Os-te-op-a-ty

Falling to find reason in the philosophy of the prevailing schools, Dr. A T Still, founder of the American school of physiological or non drug medicine, set out to find the reason for so much pelvic congestion among women which clearly paves the way for all mal positions of the uterus, for inflammatory exudates and adhesions, for suppressed functioning, or over action, for pain, or sterility, for backaches, for headaches, for nervousness and for all the miseries peculiarly women's own. He found that cause. It proved to be an entirely new conception in medical philosophy. It was simple—so simple that many great physicians of other schools yet scoff at its acceptance.

A Store With A Record

We have been doing business in this town for 5 years in that time the town has nearly doubled in population. During the same time our business has increased FIVE FOLD. In other words our business has made a great deal more rapid increase than the town has. There are dozens of reasons for this all of which you will perceive if you begin buying drug store goods of us. In the first place we had a thorough training for pharmacy. In the second place we had exceptional opportunities for learning the practical side of pharmacy in a successful drug store of the highest standing. In the third place we have kept our eyes open and attended to business until we know the demands of the people of this town.
