

### MONEY SAVING PAINT

Money saving in painting doesn't mean the use of cheap-by-the-gallon paint. It means the use of first-quality paint—paint that will cover most surface to the gallon, that will spread easy and save the painters' time, that will wear well and put off for the longest time the need for re-painting.

### THE SHERWIN-WILLIAMS PAINT

Is a money saving paint. It covers most surface to the gallon because it is ground exceptionally fine and is thoroughly mixed. For the same reason, it spreads easiest and saves the painters' time.

It wears longest because it is made from the best materials, so thoroughly combined that they become inseparable, and hold together on the building for the longest time. When you buy The Sherwin-Williams Paint you buy economy. We sell it. Color cards free.

## Umatilla Railroad Building

The Tribune has received advices from Northern Pacific officials to the effect that a branch line is to be built in Umatilla county, which will connect with a new road now being built down the north bank of the Columbia river. A prominent citizen, who does not desire his name mentioned at this time, stated yesterday that he had seen the maps and plans of the proposed line in the office of the Northern Pacific in Portland a few days ago. He adds that the company actually means business in the building of the feeder and that formation of plans is now under way in earnest.

The proposed line is to be built in two directions from Pendleton, one leading south along Birch creek to Game Prairie, and the other tapping the W & O R at Warren and leading off through the Middle Cold Spring country to Cold Spring station on the Columbia river. This project has been contemplated for some time and, though the railroad officials are not ready as yet to make formal announcement of the new feeder, it is known that the line will be constructed within the next five years.—Pendleton Tribune.

### TO PROTECT SCHOOL CHILDREN

Paris, Oct. 6—The international tuberculosis congress today discussed the various forms and chemical aspects of consumption. It was admitted that a specific curative medicine has not been discovered, but the palliative qualities of certain remedies were recognized.

Great interest was manifested in suggestions made for the protection of school children, and it was proposed to institute books of record showing the state of health of the children in order to effectually separate the pupils into categories by dividing the affected from the healthy.
