BOYS' WAGONS

I have the roller bearing kind that run like a bicycle. Different sizes to select from and prices in proportion. If you see them you will want one.

If your old garden hose is worn out let me send you a new one. I also have a few lawn mowers left. They are the ball bearing, run-easy kind. Try one.

Do not forget about those bee hives and hammocks.

New Tabernacle

The scurrying of busy feet, the quick rasp of the trowel on the brick and the musical ring of the stone chisel upon the stone make the new Mormon tabernacle, which is in course of construction, sound like a very busy place, and it looks like a busy one too when approached. A large force of men is now at work on the building and it will be rapidly pushed to completion. Mr P Bouquet has the contract for the stone, brick and carpenter work and he expects to have the brick and stone work entirely completed by the middle of August.

The tabernacle is being constructed after the plans and specifications drawn by architect Thornton of this city, and when completed will be a model of beauty and convenience, a pride to the architect and builder, a credit to the members of the church, and an object for La Grande people to show visitors. Beside the stone work of the foundation and basement which has been completed for some time, there will be required nearly six hundred thousand brick in the construction of the building. Nearly all of the brick are on the ground at the present time, as are all the other materials needed for the work. Another large force of men will be put to work as soon as some rods and other material, which have been ordered, arrive. The tabernacle is one hundred and ten feet long and seventy four feet wide. The largest room, or auditorium, will seat one thousand two hundred people, and the place for the choir will seat eighty. Preparations are being made to begin the carpenter work as soon as the brick work has progressed sufficiently.
