

Most people don't know what economy means. Merely pinching the price isn't economy. Real economy thinks last of price and first of QUALITY. Economy is in what you get, not in what you pay. Saving money at the expense of QUALITY isn't economy, it is extravagance. When we buy our goods we look first to QUALITY both in material and workmanship. When we sell our goods we give you good QUALITY at prices that are never higher than such goods are worth. The best QUALITY shoes are cheapest in the end by far.

HARD WALL PLASTER  
Only costs about 5c per yard more than common plaster, and worth many times over.  
ADVANTAGES  
No danger of freezing as it can be used in zero weather.  
Being flexible instead of brittle—as all sand mortars are—it will dent like wood when struck or jammed, instead of breaking. Doors, windows, pipe holes, etc are easily cut through it. It is a non conductor of electricity and thus prevents short circuiting. It adheres equally well to brick, stone or common lath. It contains no acids nor chemicals to corrods. It will not burn nor disintegrate by fire being a perfect protection for wood frame work. It will under no condition pit or blister.  
Parties having plastering to do should consult me regarding this class of work. Estimates cheerfully given.
