READY FOR WORK

The Central Railway of Oregon is fast preparing to build its line of road which will first go from some point near Union to the Cove and thence on to Summerville and eventually circle the valley. A shipment of tools was received by the company Tuesday of this week and more will follow a little later on. A stockholder of the company arrived Tuesday direct from New York City, and to all outward appearance the company is now ready for work, only waiting for the snow to clear away and the frost to get out of the ground. T. W. Davidson was approached by a reporter of the Scout, but positively refused to say anything whatever regarding the future plans of his company or at what time work would begin. That the company has been getting ready for business all winter and is prepared to start in at once is the opinion of all, and it will be a surprise if dirt is not flying in earnest within a couple of weeks. It has been a good many months that everyone in the town has been waiting to see what the railroad was going to do. While most of us are in doubt as to what the ultimate result of building the road will be to the town very few doubt that it will be built.—Scout.

CLEANLINESS

As milk is the natural food for the young, containing within itself all the requirements of the body, and as any adulteration is injurious to the system, (either from absorption or otherwise) therefore the health of the consumer, and especially the young, depend, to a great extent upon those who handle the milk. And as there are so many ways in handling the cow as well as the milk after being drawn from the cow. Every consumer should visit the place from whence he gets his milk (no matter if it is surrounded by a high board fence) and see how the cow and the milk are handled before using it as a food for the baby.
