**BLOCK  
SIGNAL  
SYSTEM**

Between La Grande and Cayuse, a distance of 55 miles, the O. R. & N. company has completed the block signal system which is now in use.

This is the first signal system completed on the Pacific coast and gives the O. R. & N. an advantage over every other western road in the way of safety appliance for the protection of public and employees.

The central station from which the electricity for the system is distributed is located at Kamela and is in charge of three men who take care of the entire system.

The total number of signals on the system between La Grande and Cayuse is 22, there being three signals between Cayuse and Bingham Springs, four between Bingham and North Fork, seven between North Fork and Kamela and eight between Kamela and La Grande. A separate system of electric wires consisting of three and five heavy wires carries the electric current from the power station at Kamela to the various storage batteries along the line.

The signals are so arranged that they protect the trains from head on collisions as well as from collisions from the rear. The night lamps on the signals burn for eight days and nights and are attended by employes whose duty it is to keep the apparatus in working order.

As long as a train is in one of the blocks, another train, approaching from either direction, can not enter that block, thus preventing collisions of any kind, if the signals are obeyed. The signals are operated automatically by the wheels of the cars or engine and the arms of the signals remain in an elevated position or at the "danger" position as it is called by railroad men, as long as the wheels are in contact with it.

When the train leaves the block, the pressure of the wheels on the apparatus releases the arm and it falls down to "safety" position and all trains finding the arms in this position may proceed in perfect safety as it is known that no other train is nearer than two miles which is the distance each block extends.

The crew which installed this system has gone to Portland and will install about 25 miles between Portland and Bonneville, where the O. R. & N. system is particularly crooked and another system will be installed soon between Huntington and Durkee, where the Burnt river canyon is also a dangerous and crooked piece of road.

**OREGON BAPTISTS TO RALLY.**

Pendleton, Ore., Dec. 12.—The Baptist societies of Eastern Oregon announce a denominational rally to be held at Pendleton December 19 and 20. The purpose of this meeting is the discussion of current matters of interest to the church and to secure a greater uniformity and more effective system of church work.

**ATHENA BUYS SPRINGS.**

Athens, Ore., Dec. 12.—At the last meeting of the city council a final settlement for the Ray Gallagher springs from which the city derives its water supply, was made, and the recorder was instructed to draw an order for \$1800 for the springs, together with the ground necessary for the use of the city in operating its water system. The transfer, was made Saturday.

**"MEDICAL TALK" ON OSTEOPATHY.**

Medical Talk, a magazine which has a very large circulation among the people and is very unfavorable to wholesale drugging, has three articles on Osteopathy this month. One is particularly interesting, as the editor tells how a certain journal has just discovered that Osteopathy is such a rational, common sense system of cure that it is bound to win. He does not believe in other practitioners fostering opposition to the new system, and says: "If there is no good in Osteopathy it will die of itself. If there is good it will live, and the people ought to have it. The truth of the matter is the people want it, and that is the reason the Osteopaths have been successful in getting their bills through the various state legislatures. If the doctor of drugs cannot stand the competition with the Osteopath there is only one conclusion to be drawn, and that is that his system is not as effective as that of the Osteopath.

**A Creeping Death.**

Blood poison creeps up toward the heart, causing death. J. E. Stearns, Belle Plaine, Minn., writes that a friend dreadfully injured his hand, which swelled up like blood poisoning. Bucklen's Arnica Salve drew out the poison, healed the wound, and saved his life. Best in the world for burns and sores 25c at Newlin's Drug Store.

**CAT BACK TO LIFE.**

**SCIENCE RESUSCITATES FELINE  
DEAD LONG TIME.**

University of Chicago Professor in Animal Experiments Uses Method for Restoring Vitality After Drowning.

Chicago—That a cat can be brought to life by vigorous massages and the injection of salt solutions as long as 15 minutes after the heart has ceased beating, as demonstrated by Prof. C. C. Guthrie before the physiologists of the Central West at the University of Chicago. Dr. Guthrie reported a series of experiments that Dr. G. N. Stewart had carried on in the laboratories at the university in testing the resuscitating powers of certain solutions. Salt solutions were used as well as the process of massage and the results noted. After the result of experiments covering several months had been read by Dr. Guthrie, the visiting physiologists were invited to Dr. Stewart's laboratory where the experiments were repeated.

In the demonstrations cats were asphyxiated and after the heart had ceased beating completely the tests were begun. It was with little difficulty that life was restored after five minutes with the use of salt solutions only. The results obtained from the injections of the salts grew more uncertain as the time was lengthened, and after a cat had been supposedly dead for ten minutes the salt solutions alone were not effective. Then it took vigorous massages to restore life. The experiments demonstrated to the professors that hope of resuscitation is not gone even as long as 25 minutes after the heart has ceased beating. If the results obtained from the experiments with the cats and dogs can be duplicated with the human being, the scientists expressed belief that Dr. Stewart and his associates have gone a long way in finding a remedy for restoring life from asphyxiation and drowning. Dr. Stewart has been working on these experiments only a few months, and has not been able as yet to carry them to the limit.

The effect of the restoration of breathing and heart action was to make the animal very excitable and its followed. As the time was extended before resuscitation was effected the fits increased. Dr. Stewart proposes to continue his experiments until results are obtained of some practical worth.

**HENDERSON ON CHIVALRY.**

Chicago Professor Tells New York Audience Gentlemen Are Court-teous to Working Girls.

New York.—At the first public meeting of the New York Association for Household Research, Charles A. Henderson, professor of sociology in the University of Chicago, was the principal speaker. He declared that nowadays only "ladies" are treated with chivalry.

"Why is it," asked the professor, "that chivalry is dead among us? Is it because the youth were taught to be courteous to ladies only, and not to all women? The man who is courteous to ladies only and not to the girls in the streets is only half civilized. He is a gentleman only because it suits his pleasure to be courteous. But until men treat the poor working girl with as much respect and courtesy as they do their friends in the ballroom we will have no real gentlemen.

"The relation of the household worker to her employer is closer than that of any other class of employe, for the woman who works in the house is in a way a member of the family, and while she is engaged for a definite sum to do certain work, yet there is a moral side to the relation that makes it more than just an industrial problem. It is a contract between human beings. The wage-earner sells her service, and her intelligence and psychological sense, and this is what makes this particular phase of the industrial problem so difficult, for there are some things that cannot be bought under the wage system."

**Woes of Innocent Bystander.**

It is said that more than 100,000 Chinese have been killed as a result of the Russo-Japanese war. China will hereafter be likely to sympathize very sincerely with the innocent bystander.

**GOES TO ASYLUM**
