SOLD THEIR MILL
Salem capital has bought and will operate the Eugene woolen mill. The Thomas Kay Woolen Mill company is the principal stockholder. The purchase was made of John P. Wilbur and Will Wright of Union.

GENERAL NEWS
An agreement providing for the establishment of parcel post at cheap rates between Sweden and the United States has been concluded. It is an effective today.
In Chicago at the present time there are 90 men and women in prison awaiting trial on charges of either murder or attempted murder, committed in that city.
The lava flow on the island of Savaii, one of the Samoans, after almost completely devastating the island, has extended its area in one direction four miles out into the open sea.
Robert Kitchings, who is seventy years of age, puts a value upon all wools imported into the United States. Last year he personally appraised \$40,000,000 worth. He has held the position 17 years and his salary is \$2500 per year.
Twenty-two student have been suspended from Earham college, Richmond, Ind., and 12 summarily and permanently dismissed, for hazing. Earham is the most popular and aristocratic private institution for learning in Indiana.
Marshall Field left in the state of Illinois personal property valued at \$50,000.00 and realty valued at \$25,000.00 in other portions of the United States, in Europe and in Asia, his belongings will aggregate somewhat over \$125,000,000.
Business men of Arlington are on their mettle by the starting of the new town of Roosevelt on the north bank, and are figuring on a large flouring mill. They have just discovered innumerable natural and other advantages demanding such an enterprise.

Scientific Discovery.
Liquid air and the high absorptive properties of charcoal are now used to secure high vacua. It has long been known that liquid air possesses the property of absorbing gases. Prof. Dewar, the English physicist, has lately demonstrated that this property is increased many fold when the charcoal is cooled to the temperature of liquid air. The absorption takes place so rapidly that if the charcoal is contained in a closed vessel the latter soon becomes empty of air.

Rockefeller's Brother.
Frank Rockefeller, the millionaire and best known of the oil king's brothers, is reserved and unpretentious; his hobby being the taming of wild animals at his home near Cleveland, Wickliffe-on-the-Lake. On his Kansas ranch he has raised 3,000 horses and 30,000 cattle.

Second Tramp — Dat's easy. Anybody dat's industrious has got "wheels"—what?—Judge.

REMARKABLE LUNG CURE.
Young Clergyman Takes to Outdoor Lecturing and Regains Health.
New Yorkers who have been advised by their physicians to seek outdoor work in the country, and who lack either means or opportunity for making the life-giving change need not despair, says the Herald. Wonderful outdoor cures are being worked night in the heart of the city. A most remarkable case is that of a young clergyman who for the last eight or nine months has been lecturing on a sight-seeing coach. Last summer he went to Oxford college, England, for a special course of study, during which his health gave way, and he returned to America with funds exhausted and the verdict of nervous prostration and tuberculosis hanging over his head. His New York physician told him to seek outdoor employment at once, and the young man secured his present position as lecturer to sightseers. At first his voice almost failed him, but as he became accustomed to talking in the cold air the cough stopped and his tones became clear and firm. All winter long he made his daily trip. Now "the spot" on his lung has faded, and in addition to his weekday work in New York he goes to Trenton, N. J., each Sunday to conduct mission services. He intends to remain on the coach until fall, by which time his physician promises that the cure will be complete.

BIG CITY HARDENS SENSE.

People of Great Metropolis Become Insensible to Fœtid Atmosphere in Which They Live.

Perhaps it is fortunate that those people who spend all their lives in a densely populated metropolis are, to a great extent, unconscious of the foetid atmosphere in which they live. After spending a protracted period in the mountains and forests, our nostrils are shocked by the disagreeable odors emanating from the gutters, the shops, the stable-ber of the saloons, and the very persons of the people on the streets, says Dan Beard, in Recreation.

But this sensitiveness of one's olfactory does not long continue. As the ears become accustomed to the roar of the streets, and the eyes to the rank growth of the ungainly buildings, one's nose ceases to record the disagreeable odors. As the faculties adjust themselves to the unnatural and unsanitary surroundings of the city, as the five senses become blunted and dull, their owner appears to be gradually losing individuality and exist only as an unimportant atom in the turbid flood of humanity. Some men are atoms all their lives, but if the president of the United States can go camping with the boys, why should not all Americans who can get a week off follow his example? Many of the Sons of Daniel Boone are quite young, and their parents may object to these little fellows camping alone, but there could be no objections if the father of some one of the boys went with them to teach them wood-raft and keep them under his eyes, and it is safe to say that the man who volunteers to take a fort of Boone boys camping will have the time of his life, and the boys will help him enjoy himself.
