Take Care of Your Trophies

I will pay from \$2 to \$10 for male deer heads handled according to directions. The dotted lines on out of neck and head show where to rip the skin. To bleed your game cut the jugular as low down as possible never cut the throat. Commence to skin by making a cut from the base of the horn to back of the head thence down the back of the neck to top of shoulder.

These around the side to point of brisket, work the skin carefully away from the base of the horns, when the ear is reached cut off those to skull, afterwards remove the flesh when the eye is reached run the finger in from the outside and raise up the eyelid to avoid cutting it when the eyelid is reached which is near the corner of the eye, work the skin out of the cavity with the point of the knife when the corner of the mouth is reached cut through and expose the teeth, leave all the black lining on the lip also cut the cartilage on the nose. Salt heavily and roll up for 24 hours then dry in the shade. Unless salted well and dried in the shade your work is all for nothing but salt. Cut as much of the flesh off the head as possible and work the brain out the hole at back of head save the under jaw bones when drying the skin keep it from wrinkling. I will also mount your trophies at reasonable prices.
