Barring physical accidents, there is no sickness except that depending directly upon a want of food or water or air, sometimes all three. When any one is sick the presumption is that be has been trying to subsist on poor food or vitiated air or bad water, one or more.

In order to have good food a person ought to have the first eating of it. Food that has been mussed over and Spokane left by one person is not fit to be caten In order to have good air a perse

ought to have the first breathing of it Air that has been breathed by other persons is not fit to breathe again. Water should be fresh from some spring or well. If hydrant water must be used let it run a bit, as the house pipes are apt to be of lead and not Iron like the pipes that convey the wa-

ter through the city.
Food that is reliabed, air that cools and invigorates, water that is quaffed with eager thirst—these are the things that make blood. Put fresh air into the lungs, good food and pure water luto the stomach, and nature will do the rest.-Medical Talk.

When mixing beeswax and turnen-tine for floor polish add a little spitits of ammonia, and the wax will dissolve without heating.

Olive oil must be kept in the dries and darkest place in the storeroom, as light injures it very much.
