**RESULT OF THE WORK OF  
GOVERNMENT RECLAMATION**

Some Interesting Figures Showing What Uncle Sam is Doing to Make more Grass Grow

A resume of the work performed by the Reclamation Service to date shows that 77 miles of main canal, 54 miles of distributing system, and 186 miles of ditches have been constructed, including dams, headworks, etc. Tunnels having a total length of 3 1/2 miles have been driven including more than a mile of the great Gunnison tunnel. More than 250 miles of telephone lines have been installed and are in operation; 126 miles of wagon road, many miles of which were cut out of solid rock in almost inaccessible canyons, 147 bridges, and 50 offices and other buildings have been constructed. The works above mentioned have called for the excavation of 9,350,000 cubic yards of rock and earth, the laying of 70,000 cubic yards of concrete, 12,000 cubic yards of rip rap, 190,000 square feet of paving; 150,000 linear feet of sheet piling and 10,000 feet of bearing piles have been driven. There have been purchased 130,000 pounds of railroad iron, 250,000 pounds of structural steel, 600,000 pounds of cast iron, 1,750,000 feet B. M. of lumber, and 78,000 barrels of cement. The government has erected a cement mill at a cost of more than \$100,000, which has already turned out 15,000 barrels of cement, and is now furnishing about 300 barrels a day. The saw mills operated by Uncle Sam have cut 2,880,000 feet B. M. of lumber from the government reserves. The United States Reclamation Service was organized in 1902, immediately after the passage of the Reclamation act. As soon as possible after a discussion of preliminary plans in Washington, investigations were begun in the thirteen states and three territories which are beneficiaries under this act. By utilizing the data gathered in previous years by the Hydrographic Branch of the Geological Survey, the service was enabled to concentrate its efforts upon several projects and plans for their construction were soon prepared for the consideration of the secretary of the interior. Up to the present time eleven of these projects have been approved and are under actual construction. Their estimated cost is nearly \$30,000,000.

**THE NEW BATTLESHIP  
IDAHO IS LAUNCHED**

Is a Sister to the Battleship Mississippi—Governor Gooding's Daughter Acts as Sponsor

Philadelphia, Pa., Dec. 9.—This is the day set for the launching of the new United States battleship Idaho, which has been built by the Cramps at their big ship-building yards in this city. The ships in the river displayed flags and the scene near the yards presented a festive appearance. Notwithstanding the cold weather an enormous crowd was assembled in the vicinity of the yards, to watch the large battleship as it glided from its cradle into its element. Besides Governor Gooding, of Idaho, whose 15 year old daughter acted as sponsor at the baptism of the ship, a large delegation of members of Congress and prominent citizens of that state, many officials of the Navy Department, the experts of the Navy Construction Bureau and several hundred navy and army officers attended the launching of the magnificent ship. The Idaho is a sister ship of the Mississippi, which was launched a few weeks ago. Her keel was laid in 1904. The Idaho has a displacement of 15,000 tons, and will be of 10,000 horsepower. It is expected to have a speed of 17 knots. The estimated cost of the battleship is \$2,995,500. Its main battery will contain four 12 inch breach loading rifles; eight 8 inch and eight 7 inch breach loading rifles. The secondary battery will include twelve 5 inch, rapid fire guns; six 3 pounder rapid fire guns; four 1 pounder rapid fire guns; two 3 inch field guns and eight machine guns.

**BANK FOR COVE**

There is a rumor which appears to be well based, that when the railroad extension is completed to Cove there will be a bank established there. The proposition is reported to be backed by local parties and outside capital will be interested. It is understood that an option has been given on the Stevens block and a modern stone banking house will be erected.

There is perhaps no better opening in Eastern Oregon for a bank than at Cove. The people of that section are as a rule prosperous and enterprising and a home institution will receive their hearty support.—Scot.

**NORTH POWDER PAPER**

Maxwell, of the Oregon Scout, of Union, and a partner, whose name we did not learn, have bought the printing press, etc., at North Powder, and expect to start a new newspaper to be published at their own about the middle of December.—Halnes Record.

**Located Here**

Dr. C. E. Hawke, of Portland, has located in this city, and has offices in the Sommer building. Office phone Red 1251, residence phone Black 831.

**SOME CHANGES**

Adam Crossman, of Cove, has leased the Baird place, next to the Centennial Hotel, and will occupy the same with a saloon. Manager Baird will build a new central office 26x42 on the old Job Wright hall grounds, and the telephone system will be overhauled and brought up to date in many ways.—Republican.
