night was held the 3rd Monday in July for the past 18 years (1999).

"The two events have been combined into a grand community-wide celebration and moved to June in hopes of more amicable weather and fewer local event conflicts to increase resident and business participation," Russ said.

Nickelodeon's Leonardo and Donatello, stars of the animated Ninja Turtles series, will be on hand to meet with kids.

"The Nickelodeon costumed characters will be roaming about Garfield and College Streets in 30-minute intervals," Russ noted. "The Turtles will also be available to pose with kids and families to take photos."

A breakdown of the activities includes a free hot dog lunch, technology showcase, information booths from a myriad of local nonprofits, tech support Q&A hoop shoot, scavenger hunt, drawing for prizes and a video game trailer.

In addition to meeting the Ninja Turtles, kids events include a bike rodeo, a free bike helmet from US Bank and Mt. Angel Police Department, bounce house, carnival games and prizes and air-brush tattoos.

Mt. Angel Telephone, along with Canby Telcom, became DirectLink on Nov. 1, 2016, and transitioned to a cooperative on Jan. 1. The business has partnered with local entities and vendors for years to put on these local events.

"The Mt. Angel Police Department is so generous of their time in the bike rodeo for local youths," Russ said. "Multiple local nonprofits also participate in the afternoon, including several members of the JFK football team who assist with setup, food service and tear down."

"The partnership with Nickelodeon allowing for our 'special guests' this year is a long-standing relationship, compliments of the digital television services offered through the Canby DirectLink service area."

hotel and it's been nice," Soulds said. "I love being out here in the forest. It's clear and fresh."

Soulds and other campers were able to explore the garden's 80 acres of garden while sipping cold beers.

Shannon Micklew-

right, of Sherwood, visited the Brewfest for the first time with cider on her mind and was not disappointed when she stumbled upon ATLAS Hard Cider Company's apricot cider.

"I've heard of past years where they just had a big tent with limited ciders, so I'm happy to see there were a couple ciders," Micklewright said.

Hammond said she was expecting 7,000 visi-

tors to participate in Brewfest for Father's Day weekend.

Visitors could take a break between beer tastings by filling their stomachs with sweet and savory crepes, loaded potatoes, macaroni and cheese and sausage at one of nine food vendors in the garden.

On Sunday, there were kids crafts for children who accompanied their parents for Father's Day

and other family-focused crafts.

While parents sip on local brews, Hammond said children could take advantage of a root beer station in the Rediscovery Forest.

"We expect to see a lot of dads wearing BabyBjorn's and walking around with their beers," Hammond said with a laugh. "I've even seen some of that today."

Bugs

Continued from Page 1A

The key is to enjoy summer, but protect yourself."

OHA also has funding to test mosquitoes for the Zika virus, although Oregon is not considered a likely area for an outbreak of the disease.

Included below are methods for protecting yourself from mosquitoes and ticks from the Centers for Disease Control and Prevention.

Prevent mosquito bites

Insect repellent: Use an Environmental Protection Agency (EPA)-registered insect repellent with one of the following active ingredients. When used as directed, EPA-registered insect repellents are proven safe and effective, even for pregnant and breastfeeding women.

» DEET. Products containing DEET include, but are not limited to, Off!, Cutter, Sawyer, and Ultrathon.

» Picaridin and icaridin outside the United States. Products contain-

ing picaridin include, but are not limited to, Cutter Advanced, Skin So Soft Bug Guard Plus, and Autan (outside the United States).

» Oil of lemon eucalyptus (OLE) or PMD, the synthesized version of OLE. Products containing OLE and PMD include, but are not limited to, Repel and Off! Botanicals. This recommendation refers to EPA-registered repellent products containing the active ingredient OLE (or PMD). "Pure" oil of lemon eucalyptus (essential oil not formulated as a repellent) is not recommended; it has not undergone similar, validated testing for safety and efficacy, is not registered with EPA as an insect repellent, and is not covered by this recommendation.

» IR3535. Products containing IR3535 include, but are not limited to, Skin So Soft Bug Guard Plus Expedition and SkinSmart.

Cover up: Wear long-sleeved shirts and long pants.

Keep mosquitoes outside: Stay in places with air conditioning or that use window and door screens. If you are not able to protect yourself from mosquitoes inside your home or hotel, sleep

under a mosquito bed net.

Tick protection
 » Avoid Direct Contact with Ticks
 » Avoid wooded and brushy areas with high grass and leaf litter.
 » Walk in the center of trails.

Repel Ticks on Skin and Clothing
 » Use repellent that contains 20 percent or more DEET, picaridin, or IR3535 on exposed skin for protection that lasts several hours.
 » Always follow product instructions. Parents should apply this product to their children, avoiding hands, eyes, and mouth.

» Use products that contain permethrin on clothing. Treat clothing and gear, such as boots, pants, socks and tents with products containing 0.5% permethrin. It remains protective through several washings. Pre-treated clothing is available and may be protective longer.
 » The Environmental Protection Agency (EPA) has an online tool to help you select the repellent that is best for you and your family.

Find and Remove Ticks from Your Body
 » Bathe or shower as soon as possible after coming indoors (prefer-

ably within two hours) to wash off and more easily find ticks that are crawling on you.

» Conduct a full-body tick check using a handheld or full-length mirror to view all parts of your body upon return from tick-infested areas. Parents should check their children for ticks under the arms, in and around the ears, inside the belly button, behind the knees, between the legs, around the waist, and especially in their hair.

» Examine gear and pets. Ticks can ride into the home on clothing and pets, then attach to a person later, so carefully examine pets, coats, and day packs.

» Tumble dry clothes in a dryer on high heat for 10 minutes to kill ticks on dry clothing after you come indoors.

» If the clothes are damp, additional time may be needed.

» If the clothes require washing first, hot water is recommended. Cold and medium temperature water will not kill ticks effectively. If the clothes cannot be washed in hot water, tumble dry on low heat for 90 minutes or high heat for 60 minutes. The clothes should be warm and completely dry.
