The construction, material, manner in which bristles are fastened, etc, are all important. The brushes you get here are such as you would seek were you a brush expert.

## GOMBS

## Os-te-op-a-ty

Osteopathic diagnosis differs greatly from the usual methods of the "regular." The chief difference lies in the fact that we search for the cause instead of paying all our attention to effects, though by this we would not have it understood that we utterly neglect symptoms, because many times they are a ready index to the cause; but the trend of our education is to learn to use the sense of touch in ferreting out the true condition of the tissues of the body.
