

LA GRANDE EVENING OBSERVER.

VOLUME III

LA GRANDE, OREGON, THURSDAY EVENING, AUGUST 18, 1904

NUMBER 242

ELECTRIC RAILROAD SURVEYORS HERE

Will Reach La Grande Today--Chief Engineer Brown Has Great Faith In Its Early Completion

A C Claver, ex-register of the La Grande office arrived in the city last evening in company with Mr Brown, chief engineer on the new electric road. The surveyors will reach this city today and by the latter part of the week they expect to get back to their starting point, Union.

Both gentlemen are very sanguine of the feasibility and completion of the line within the limits of their franchise which is October 1st 1905.

As we have stated in these columns before the entire proposition depends upon the report of the committee who are now ascertaining the traffic obtainable, in other words if there is sufficient business that such a road would naturally handle to justify the expenditure, these gentlemen state there is no question but what the road will be constructed.

It is evident that as far as the proposition has developed it has been strictly along business methods. In no particular is it connected with any grafts bonuses or anything of this nature, quite common in the promotion of such enterprises. It certainly must be as the men who are behind the proposition state that the men who are to build the road have sufficient faith in the ultimate result that they have advanced \$20,000 to make the investigation and the work they are doing is permanent and will result in no loss whatever to the company if it proves to be feasible as they have every reason to believe it will.

Mr Brown states that they have at least a month's work before them which will include the solving of the engineering problem of developing power on the Munam which they have already located.

The company have already had one engineer who made a casual examination and in his opinion any wire from ten to twelve thousand volts power can be maintained the year around. A current meter is now enroute from New York and when it arrives the actual power to be obtained will be easily ascertained.

The facts of the whole thing resolves itself to this; The proposition is coming so easy and means so much toward the development of this entire country that our people can hardly make them believe that it will be a reality. In any event no one is financially involved except the parties themselves.

REMAINS NOT YET FOUND

Sumpter, Aug. 18--Each of the shifts working on the cave at the Columbia mine, under which lies the body of Joe Anstee, have been incessantly at work since last Sunday morning, and up to last night had not reached the point at which they expected to uncover his body.

They expect to reach there some time today. All the men that can be advantageously worked on each shift are being employed by Manager Baillie, who has given instructions to use all possible haste.

The American Way

Wheeling, W Va., Aug 18--Unidentified persons early today attempted to kill Captain F M Norchier, of the Austen Coal and Coke Company, and his family by blowing up the house at Austen with dynamite.

The charge was placed on the front porch directly under the room in which the family were sleeping.

The explosion tore a large hole through the floor and dug a hole in the ground several feet below.

The family all escaped serious injury. The employees of the Austen Coal and Coke Companies have been on strike since the 1st of January, and Mr Norchier believes that strikers are guilty of the outrage.

75 Cent Wheat

Harrington Wash., Aug. 18--Some of the wheat buyers were offering as high as 75 cents for wheat here today. A number of farmers have contracted their wheat for 70 cents, and several thousand bushels were contracted today for 75 cents. The farmers are hauling out grain sacks by the four horse wagon load.

The Turkish Way

Constantinople, Aug. 18--A band of Armenians has been attacked by Turkish troops in the village of Schamirun, five hours' travel north of Bitlis, Asiatic Turkey.

Kurds are alleged to have taken part in the attack. Two villages are reported to have been destroyed.

Senator Hoar Dying

Senator George Frisby Hoar, who has been ill for some time with lumbago has suffered a serious relapse and today his physician said the venerable senator is dying and probably can not last more than three days.

Good Yield

Jack Wright who lives in the lower Cove threshed 1100 sacks from a 70 acre field, which means 34 2/3 bushels to the acre.

Died

Geo Miller, uncle of Geo Miller of the Cove died on last Monday and was buried in the Summerville cemetery Tuesday. Deceased was one of the early Pacific coast pioneers, having moved from Ohio in the early sixties where he followed mining and lived until about twelve years ago when he moved to this county. He was 76 years of age.

Teacher Wanted

School clerk M L Carter of the Red Pepper school district was in the city today stating so far the directors of his district had been unable to secure a teacher for their next term. Their school begins in October and continues for five or six months. Last year the district paid \$45 per month.

More Burning

Savannah Ga., Aug. 17--Following the enactment of the scenes that took place at Statesboro yesterday afternoon in which two negroes were burned at the stake by an infuriated mob, comes the announcement that the fury of the populace was not appeased by the death of two victims.

A report received here today says that Handy Bill, another negro alleged to have been implicated in the Hodges murder, was burned at the stake last night and a dispatch received from Statesboro this afternoon says that A R Talbot and A J Gaines, colored preachers were lynched with Handy Bill.

The mode of execution of the two latter is not known but it is presumed it was along lines similar to those used in the former cases.

Albert Robertson 17 years of age a son of one of the negroes implicated was taken from his home near Rogers and shot because of too free an expression in regard to the burning of Cato and Reid.

Creamery Machinery

A car load of new machinery for the La Grande Creamery arrived this morning and the proprietors will be busy the next few days in installing the new plant which is first class and up to date in every respect.

They expect to have steam in their new boiler and engine and start their big churn on September the first.

Fate In Doubt

St. Petersburg, August 18--The admiralty is beginning to manifest nervousness at the fate of the Russia and Grombol of the Vladivostok squadrons which have not been reported since the engagement Sunday with the Japanese squadron in the straits of Korea.

LANDS RESTORED TO SETTLEMENT

Portions of the Blue Mountain and Wallowa Forest Reserves That Have Been Released Open For Settlement
