CLEANLINESS

As milk is the natural food for the young, containing within itself all the reguirements of the body, and as any adulteration is injurious to the system, (either from absorption or otherwise) therefore the health of the consumer, and especially the young, depend to a great extent upon those who handle the milk. And as there are so many ways in handling the cow as well as the milk after being drawn from the cow. Every consumer should visit the place from whence he gets his milk (no matter if it is surrounded by a high board fence) and see how the cow and the milk are handled before using it as a food for the baby.

The governor desires that the young man be brought back to serve the remain der of his term. All the papers in the matter have been sent to District Attorney Manning, and Le Berge will be given s hearing in the circuit court, if he so desires, upon the question whether he can lawfully be returned to serve the unexpired portion of his sentence.

A MODERN MIRACLE

"Truly miraculous seemed the recovery of Mrs. Mollie Holt of this place," writer J. O. R. Hooper, Woodford, Tenn., "she was so wasted by coughing up pus from her lungs. Doctors declared her end so near that her family had watched by her bed-side forty-eight hours; when, at my urgent request Dr. King's New Discovery was given her, and with the astonishing result that improvement began, and continued until she finally completely recovered, and is a healthy woman today." 50¢ and \$1.00 at NEWLIN DROG GO.
