HARD WALL PLASTER
Only costs about 5c per yard more than common plaster, and worth many times over.
ADVANTAGES
No danger of freezing as it can be used in zero weather. Being flexible instead of brittle—as all sand mortars are—it will dent like wood when struck or jammed, instead of breaking. Doors, windows, pipe holes, etc. are easily cut through. It is a non-conductor of electricity and thus prevents short circuiting. It adheres equally well to brick, stone or common lath. It contains no acids nor chemicals to corrode. It will not burn nor disintegrate by fire being a perfect protection for wood frame work. It will under no condition pit or blister.
Parties having plastering to do should consult me regarding this class of work. Estimates cheerfully given.

We have five children and have given it to all of them with good results." For sale by all druggists.
