

HAIR BRUSHES

In buying hair brushes, and all other brushes, we look out for points that might escape the notice of customers but which have everything to do with the life and service of the brush.

The construction, material, manner in which bristles are fastened, etc, are all important. The brushes you get here are such as you would seek were you a brush expert.

GOMBS

We are as particular in buying combs as we are in selecting brushes. In either line we are able to give you the best possible value for your money.

Os-te-op-a-thy

The relaxation or collapse that follows nervous tension is in some measure an indication of the wear or exhaustion of those parts found by the Osteopath to be suffering from the results of derangement. In other words if a man may collapse from the effect of nervous tension commonly so called it is not strange that he may become seriously diseased as the Osteopath finds resulting from mechanical derangements.

FOOD, WATER AND AIR.

The Essential Things Out of Which Blood is Made.

These are the things out of which blood is made. If the food is nutritious and properly cooked, if the air is pure and full of oxygen, if the water is clean and free from impurities, the blood will be rich and red and full of vitality.

Barring physical accidents, there is no sickness except that depending directly upon a want of food or water or air, sometimes all three. When any one is sick the presumption is that he has been trying to subsist on poor food or vitiated air or bad water, one or more.

In order to have good food a person ought to have the first eating of it. Food that has been mused over and left by one person is not fit to be eaten by another.

In order to have good air a person ought to have the first breathing of it. Air that has been breathed by other persons is not fit to breathe again.

Water should be fresh from some spring or well. If hydrant water must be used let it run a bit, as the house pipes are apt to be of lead and not iron like the pipes that convey the water through the city.

Food that is relished, air that cools and invigorates, water that is quaffed with eager thirst—these are the things that make blood. Put fresh air into the lungs, good food and pure water into the stomach, and nature will do the rest.—Medical Talk.

Reasonably Certain.

"I understand old Skinfint has got religion."

"It's possible."

"Do you really think so?"

"Well, if Skinfint and religion have come together at all I think it is safe to say that he has got religion. There certainly is nothing to indicate that religion has got him."—Chicago Post.
