TAYLOR MUST SERVE

Pendleton, Feb. 5—Mandates have been received by County Clerk Saling from the supreme court at Salem, notifying that officer that the decisions of the lower court had been affirmed concerning the cases of Moses Taylor and Grover Martin. District Attorney Phelps immediately took the matter up and instructed Sheriff Taylor to take Moses Taylor into custody, preparatory to delivering the wealthy Athena wheat raiser to the penitentiary.

Sheriff Taylor will leave today or possibly tomorrow for Athena for the purpose of bringing back his namesake and holding him here until he shall be taken to the penitentiary. There is now absolutely no hope for the extensive wheat raiser unless he is granted a pardon directly by the governor. Taylor was convicted last June of attempt to commit arson on the farm of his neighbor and brother-in-law, John Banister, and was given a sentence of to and a half years in the penitentiary.

Grover Martin, who was convicted of manslaughter for killing O. N. Preston near Freewater last May, was given a sentence of ten years. Martin has been in the county jail for several weeks and it is probable that he will be taken to Salem at the time Taylor is taken to the penitentiary.

FEVERS, CONTINUED

All school recognize the difficulty to be, in the usual case of fever, a stoppage of the drainage. Suspended secretion is suspended excretion. The sewers of the body clog up, and the poisons remain and circulate in the blood. Here is shown nature's perfect poise. The poisons come in contact with the heat center of the brain, irritate it and produce an increased oxidation (burning) to more rapidly destroy the poisons; nature's response to the call. The increased temperature is but a symptom, and a favorable one, too, and needs attention only when reaching a dangerous height. Strange, isn't it, that patients will demand doctors and doctors give drugs to reduce the temperature, antipyretics? Just another instance of treating a symptom instead of the cause. The Osteopath here proceeds as usual, treating the cause, securing activity of the glands, excreting the poisons by securing an activity of the bowels, skin, kidneys and lungs. He conquers fever by aiding nature.

"TAMING OF THE SHREW"

Charles B. Hanford's presentation of the "Taming of the Shrew" delighted one of the largest audiences that ever assembled in Steward's opera house and without exception all were glad they were fortunate enough to be present. Mr. Hanford and Miss Marie Dronah naturally took the leading part but their support was composed of some very clever artists. The people were so well pleased that several approached Manager Steward to ascertain if it were possible to have the company present "The Merchant of Venice" next week, following their Pendleton date, but we will be compelled to wait until next season.
