ELECTRIC POWER VS. STEAM POWER

New York Central Places Electric Locomotive on Road Service with Satisfactory Results

New York Dec 6.—The successful test of the first of the electric locomotives that are being built for the main line of the New York Central Railroad makes a definite step toward the day when trunk line passenger service will be worked by electrical traction.

Tonight

Visions of the Orient, with its mystic and magnificence, are vividly pictured in the second act of "A Little Outcast" where for the first time in any production a correct view of a typical Chinese production is given.

and heavy to warrant the change. There were special conditions connected with the New York Central service which rendered the use of the electric locomotive desirable; but when such systems as those of the Pennsylvania between New York and Washington or Pittsburgh, or of the New Haven road between New York and Boston, come to be electrically equipped, we think it is altogether probable that the Sprague system of multiple control will be adopted, the electric locomotive being dispensed with. This implies a better distribution of the weight and power throughout the train, greater smoothness of running, and, of course, less wear and tear upon the track and bridges.

\$1,687,500

The Bulletin just issued by the United States Government, after months of careful research, shows that in the Western States, the average family purchases annually goods to the amount of \$750

On this basis the 2250 families visited with each issue of the Daily and Weekly OBSERVER annually purchase merchandise to the amount of

\$1,687,500

The natural logical conclusion cannot be otherwise than that no wide-awake business man who will take the few moments necessary to convince himself of the accuracy of the above statement, can afford to miss the opportunity of placing his announcements (25,500 each month) before this army of purchasers.

An ad under such conditions, properly taken care of will most certainly bring enormous returns on the investment.
