DIAGNOSIS

Osteopathic diagnosis is not only a science based upon an accurate knowledge of the minutest details of anatomy, pathology and symptomatology but it is an art as well, requiring trained hands and a cultivated, delicate sense of touch, without which diagnosis is little more than crude guessing and it is impossible to make an accurate personal health summary or locate the cause of diseased conditions. Through the proper development of the tactile sense osteopaths are enabled to detect the slightest luxation or mal alignment in the bony structure, abnormal densities, fluid accumulations, degrees of temperature, unnatural elevations or depressions, misplaced organs, unnatural contraction or relaxation of muscles, and must know their inter-related significance.

HARD WALL PLASTER

Only costs about 5c per yard more than common plaster, and worth many times over.

ADVANTAGES

No danger of freezing as it can be used in zero weather.

Being flexible instead of brittle—as all sand mortars are—it will dent like wood when struck or jammed, instead of breaking. Doors, windows, pipe holes, etc. are easily cut through it. It is a non conductor of electricity and thus prevents short circuiting. It adheres equally well to brick, stone or common lath. It contains no acids nor chemicals to corrode. It will not burn nor disintegrate by fire being a perfect protection for wood frame work. It will under no condition pit or blister.

Parties having plastering to do should consult me regarding this class of work. Estimates cheerfully given.
