

HAIR BRUSHES

In buying hair brushes, and all other brushes, we look out for points that might escape the notice of customers but which have everything to do with the life and service of the brush.

The construction, material, manner in which bristles are fastened, etc, are all important. The brushes you get here are such as you would seek were you a brush expert.

GOMBS

We are as particular in buying combs as we are in selecting brushes. In either line we are able to give you the best possible value for your money.

Os-te-op-a-thy

To the osteopath the spine is the most important part of the human machine, for although every part of the body has its own nutrition, nerve force and fundamental activity, the nerves, motor, sensory and sympathetic, originate in the brain and spinal cord. It is therefore through the spinal cord, or backbone, that the osteopath reaches the nerve centers which he strives to harmonize. By mechanically stimulating them the osteopathic physician is able to equalize the circulation to all parts of the body, to increase the action of an organ or decrease it as the particular case may require.
