You will surely make a mistake if you do not take some stock in the mines of the Aurelia Mining company, before another raise.

THE PRICE of stock will be advanced from 7½ to 10 on April 1. From last reports the mine is producing ore every day, and will ship ore this summer. Investigate and see.

CLEANLINESS

As milk is the natural food for the young, containing within itself all the requirements of the body, and as any adulteration is injurious to the system, (either from absorption or otherwise) therefore the health of the consumer, and especially the young, depend to a great extent upon those who handle the milk. And as there are so many ways in handling the cow as well as the milk after being drawn from the cow. Every consumer should visit the place from whence he gets his milk (no matter if it is surrounded by a high board fence) and see how the cow and the milk are handled before using it as a food for the baby.

LA GRANDE SCHOOL OF MUSIC

PROF. DAY, PRINCIPAL.
MRS. DAY, ASSISTANT.

This is one of the best musical institutions in the state, and that people in this city and valley are beginning to discover the advantage of this school. The system is the latest and most practical, and includes all the latest discoveries in the art of teaching music. The school is divided into two departments; No. 1 is for beginners from 5 years or more and are taught the first three grades. Pupils come one hour each day. This is no kindergarten system but far superior. No. 2 the grades are from 2 to 6. Here they graduate. Pupils take one or two lessons a week as they desire. No scholars will be permitted to remain in this school who do not study. Opposite the Foley House over the sandy store. Phone 475.

A GOLD MEDAL CONTEST

The subject for debate will be the woman suffrage amendment. The debaters on the affirmative will be Miss Lizzie King and Messrs Jay Reynolds and Edgar Pickler. On the negative, will be Miss Sara Riddle and Messrs Joel Richardson and Earl Kilpatrick. Joint debates in our city have always been entertaining and this will be doubly so because of the question and because the contestants are all our own people. Gold medals will be given to the successful team.

The Facts About Pneumonia

AN EDITOR ANALYZES RECENT SCIENTIFIC REPORTS ON THIS DISEASE.—
OSTEOPATHY FOR PREVENTION AND CURE.

In an editorial discussion of pneumonia recently the N. Y. Globe says in part:

"There is no specific cure for the disease, and no antidote, except its own poison, capable of neutralizing the pneumococcus (pneumonia germ). The physician's operations are limited to what is technically known as 'treating the symptoms' until the germ produces enough poison in its victim to poison itself. If this occurs before the patient succumbs, then nature and the doctor go to work to bring him back to health again.

"The doctor is more like a second in a prize fight or a duel than anything else; the real battle is between the man and the germ. Although medicine is one of the oldest of the sciences, the majority of the doctor's work is still of this secondary character.

"As the report of the recent pneumonia commission states that pneumonia germs can be found in the noses of the majority of healthy persons in cities, it would seem as if the most important prophylactic measures were those to promote the health and resisting power of the man. As long as this is maintained at a proper level, the germ, although present in his nose seems unable to do any harm."

AS TO THE RESISTING POWER

The last paragraph quoted is substantially a summary of the views expressed in this journal upon the occasion of the recent report of the pneumonia commission; and it must appeal to all as sound sense. If there is no weak tissue in the lungs the germ is powerless.

This leads to the natural Osteopathic deduction that when pneumonia has become established the most important consideration of all is to re-establish normal nerve control—so that the bodily forces will be unimpeded in their efforts to fight the disease. Weakened tissue simply means, when the general nourishment of the body is inadequate, that there is some obstruction to the blood flow or to the proper distribution of nerve force; and the fact that the Osteopath searches for and removes these obstructions fully accounts for his unparalleled success in the treatment of pneumonia. His special procedure simply helps Nature to help herself; and, although he uses all proven hygienic and sanitary methods as aids, it is his skilled correction of bodily misadjustments, so that the full resisting power of the patient may be brought into play, which achieves the results.

WHAT OSTEOPATHY CAN ACCOMPLISH

It is to be noted that the Globe editorial refers only to medical methods of treatment, and that Osteopathic experience is different in several respects. For instance no less an authority than Osler declares that there is no medical means of aborting the disease; that is, that it must run its course. Yet the Osteopath repeatedly has succeeded in this when he has been given charge of the case in its early stages. When called in after the engorgement of the lungs has taken place he is, of course, not able to accomplish such quick results; but his methods even then bring better results than any others; and the fact that Osteopaths lose very few cases of pneumonia plainly indicates that they are able to materially aid the body in fighting the disease.—The Right Way.

Get acquainted with SMITH'S

IF SMITH'S MAGAZINE and you are strangers we will send you the magazine three months free that you may get acquainted.

SMITH'S is the biggest illustrated magazine in the world—170 pages of reading matter and pictures, the same size page as the big standard magazines like Harper's and Century.

SMITH'S is made up of the best of everything—best stories that can be obtained, best illustrations that clever artists can draw, and the best special articles, written by writers who know their subject thoroughly and write as entertainingly as they are instructive.

SMITH'S also prints every month a score or more pretty portraits, in colors, of beautiful women. Taken all in all, there is no better magazine than SMITH'S—in fact, none nearly as good, no matter what the cost.

WINTER ECZEMA SKIN HARD AND DRY

Some skin diseases are active in Summer, while others wait until cold weather to manifest themselves. Winter Eczema sleeps in the system through the long hot months, and gives no sign of its presence; but at the coming of Winter the trouble asserts itself and it becomes one of the most painful and distressing of all skin diseases. The blood is filled with poisonous acids which seem to be excited by the cold; and as these are thrown off through the pores and glands, the skin cracks and bleeds, the flesh becomes hot and dry, and the itching intense. The natural oils which keep the skin soft and pliant are dried up by the cold, bleak winds, causing it to become hard and dry, giving it that shiny, leathery appearance, characteristic of the disease. The head, face, hands and feet are the usual points of attack, though other parts of the body may be affected. So painful and distressing is the trouble that the sufferer constantly "doctors" and treats it trying to get relief. Soothing washes, medicated ointments and salves are used, but aside from giving temporary relief they do no good. The cause is poisonous acids in the blood, and these must be removed before a cure can be effected. The cure for Winter Eczema is S. S. S., the greatest of all blood purifiers.

S. S. S. cleanses the entire blood supply of the poisons and sends a fresh, healing stream to diseased skin, healing and softening it and curing the painful, itching eruptions. S. S. S. enters the blood and purifies it of all waste and foreign matter, and cures Winter Eczema. Tetter as it is sometimes called—safely as well as surely; besides it does not contain any harmful mineral to derange the balance of any part of the system. Book on Skin Diseases and any medical advice you need, free. **THE SWIFT SPECIFIC CO., ATLANTA, GA.**
