It is greatly to be wished that the department of commerce and labor, through the labor bureau, should compile and arrange for the congress a list of the labor laws of the various states, and should be given the means to investigate and report to the congress upon the labor conditions in the manufacturing and mining regions throughout the country, both as to wages, as to hours of labor, as to the labor of women and children, and as to the effect in the various labor centers of immigration from abroard.

The Bulletin just issued by the United States, Government, after months of careful research, shows that in the Western States, the average family purchases annually goods to the amount of \$750

On this basis the 2250 families visited with each issue of the Daily and Weekly OB-SERVER annually purchase merchandise to

\$1,687,500

The natural logical conclusion cannot be otherwise than that no wide-awake business man who will take the few moments necessary to convince himself of the accuracy of the above statement, can afford to miss the opportunity of placing his announcements (25,500 each mouth) before this army of purchasers.

An ad under such conditions, properly taken care of will most certainly bring enormous returns on the investment.
