

HAIR BRUSHES

In buying hair brushes, and all other brushes, we look out for points that might escape the notice of customers but which have everything to do with the life and service of the brush.

The construction, material, manner in which bristles are fastened, etc., are all important. The brushes you get here are such as you would seek were you a brush expert.

GOMBS

We are as particular in buying combs as we are in selecting brushes. In either line we are able to give you the best possible value for your money.

Os-te-op-a-thy

In connection with the brain there is a great cable carrying many bundles of "live" wires, or nerves. This cable is the spinal cord. It is encased in a canal of twenty-four bones connected together by the muscles. From between these bones or vertebrae pass thirty-one pairs of spinal nerves. Some of these nerves go to the muscles and some by the way of the Sympathetic Nervous System to the different organs of the body. If a vertebrae should be slipped somewhat—even slightly—from its position so as to pinch on one of these nerves, perhaps irritating, possibly paralyzing it, the organ it supplies would then become either irritated or torpid. A disturbed rib or any other misfit at a joint—no matter how slight its degree—is thus liable to press on an important nerve or vessel and interfere with its action.

Then, how necessary it is to have this frame work perfect adjustment?
