tions on this day, it wasn't worth the risk.

The good news is that the main route offers a stunning view of the waterfall without risk. Just past the sign, there's a spectacular viewpoint where we ate lunch and enjoyed the 120-foot waterfall roaring through the snow.

At that moment, we felt really good about the decision to abandon the trip to its base. Maybe I'll head back in a few months.

Either way, the route continues through snowy forest to complete

the loop, then heads back to Salt Creek Falls and the road back to the car.

The route past these two iconic waterfalls is fine in the summer, but the snow, solitude and views of two cascades covered in white made the winter trip far superior.

ABOUT RESTAURANT INSPECTIONS

This is a snapshot of the inspections conducted by the Marion and Polk County health departments.

Twice annually, licensed restaurants receive unannounced inspections that focus on food temperatures, food preparation practices, worker hygiene, dish-washing and sanitizing, and equipment and facility cleanliness.

Violations: Restaurant scores are based on a 100-point scale. Priority violations deduct 5 points, and priority foundation violations deduct 3 points. Violations recorded on consecutive inspections result in point deductions being doubled.

Scoring: Scores of 70 or higher are considered compliant. Restaurants scoring below 70 must be reinspected within 30 days or face closure or other administrative action. Restaurants display a placard by the entrance to indicate whether they have passed their last inspection.

Food trucks, carts and trailers: Mobile food operators do not receive a numerical score. They are either approved to operate or not approved to operate.
