AFTER OTHERS FAIL!

La Grande, Or., Sept. 11, '05
To Those Interested:
About four months ago I was having much trouble with my eyes. I had been fitted with glasses by several specialists, with little or no benefit. Dr. F. D. Dayton, the Pendleton eye specialist, who fitted the glasses I am now wearing, and have been wearing the last four months has given me perfect satisfaction, and judging from the benefits I have received from wear of his glasses, I am certain he is an expert in his line.

J. T. WILLIAMSON.

The above letter from Hon. John T. Williamson, the well known La Grande abstracter, is chosen from among the many, owing to his wide range of acquaintance in and around La Grande.

Why a "Regular" Fought Osteopathy

"What have you got against Osteopathy—why are you opposed to passing a bill to regulate its practice?" was the question asked of an active member of the medical lobby which worked against the osteopathic bill in the New York legislature last session.

"Got against it?" echoed the "regular" with rising indignation—"why, didn't I lose twenty of my best families to the Osteopaths the past year? Gentlemen, this fad has got to be stopped!"

That answer, we think, fairly states the motives of the members of other systems of medicine who oppose legislation that seeks to put osteopathic practice on the right basis. Our bills invariably demand high educational qualifications on the part of applicants for osteopathic licenses, while seeking at the same time to prevent those who are not graduates of regularly conducted, full-term schools from representing themselves as qualified Osteopaths.

It is too bad that such a state of affairs should ever exist; but we Osteopaths cannot help it. We never spend our time trying to frame up laws to govern or suppress the representatives of other systems of healing. Indeed, we are always glad to give them our full co-operation, if they ask it, to enact laws that insure the M. D.'s liberty in practice and protection against unqualified members of their own profession such as we ask for our own school. The safety of the public, as well as justice to each school of practice, demands that much.—Osteopathic Health.

Saved By Dynamite

Sometimes a flaming city is saved by dynamiting a space that the fire can't cross. Sometimes a cough hangs on so long, you feel as if nothing but dynamite would cure it. Z. T. Gray, of Calhoun, Ga., writes: "My wife had a very aggravated cough, which kept her awake nights. Two physicians could not help her; so she took Dr. King's New Discovery for Consumption, Coughs and Colds, which eased her cough, gave her sleep, and finally cured her." Strictly scientific cure for bronchitis and La Grippe, for sale by Newlin Drug Co. Price 50c and \$1.00; guaranteed. Trial bottle free.

So wonderful was their effect, that in three days I felt like a new man, and today I am cured of all my troubles." Guaranteed at Newlin's Drug Store; price 50c.

The Stein-Bloch Wool Test

The Stein-Bloch Wool Test consists of a boiling solution of water and caustic potash, the chemical action of which dissolves wool but not cotton. The two samples here shown were originally of the same length, the test proved one to be all wool, consuming the potash and leaving only the blackened edge. The other proved to be an adulteration containing a large per cent of mercerized cotton.

PURE WOOLEN CLOTH will wear and keep its shape under any conditions. Cotton adulterated will not. All fabrics received by the Stein-Bloch tailors must pass the wool test or be rejected. From the accepted fabrics our Stein-Bloch Smart Clothes are made. They are pure wool—a fact worth knowing and thinking about these days.
