hotel cellars that had been arranged for the purpose.

But at length his majesty, with all his suit, proceeded to the underground apartment. Professor Curie closed the door, switched off the electric light and uncovered his specimen of radium. Suddenly a shout of terror between the roar of a bull and the yell of a man being murdered rang out and was echoed by a hundred others.

"Amid general excitement and consternation," writes M. Paoli, "we hung ourselves upon the electric switches and turned on the lights."  
 "Then we beheld a strange spectacle. In the midst of the prostrate Persians, with his arms around the neck of the grand vizier and his round pupils dilated to their very rims, stood the shah, shouting at the top of his voice in Persian:

"Come away! Come away!"  
 "The switching on of the light calmed his mind terror as if by magic. Realizing the disappointment and chagrin he had caused M. Curie, the shah tried to compensate him by the offer of a decoration. But the austere man of science," concludes Paoli, "thought it to decline it."

## Thanks---

I wish to thank the voters of Columbia County who gave me their support at the recent election.  
 Yours very sincerely,  
 J. B. Wilkerson.

## ST. HELENS Harness & Shoe Shop

MONTGOMERY BUILDING ST. HELENS, ORE.

For singles—trap or field—just toss in a shell, press the button and—"PULL." The side bolt makes it easy. You don't have to tug at the barrel or watch an on-and-off device. The action stays open after each single shot is fired—it always stays open when the magazine is empty. Five shots—three to get the cripples—each under absolute control of the trigger finger. The recoil releases for you—kicks another shell in; takes the strain off the gun—the discomfort out of the kick—all without diminishing the drive behind the shot.

Simple take-down—a few turns of the readily handled magazine screw-cap makes cleaning, carrying and interchange of barrels quick and easy.  
 Send for a motion picture booklet telling how the kick is used—how a friction device found only on the Remington-UMC Auto-loading Shotgun takes the punishment out of heavy loads.  
 Write to-day.
