Short Courses of Study

Immediately followed the winter holidays, the Oregon Agricultural College, at Corvallis, will give free of charge two popular short courses of instruction—one in agriculture, the other in dairying. These courses consist chiefly of lectures by specialists from the Faculty and from abroad combined with work in the laboratories, where students have access to the apparatus of the College and Experiment Station. The lectures are designed for busy men and women who desire to advance with this progressive age, but cannot avail themselves of the full-four year course of instruction hence the courses of lectures will come at the most convenient season of the year for combining pleasure and recreation with profitable study.

Those familiar with the short course system of lectures speak of it as a rare opportunity for practical men and women to familiarize themselves with the more salient points touching their business, and to gather such general information as will enable them to live that higher industrial life possible to every farmer and housekeeper.

The instruction, which is simple, is adapted to the literary attainments of all; hence no educational test is required for admission to either of the courses. The schedules of lectures will be announced in due time.

The course in agriculture will be in January 9th, and continue ten days. Some of the subjects to be discussed are Horticulture, Plant Breeding, Bacteriology, Chemical Elements, How Plants Work, Budding of Plants based upon Plant Culture, Hints on Farming, How to Conserve the Fertility of the Soil, Drainage, Soil Moisture, Rose Culture, Veterinary Surgery, Rotation of Crops, Roadmaking, Fertilization and How to Make the Old Farm Pay.

The course in dairying will commence January 21, and continue six weeks. Students will meet for work

six days of the week. The mornings will be devoted to practical work in dairy rooms, two days will be devoted to butter making, two days will be spent in the dairy laboratories. In the afternoon of the days except those devoted to cheese making, lectures and recitations will occupy two or three hours. The lectures will treat of Soil Chemistry and Physics, Feed and Feeding, Dairying, Bacteriology Breeds and Breeding, Chemistry of Dairy Products.

There will be no fees except the breakage deposit of three dollars. This deposit is intended to cover breakage of glass-ware in the laboratory, and the actual cost of material used; hence a part of this fee will be returned in case of no breakage. Books will cost about three dollars. Rooms with board and lodging will cost from \$3.00 to \$3.50 per week.

For further information address the Register.
