SINGS ITS DEATH SONG.

A Povuliar Bird Found In the Jun-gles of South America.

There is a queer bird in the jungles of northern South America which is called the "pauji" by the narives, but is known to science as the galeated curasson. It is chiefly remarkable be cause it sings its own death song.

It does not really sing, but makes a feen humming noise which sound.

deep humming noise which sounds rery much like the Spanish words "El muerto esta aqui" (the corpse lies here). "It is while uttering this lugubrious

chant, said a South American travel-er, "that the 'pauji' usually meets its death, for the hunter can then easily track it to its retreat, and it falls a victim, as the Indians say, to its own death song."

If the "pauji" gets suspicious it im nediately ceases humming, and that is a sure indication to the hunter that the bird has seen him or scents dan-ger. In such a case the only thing for the sportsman to do is to remain per the sportsman to do is to remain per-fectly still. The bird may become re-assured after waiting awhile and sgain begin to call, "The corpso-lies here." It can then be cautiously approached and

If it is only wounded the "pauji" noually escapes, though it cannot fly much better than the ordinary domestic fowl. It is very fleet of foot and will outrun the bunter until it is lost in the dense undergrowth of the jungle.

In the mating season the male "pauli" is the most pugnacious of birds and will fight its own kind whenever it meets them. Often the fight ends is the annihilation of both combatants

OAIRY FARMERS IN LINE.

Secretary of National Union in Fa vor of Brownlow Bill.

Secretary Charles Y. Knight of the National Dairy union recently ex-pressed himself as follows concerning the Brownlow bill:

"In company with hundreds of thou sands of other people throughout the United States I am very much interest ed in this bill. I have just returned from a tour of Italy, France and Eng land, where I had an opportunity to observe the character of the roads in those countries. Coming home and looking over our miserable facilities for getting around in the rural dis tricts, I made up my mind that it will be necessary for this country to do as European countries have done in order to get good roads—i. e., have govern

ment aid. "The National Dairy union is organ ized throughout the north in every con gressional district which has any amount of agricultural constituency and I am firmly of the opinion that the progressive farmers who are dairymen will be in favor of the bill for national aid. I am so much interested in its success that I am willing to use my iqfluence to have our datry farmers pet-tion for the passage of this bill. I would be willing to give several hundred dollars out of my own pocket to see the roads of this country improved like those of France."

THE SENSE OF SMELL

The Aberigines of Peru Have Developed it Wonderfully.

How infinitely minute must be the particles that emanate from the object which the dog is tracking, says the London Mall. Yet the matter is extremely divisible. The tenth part of a grain of musk will continue for years to ill a room with its odorifer us particles and at the end of that time will not be appreciably diminished in weight by the fluest balance. A cubic inch of air rising from the flame of a Bansen burner has been found to con-talu no fewer than 489,000,000 dust particf a A drop of blood which might be suspended from the point of a needle contains about a million of red flat-tened corpuscies. Still, though matter is so marvelously divisible, the offac-tory nerves are infinitely more sensi-tive. Much has yet to be investigated with regard to the differentiation of the points in these nerves so that they any discriminate with such apparenty miraculous accuracy. Yet even the results in the scent of dogs show how marvelously fine is their discriminating power. Our sense of smell, unless in the trained chemist, is not even so acute as that of the semisavage. aborigines of Peru can in the darkest night and in the thickest woods distinguish respectively a white man, a ne ero and one of their own race by smell. Much we have gained by civiliinclude that not without some loss to our ballity energies and sonses. Man's rerative power after on injury is in he inverse ratio to his social advance ment. Similarly he seems to become ess neute and delicate in the sense of onell as to fares befor and five more confortably. The faithful dog puts tips to simme

IS FIRST CLASS **BUTTER**

La Grande Creamery Turned Out its First Batch Last Saturday Evening.

The Grande Ronde Creamery Com pany churned its first batch of butter Saturday evening and to say the product is first class is putting the statement rather mild. The Observer man claims to be somewhat of a judge of butter and is willing to stake his reputation upon the statement that bette butter was never turned out in this or any other place than the sample which he saw at the creamery this morning

Weather Report

The following is the official record kept by observer W A Worstell of this city of the weather during August It will be noted that the past menth was the warmest continued spell of weather for many years, the first fifteen days averaging 90. There were 26 clear days, 4 partly clondy, one cloudy. Light frost on the 16th. Total rainfal .29 of an inch. The mean temperature of the mouth was 70, the maximum so and the minimum 70

DRIFTING

Many people who are neglecting symptoms of kidney trouble, hoping "it will wear awa", drifting towards Bright's Disease, which is kidney trouble in one of its worst forma.

stops irregularities, strengthens the urinary organs and builds up the worn-out tissues of the kidneys so they will perform their functions properly. Healthy kidneys strain out the impurities from the blood as it passes through them. Diseased kidneys do not, and

the poisonous waste matter is carried by the circulation to every part of the body, causing dizziness, backache, stomach trouble, sluggish liver, irregular heart action, etc.

If you have any signs of Kidney or Bladder Trouble commence taking FOLEY'S KIDNEY CURE at once, as it will cure a slight disorder in a few days and prevent a feat length. fatal malady. It is pleasant to take and benefits the whole system.

How to Find Out.

You can easily determine if your kidneys are out of order by setting aside for 24 hours a bottle of the urine passed upon arising. If upon examination it is cloudy or milky or has a brick-dust sediment or small particles float about in it, your kidneys are diseased, and FOLEY'S K'DNEY CURE should be taken

G. B. Burhans Tostifies After Four Years. G. B. Burhans of Carlisle Center, N. Y., writes:

"About four years ago I wrote you stating that I had neen entirely cured of a severs kidney trouble by taking less than two bottles of Poley's Kidney Cure. It entirely stopped the brick-dust sediment and pain and symptoms of kidney disease disappeared. I am gled to say that I have never had a return of any of those symptoms during the four years that have sispeed, and I am evidently cured to stay cured, and heartily recommend Poleyia Kidney Cure to any one suffering from kidney or bindder trouble."

Two Sizes, 50 Cents and \$1.00.
