MISSED HIS TRAIN

T. T. Geer, candidate for governor, is still in the city. While he had planned to go to Baker City on passenger train No. 6 this morning, his plans fell through. The gubernatorial aspirant was busy with a prospective vote and failed to notice his train pulling out of the station, until it was everlastingly too late. A frantic run, a wild attempt to seize the rear car, availed him nothing. However, Mr. Geer very graciously admitted "I guess Baker City doesn't want me."

WHAT MORE CAN BE SAID

We will sell you a better upright piano today for \$258.00 than any other retail house on the coast will sell you for \$350.00, and in our introductory sale we are ready to turn you over a better or finer piano for \$285.00 than any other retail dealer in the state can afford to sell you for \$400.00.

THE TRUE ANSWER!

Ques. Do Osteopaths believe in the germ theory of disease?

Ans. Yes.

Ques. Then why do they say diseases are caused by slight displacements of bones, etc? Explain.

Ans. The body in perfect health, is proof against germs. The blood is the best germicide and the only one that can operate within the body. When the bony or muscular obstructions cut off the healthy blood supply to any organ, the germ acting on that particular organ gets a foothold and propagates. The bony or muscular obstruction is the predisposing cause, the germ the active cause.

How then fight the germ? The idea that a medicine is introduced to kill the germ is erroneous and is claimed by no physician. The blood is the only germicide that can act within the body, therefore remove the bony and muscular obstruction and permit the blood to do its work. This is what the Osteopath does in treating germ diseases. And it explains why the Osteopath can abort typhoid fever, pneumonia, la grippe, etc., while the medical doctors say they must run their course.

NOW IS THE TIME

Now is the time to build stone and brick buildings, as the material is now as good as in the summer time and for less money, which is just reversed on material in wooden buildings. But if you do build good wooden buildings I would like to furnish you kiln-dried, straight and clear material for same price or less as you buy so called clear lumber, full of knots, bark and inferior planing, which means short crooks, narrow match and with saw marks remaining and below standard width and thickness. Now it is up to you. The price of the material is just the same or less. Any carpenter knows there is less waste, a labor saving from 10 to 25 per cent, a better job and will last longer.

Building stone and Portland fir lumber a specialty. J. L. MAHS.

SUMMONS

(First publication March 12th, 1906.) In the circuit court of the state of Oregon for Union County.
