LETTER ON SALMON HATCHERY

La Grande, Oregon,
Jan. 11, 1906.

Seventh Grade Pupils,
Seymour, Ill.

Dear friends:—

Hearing that you would
like to hear from some school in the far
east or in the west, we decided to write
you a few lines.

I live in the suburb of La Grande called
Fruitdale.
My father took the contract to build the
state fish hatchery not many months ago.
The Wallowa River Salmon Fish Hatch-
ery which is a state building, was built in
the summer of 1905. It is situated on the
left bank of the Wallowa river one
and one half miles below where the Elgin
and Joseph stage line runs. The state of
Oregon owns 220 acres of land where the
hatchery is located.

It is 14 miles northeast of Elgin but
still in Union county. The river there
forms the boundary between Union and
Wallowa counties. The object of the fish
hatchery is to hatch salmon eggs and
with the equipment that they have they
will be able to hatch from 15 to 25 mil-
lion fish each season. The building is 250
feet long, 55 feet 4 inches wide and 10
feet up to the eaves.

It has 4 doors, 38 windows and 53 sky-
lights 8 feet square. This building has
fresh running water running through it
all the time. This water is brought from
three-fourths of a mile up the through a
flume which cost the state about \$1000,
and the hatchery building cost nearly
\$5000. The superintendent, A. D. Al-
len's house cost the state about \$1000.

There was a short run of salmon this
season, so they did not take as many eggs
as they could take care of, but they have
about two million little fish, or they will
have that amount when they are all
hatched and that time will be early in the
spring. These little fish do not eat any-
thing until they are about three months
old then they breed them and keep them
until they are about 2 or 3 inches long;
then they are turned in to the river and
they go for the ocean and they are sup-
posed to reach salt water in side of a year
after they are in the ocean. They are not
heard of for four years then they will re-
turn up the same stream in which they
were hatched to spawn after which they
all die. So the life of a salmon is reckoned
at four years.

Another strange thing about them is
that they do not eat any thing after they
leave salt water, so they slowly starve to
death in two or three months.

This season they arrived at the hatch-
ery about the 10th to the 20th of July.
This time will vary some with the season
and the height of the water.

Hoping that when you write you will
tell us about some of the interesting sur-
roundings, I remain your friend,
Mable Lambert.

The above is one of several letters that
have been written to schools in Illinois,
New York and Nebraska from the Fruit-
dale school, of which Robert A. Wilkin-
son has been the teacher for many years.
Miss Mable Lambert is only 14 years of
age.

NOTICE TO BRIDGE BUILDERS

Sealed bids will be received by the
county courts of Union and Wallowa
counties of Oregon, up to noon, February
7, 1906, for the construction of a bridge
across the Wallowa river, according to
plans and specifications on file in the
Clerk's office of each of said counties.

Bids for the abutments and approaches
must be separate from the bridge proper.
Certified checks for 5% of the
amount of the bid must accompany the
same, as a guaranty that a contract and
bond will be entered into to build said
bridge, or abutment, and approaches as
the case may be, according to said plans
and specifications.

Said courts reserve the right to reject
any and all bids.

S.S.S. OUR RECORD

20 YEARS
OF CURES

With medicines as with other things, the surest test of
worth is the length of time they have the confidence of
the people. The efficacy of S. S. S. has been thoroughly
proven by experience, and so successful has it been that
today it is the best known and most widely used blood
remedy in the world. For diseases such as Rheumatism, Catarrh, Scrofula,
Skin Diseases, Sores and Ulcers, Contagious Blood Poison, and other troubles
due to an impure and poisoned condition of the blood, no remedy acts so
promptly and thoroughly as does S. S. S., and thousands throughout the
country, cured of such diseases, are daily recommending it to others simi-
larly afflicted. **ITS FORTY YEARS OF EXISTENCE HAVE BEEN
FORTY YEARS OF CURES.** S. S. S. is a blood purifier of the highest
order, containing properties necessary to cure blood troubles of every character,
and which make it the greatest of all tonics. It goes into the blood and drives
out any and all impurities, and makes this stream of life strong and healthy,
and when this is done disease cannot remain. Being made entirely from roots,
herbs and barks, chosen for their healing, purifying and building-up prop-
erties, it does not injure any of the delicate organs or tissues of the body as do
those medicines which contain Potash, Mercury, Arsenic or other harmful min-
erals, but cures safely as well as permanently. S. S. S. reaches deep-seated
and inherited cases on which the ordinary Sarsaparillas and tonics have no
effect. It is no experiment to use S. S. S.; it is a remedy with a record; it
has proven its worth and ability by its forty years of cures. If you need a
blood remedy begin the use of S. S. S.; write us about your case and let our
physicians advise you and send book on the blood; no charge for either.
